

MANUAL

Completing British Columbia's Hazardous Waste Manifests and Supplementary Forms

January 2025

Ministry of
Environment
and Parks

How to use this Manual

This training package is designed to be used as self-study materials to assist with correct completion of the British Columbia Hazardous Waste Manifest and supplementary forms.

It includes:

- An [Introduction](#) for all users of the Manifest.
- Separate sections for the different users of the Manifest:
 1. [Consignors](#) (Generators) – those who own or are responsible for a hazardous waste and wish to transport it elsewhere for storage, treatment, recycling or disposal.
 2. [Carriers](#) – those who transport the hazardous waste from a consignor's site to a receiving site.
 3. [Consignees](#) (Receivers) – those who receive and manage the hazardous waste.

This package is designed so that you can refer directly to the sections that are of interest to you when completing the Manifest. For example, if you transport hazardous waste, but do not generate, store or receive it, then read the introduction and go directly to the [carriers section](#).

Note: All aspects of this training manual and all roles of those who handle hazardous waste are governed by:

- The [Environmental Management Act](#) of British Columbia,
- The [Hazardous Waste Regulation](#),
- The [Transportation of Dangerous Goods Act](#) of Canada,
- The [Cross-border Movement of Hazardous Waste and Hazardous Recyclable Material Regulations](#) of Canada.

The Acts and Regulations listed above supersede any information in this booklet, and familiarity with the original legislation is an essential requirement for managing hazardous waste.

Introduction

WHAT IS HAZARDOUS WASTE?

Hazardous waste is waste material which, because of its toxic or reactive nature, must be managed and disposed of properly to prevent harm to the environment or human safety or health. Examples include:

- waste lead-acid batteries,
- used oil,
- asbestos from buildings,
- used solvents, and
- numerous other materials classified under the Hazardous Waste Regulation.

The [Hazardous Waste Regulation](#) of British Columbia (formerly the "Special Waste Regulation") was introduced in 1988 to govern all aspects of managing these wastes (handling, transportation, storage, treatment and disposal). This regulation includes the manifest requirements of:

- The [Environmental Management Act](#) of B.C.
- The federal [Transportation of Dangerous Goods Act](#) and Regulations.
- [The Cross-border Movement of Hazardous Waste and Hazardous Recyclable Material Regulations](#) under [CEPA](#).

WHO CAN MANAGE HAZARDOUS WASTE?

Under the Hazardous Waste Regulation, persons who store, ship, transport, or receive hazardous waste must have an authorization to do so. The authorization can be in the form of a registration and approved plans, a permit, or a licence to transport from the B.C. Ministry of Environment and Parks.

- Companies or individuals who operate sites where more than specified amounts of waste (e.g., more than 5,000 L of waste oil, 500 L of waste gasoline or 1,000 kg of asbestos) are produced must be registered with B.C. Ministry of Environment and Parks as a "generator" of hazardous waste. Registration amounts are specified in Schedule 6 of the Hazardous Waste

Regulation.

- Carriers of hazardous wastes for which a manifest is required (e.g., more than 210 L of waste oil, 5 L of waste gasoline or 5 kg of asbestos wastes), must be licensed by the B.C. Ministry of Environment and Parks to transport them. The amounts for which a manifest is required are outlined in Section 46 of the Hazardous Waste Regulation.
- Sites where hazardous waste is stored, handled, processed, recycled or disposed of require an authorization – registration and approved plans or permit – for their business.

All persons who manage hazardous waste, including employees of the companies involved, require the following specific training for managing the waste:

- Relevant waste management statutes and regulations (federal and provincial laws and local by-laws)
- Relevant waste management best practices and guidelines (e.g., industry standards and codes of practice, industry best management practices)
- Environmental concerns for the waste(s)
- Occupational health and safety concerns (e.g., what to do if exposed to the waste)
- Emergency management procedures (e.g., what precautions to take; what action to take in a spill emergency)
- Waste management procedures (e.g., operational and handling requirements)
- Operation of vehicles and waste management equipment (e.g., transportation and handling requirements)

Employers are responsible for providing training in these topics.

