

2018 BC Conservation Status Rank Review and Changes

Ecological Communities

- Thirty-four ecological communities had their conservation status rank reviewed.
 - Nine new communities were added to the CDC list and ranked for the first time.
 - Fourteen communities had rank changes, mostly due to additional or better information being available. (see spreadsheet for more information)
 - Eleven communities had ranks remain unchanged.
- Thirty-four Conservation Status Reports were updated.
- One ecological community was reclassified and the old one was deleted.
- Four ecological communities had scientific name changes.
- Two ecological communities had English name changes.
- 347 element occurrences were published for 20 ecological communities.

- The revised Ecological Community Condition Evaluation form is now available. This form supports on-site assessment of the practical conservation value of an ecological community occurrence.
