

Table 14. Recommended management activity time table for spruce beetle

Activity	Timing	
	Priority time frame	Available time frame
Detection		
Aerial surveys	<ul style="list-style-type: none"> July 25 to Aug. 30 	<ul style="list-style-type: none"> July 25 through Sept.
Walkthroughs	<ul style="list-style-type: none"> complete by Sept. 30 	<ul style="list-style-type: none"> July 25 through Oct.
Probes and PHSP	<ul style="list-style-type: none"> complete by Oct. 15 	<ul style="list-style-type: none"> July 25 through Nov.
Cruising	<ul style="list-style-type: none"> complete by Nov. 15 	<ul style="list-style-type: none"> as per cutting permit
Harvesting		
Amendments to management plans	<ul style="list-style-type: none"> approved by Jan. 15 	
Cutting permits	<ul style="list-style-type: none"> issued by Jan. 30 	
Sanitation logging	<ul style="list-style-type: none"> Feb. 1 to Mar. 15 	<ul style="list-style-type: none"> July 25 through March
Updates to harvesting plans	<ul style="list-style-type: none"> approved by April 15 	
Other treatments		
Conventional trap trees	<ul style="list-style-type: none"> felled in March removed in early winter 	<ul style="list-style-type: none"> Jan. through March removed prior to May
Lethal trap trees	<ul style="list-style-type: none"> MSMA treated early May^a felled 2 weeks after treatment 	<ul style="list-style-type: none"> same
Grid semiochemical baiting	<ul style="list-style-type: none"> early May 	<ul style="list-style-type: none"> same
Hauling restrictions	<ul style="list-style-type: none"> during beetle emergence period 	<ul style="list-style-type: none"> same

[a] Treat with MSMA when trees begin translocating in spring.