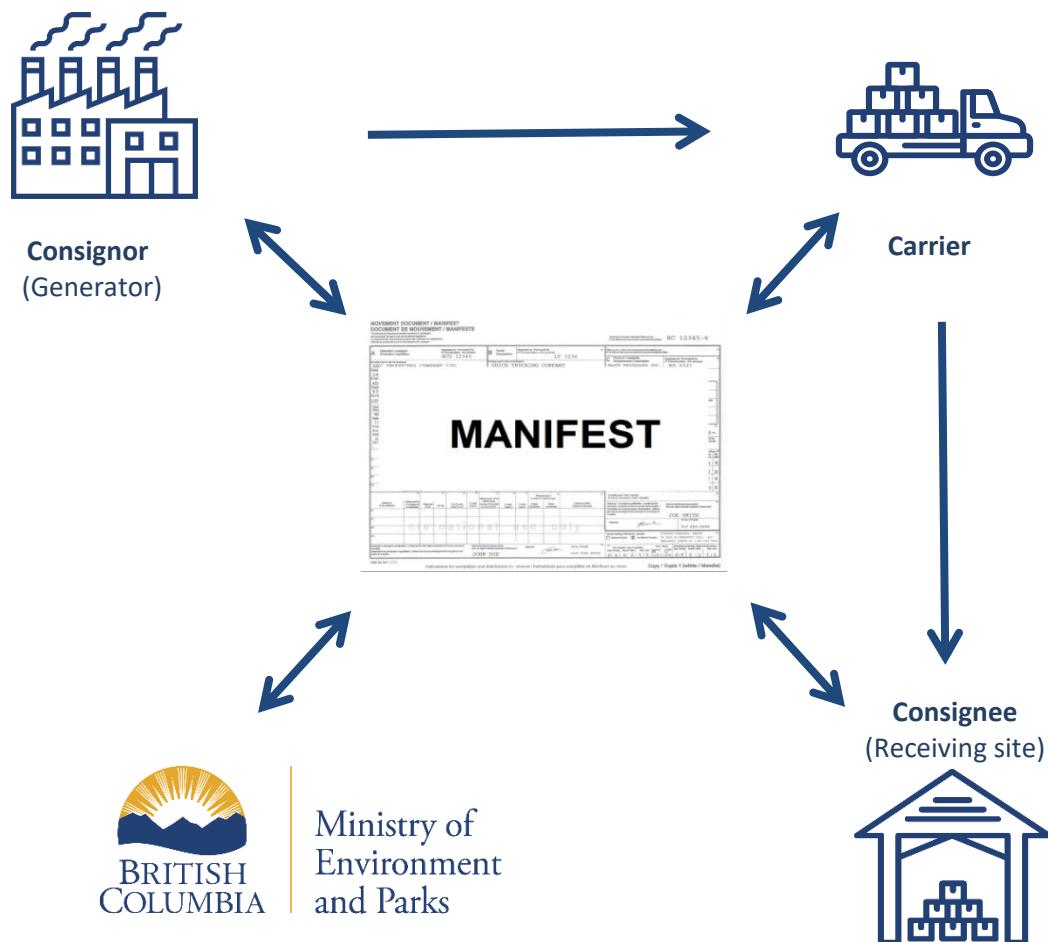

WHAT IS A MANIFEST?

The Hazardous Waste Manifest is the movement document prescribed by the province of B.C. for the purpose of tracking the movements of hazardous waste within British Columbia, to or from other parts of Canada, and to or from other countries. The Manifest is a form designed to meet the requirements of the various

federal and provincial Acts and Regulations.

A Manifest, when completed, provides:

- Detailed information on the type and amount of hazardous waste transported.
- A record of who shipped the waste (consignor or generator).
- A record of who transported it (carrier).
- A record of who was intended to receive the shipment, and who actually received it (consignee or receiver).
- Information on how the waste is to be managed at the receiving site.

The Manifest remains with the shipment while it is being carried, and copies are kept by each person who handles the waste. Copies are also sent to the B.C. Ministry of Environment and Parks (and authorities in other provinces or countries involved) so that the movement of hazardous waste can be tracked.

The Manifest is filled out by each of the three parties involved in transporting the waste. The form includes six copies for distribution to each party involved. The Ministry receives two copies, one from the consignor and another from the consignee.

