Orders

ISSUED TO	LOCATION	ACT	REG.	SECTION	DESCRIPTION
Canfor Pulp Limited	Prince George	<i>Environmental Management Act</i>		77	Contaminated ("dark water") groundwater has been detected entering the Fraser River just below an old spill pond. This is considered a bypass of works and is not authorized under permit. Given the possible impacts of toxic seepages, Canfor is ordered to submit a graphical representation trend analysis of the groundwater quality from 1989 to present, detailed information regarding the treatment of the "dark water" in that time, confirmation of velocity and direction of groundwater flow at the site, results of a hydro geological assessment, additional testing of the affected groundwater wells to determine toxicity, identification of the source of contamination, evaluation, options, and time-line for remediation and clean up.
Columbia Bithulitic Limited	Prince George	<i>Environmental Management Act</i>		77	Information Order issued because stack sampling data indicated non-compliance with the Asphalt Plant Regulation. Due to close proximity of the plant to residents, the meteorological conditions, the air quality of the local airshed, and the condition of the existing equipment, the order requires provision of all data associated with any and all stack sampling or performance checks related to plant operations in electronic or hard copy format for the period between January 2004 to present.
Endako River Timber Ltd.	Burns Lake	<i>Environmental Management Act</i>		77	Information order issued after improper disposal of sawmill wood residue led to a fire. The fire continued burning for over a month, resulting in the ongoing discharge of smoke, raising serious concerns for potential environmental and human health impact to local air shed. The order requires submission of a Wood Residue Waste Management Plan to describe operational history, estimate current quantities of wood residue and their condition, discuss re-use and disposal options for the current stockpile and ongoing production of waste, make recommendations for residue management that will not cause pollution, and provide detailed action plan.
R.D. Moyen Holdings Ltd.	Prince George	<i>Environmental Management Act</i>		77	Information order issued to submit all emission testing done on this facility since its inception, as required under the Asphalt Plant Regulation (APR). The ministry currently has no documentation of any stack sampling performed at this site, which is a contravention of the APR. The 2006 paving season resulted in a large volume of complaints about the asphalt plant operations and air quality concerns.

Orders

ISSUED TO	LOCATION	ACT	REG.	SECTION	DESCRIPTION
McBride Forest Industries Ltd.	McBride	<i>Environmental Management Act</i>		81	Pollution prevention order issued to McBride Forest Industries (MFI) to mitigate potential environmental impacts from leachate and possible fire hazard leading to impacts on air quality from stock piles of hog fuel. MFI is shutting down for an indeterminate period of time and hog disposal in the gasifier unit has ceased. The order requires restart-up of the gasifier incinerator immediately to burn the hog storage piles until the accumulations have been depleted; the order also requires MFI staff on site to supervise operations, conduct regular inspections, and take remedial action for leachate or fire detection. MFI must also submit a plan with cost analysis and time table of actions to be taken for gasifier use and all other options to dispose of accumulated hog fuel, and submit a monthly progress report.
Peter Kiewit Sons Co.	Whistler	<i>Environmental Management Act</i>		81	Pollution abatement and prevention order for open burning activities causing pollution was issued. The company has been ordered to stop the burn immediately, and submit a plan to outline their future waste management handling practices for the wood residues. The order was not complied with, leading to violation tickets being issued to the company.
Silver Star Ski Resort Ltd.	Vernon	<i>Water Act</i>		87	Order by the Assistant Regional Water Manager was issued to allow for the placement of an impervious liner to ensure the safety of an unauthorised dam structure. This amends an order issued last quarter.
