

Rodent Management Plan Checklist

This checklist is intended for users creating their own Rodent Management Plan (RMP).

A Ministry template is also available for those who wish to use it instead.

Instructions

1. Complete an RMP for each treatment site before using a second-generation anticoagulant rodenticide (SGAR). For detailed information, review the [RMP template](#).
2. Follow the RMP when using SGARs.
3. Keep RMP records for three years, updating as needed, and provide the RMP to the Ministry upon request.

Checklist Item	Details
Contact Information	
<input type="checkbox"/> Licensee Name & License Number	Name and license number of the responsible licensee
<input type="checkbox"/> Certified Applicator	Name, certificate number, and category of one certified applicator
<input type="checkbox"/> Site Primary Contact	Name, phone, and email of the main site contact
<input type="checkbox"/> Site Owner/Manager Contact	If different, provide owner/manager's name, phone and email
Treatment Site Information	
<input type="checkbox"/> Address	Full address of treatment site
<input type="checkbox"/> Site Description	Business type, property size, managed area, and whether indoors/outdoors
<input type="checkbox"/> Map/Diagram	Map showing proposed treatment areas and bait station locations
Integrated Pest Management (IPM) Elements	
<input type="checkbox"/> Prevention	Exclusion and sanitation measures to prevent rodent issues
<input type="checkbox"/> Identification	Target species identified by common or scientific name (e.g., roof rat)
<input type="checkbox"/> Monitoring	Monitoring methods, frequency, and data collection for assessing rodent populations and damage
<input type="checkbox"/> Injury Thresholds	Thresholds for treatment necessity, with explanation of criteria
<input type="checkbox"/> Treatments	Rodenticide and non-rodenticide methods, rationale, and decision criteria
<input type="checkbox"/> Evaluation	Evaluation of treatment effectiveness, based on regular monitoring