Part A is completed by the consignor before sending the shipment	Part B is completed by the carrier before transporting the shipment	Part C is completed by the consignee after receiving the shipment

HOW MANY TYPES OF MANIFEST ARE THERE?

Manifest for Waste Shipments Originating From Inside B.C.

A manifest issued by the B.C. Ministry of Environment and Parks must be used for hazardous wastes shipped **from sites in B.C.** (in Section 46 (3)(b) of the Hazardous Waste Regulation). Each manifest is identified with a unique number; this number also identifies the origin of the manifest, i.e. manifest numbers starting with "B" are from the British Columbia Ministry of Environment and Parks.

If the correct manifest is not used, the applicable parties are in non-compliance with this manifest requirement and are subject to penalties.

B.C. Manifests and other forms used for transport are available from the [Distribution Centre](#) in Victoria and/or [FrontCounter BC](#) offices throughout the province.

WHEN IS A MANIFEST REQUIRED?

A separate Manifest must be completed for each shipment leaving the consignor's site, and for each part of a shipment that is delivered to a different consignee.

Very small quantities of hazardous wastes may not require a Manifest. A Manifest is required when transporting greater than the minimum amounts shown in the table below:

Waste	Prescribed quantity	Examples
Solid hazardous waste (other than batteries)	5 kg	Waste asbestos; spent caustic soda; pesticide wastes
Liquid hazardous waste (other than waste oil)	5 L	Waste diesel; solvents such as trichloroethylene, alcohol, paint thinner; acids; peroxides
Gaseous hazardous waste, fitting into a container that has a total liquid capacity of 5 L	Any quantity	Cylinder or tank of gas: hydrogen, butane, propane, chlorine, nitrous oxide, helium
Waste oil	210 L	Used oil, crankcase oil, emulsified oil/sludge
Liquid or solid hazardous waste containing 500 grams or more of PCB	Any quantity	Transformers; ballasts; PCB equipment; waste oil contaminated with PCB; askarel liquids (Aroclor)
Waste batteries	1,000 kg	1 pallet of lead-acid batteries
Waste paint	210 L	Paint sludge; paint spray booth sludges and wastes; urethane

Note: TDG regulations may require a shipping document for lesser quantities (if a waste is also a dangerous good)

WHAT IS DONE WITH THE MANIFEST?

Each Manifest includes six coloured copies, distributed as follows:

**Copy 1
(white)**

After the consignor completes part A and carrier completes Part B, the consignor mails copy 1 to the BC Ministry of Environment and Parks within **3 (three) days**.

- If shipment is to another province or country, photocopies are also sent to the authorities in those jurisdictions

**Copy 2
(green)**

Consignor keeps Copy 2 on file for 2 (two) years, and sends Copies 3 to 6 with the carrier.

- Carrier keeps Copies 3 to 6 with the shipment until it is delivered

**Copy 3
(yellow)**

After shipment is received, the consignee completes Part C of the manifest and mails Copy 3 to the BC Ministry of Environment and Parks within **3 (three) days**.

- If shipment is from another province or country, photocopies are also sent to authorities in those jurisdictions

**Copy 4
(pink)**

After Part C is completed, the consignee gives Copy 4 to the carrier, who keeps it on file for **2 (two) years**

**Copy 5
(blue)**

Consignee keeps Copy 5 on file for **2 (two) years**

**Copy 6
(brown)**

Consignee mails Copy 6 back to the consignor within 3 days. The consignor keeps Copy 6 on file **for 2 (two) years**, together with Copy 2 of the manifest.

WHAT ARE MANIFEST SUPPLEMENTS?

Within B.C., under certain circumstances one of the following supplements can be completed and attached to a single Manifest. Using these forms can avoid the need for additional Manifests. Only one of these "multiple" forms can be used with an individual Manifest.

Manifest Supplement - Multiple Consignors, Form 3

WHERE DO I OBTAIN ADDITIONAL INFORMATION?

