

## 2014 Plants

### Conservation Status Rank Review and Changes

#### Lichens:

- There was one macrolichen added to the BC Flora.

#### Mosses:

- Two moss taxa were added to the BC Flora.
- Eight moss taxa were removed from the BC Flora.
- There were 10 scientific name changes and three taxonomic lumps (6 taxa into 3 separate species complexes).
- Provincial Conservation Status Ranks were reviewed and adjusted for 17 taxa.

#### Vascular Plants:

- Twenty-eight vascular plants were added to the BC Flora list, including 13 Exotic species. Some additions were the result of new collections, while others were the result of re-identification of herbarium specimens. There were 8 new taxa resulting from taxonomic splits (some of these are reported in the New and Deleted category and some in the Taxonomic and Name Changes tab).
- Four taxa were removed from the BC flora.
- There were 48 scientific name changes and 28 English name changes. There were also five taxa involved in taxonomic lumps.
- Provincial Conservation Status Ranks were reviewed and adjusted for 23 taxa. The 28 additions were also assessed and assigned ranks. In addition, 4 taxa were assessed but there was no change to the ranks.
