

QUARTERLY ENVIRONMENTAL ENFORCEMENT SUMMARY

3rd Quarter 2014
(July 1 - September 30)

Protecting the Splendor of our Natural Places

Highlights

The Quarterly Environmental Enforcement Summary for Q3 2014 outlines 10 Orders, 64 Administrative Sanctions, 731 Tickets, and 18 Court Convictions for a combined total of over \$417,000 in penalties.

Notable Highlights this Quarter:

On August 4, 2014, a tailings pond breach occurred at **Mount Polley Mine** in south-central BC, near the town of Likely. The breach discharged approximately 17 million cubic meters of water and 8 million cubic meters of tailings materials into Polley Lake and Quesnel Lake. The Ministry of Environment issued a [Pollution Abatement Order](#) under the *Environmental Management Act* on August 5th to the Mount Polley Mine Corporation and will monitor the implementation of the action plan to ensure compliance while assessing potential environmental impacts and ecosystem recovery. In addition, two *Water Act* Orders were issued as a result of the incident and all three orders are published in this report.

Neucel Specialty Cellulose Ltd was convicted in court under the *Environmental Management Act* for exceeding waste discharge levels at its operation in Port Alice on Northern Vancouver Island. The Major Investigations Unit of the Conservation Officer Service handled the investigation in partnership with Environment Canada. The discharges occurred on three separate occasions and resulted in a \$1,000 fine and a \$174,000 court ordered creative sentencing penalty to be paid to the Habitat Conservation Trust Foundation.

Western Coal ULC pled guilty to one count under the *Environmental Management Act* for failing to comply with terms of a permit, resulting in a \$5,575 fine and a court ordered creative sentencing penalty of \$70,000 to be paid to the Habitat Conservation Trust Foundation. Western Coal ULC hired a road construction company to make repairs to a service road, however the company did not follow provincial guidelines and utilized inappropriate drainage culverts and materials. This decision led to a road washout event that allowed sediment to flood into a fish-bearing stream. In his ruling, the judge made special note that Western Coal ULC (and parent company Walter Energy) behaved responsibly by reporting the event and admitting their fault, leading to this lower fine amount. To date, Walter Energy has also spent approximately \$1.2 million for remediation and repairs to the creek and the surrounding environment.

In late 2013, British Columbia launched **Closing the Gap** – a special project aimed at improving the collection of outstanding environmental court penalties. Prior to initiating the multi-ministry project, payment of environmental court fines was approximately 40%. Under the project, the collection rate was increased to 85%.