The requirements under the Hazardous Waste Regulation and *Transportation of Dangerous Goods Act* can be complex – there are numerous exceptions for specific types or amounts of waste. If you are not sure of the Hazardous Waste Regulation registration requirements, or waste classifications, please refer to the Hazardous Waste Legislation Handbooks and guidance documents available in the Ministry of Environment and Parks' [Hazardous Waste website](#).

You may contact the Hazardous Waste Program office in Victoria at 250-356-5044 or hazwaste@victoria1.gov.bc.ca for certain requests, such as obtaining a carrier's licence for hazardous wastes, or to speak to a technical advisor in hazardous wastes management.

Transportation of Dangerous Goods information can also be obtained from the above offices, as well as from:

- BC Motor Vehicle Branch (Victoria): 250-978-8300
- Transport Canada (TDG - Vancouver): 604-666-2955
- Transport Canada (Ottawa): 613-990-1158

Consignors

OBJECTIVES

When you have completed your review of this section, you should be able to:

- Locate the necessary information to describe and classify the wastes you generate.
- Complete the Manifest accurately.
- Distribute the Manifest copies correctly.
- Complete the consignor's part of the:
 - Multiple Carriers Supplement
 - Multiple Different Wastes Supplement
 - Multiple Consignors Supplement
- Distribute the copies of the supplements correctly.

LOCATING THE INFORMATION

Before you can ship hazardous waste, you must have the necessary information to complete the Manifest correctly.

If you are required to register as a generator of hazardous waste and you have not yet registered, you must complete the registration process and be issued a generator registration number before you can ship hazardous waste. Contact the BC Ministry of Environment and Parks and/or look for the application on the Hazardous Waste website at

<http://www2.gov.bc.ca/gov/content/environment/waste-management/hazardous-waste>. If you generate and/or accumulate smaller quantities (see S. 43(1) and Schedule 6 of the Hazardous Waste Regulation), you may not need to be registered – check with the BC Ministry of Environment and Parks when in doubt.

If you are registered as a "Generator of Hazardous Waste," all the required information will be available on your Generator Registration Letter, issued by the BC Ministry of Environment and Parks.

In order to complete your part of the manifest, you require the following information:

Company Information

- 5-digit provincial identification number (also called BCG number), issued to you by the Ministry of Environment and Parks and shown on your registration letter (if registration is required).
- Company name as it appears on your generator registration letter, or your registered business name as it appears in "BC On-line" if registration is not required.
- Company address – business mailing address, **and** physical location of the shipping site.
- Company email address and phone number for contact

Information about the hazardous waste you generate

- Class and United Nations identification number (UN No.) if under the Transportation of Dangerous Goods (TDG) Regulations
- Physical state of waste and shipping name (if dangerous goods as defined in Part 2 of the federal dangerous goods regulations, use the dangerous goods shipping name; if not, then use the applicable name per the list in the definition of "hazardous waste" found in Section 1 of the Hazardous Waste Regulation)
- Packing group or category (if assigned under TDG Regulations), and code for type of packaging.
- Special handling instructions and/or emergency instructions necessary for the carrier or consignee.
- Labels and placards required for shipping.
- If not a dangerous good, name listed in the definition of hazardous waste.

If you are not sure of any of the information above, refer to:

- Hazardous Waste Regulation
- Transportation of Dangerous Goods Regulations
- Hazardous Waste Legislation Guide and other guidance documents,

You can also call the Hazardous Waste Program office for assistance.

- Specific, detailed precautions required for handling, or
- Detailed emergency response procedures.

Note: If the shipment is to another country, the portion “International use only” is to be used. International shipments must comply with the federal [Cross-border Movement of Hazardous Waste and Hazardous Recyclable Material Regulations](#).

Environment and Climate Change Canada uses a manifest, known in its regulations as a **movement document**, which can be obtained through the Canadian Notification and Movement Tracking System (CNMTS).

As the consignor or exporter of record, the information required to complete the columns for international shipment can be found on the movement document.

Environment and Climate Change Canada’s (ECCC’s) movement document can meet provincial regulatory requirements and be used instead of the B.C.’s paper-based manifest only when it is used for international shipments and under certain conditions. However, ECCC’s movement document does not meet provincial regulatory requirements for interprovincial or intra-provincial shipments of hazardous waste from B.C.

The movement document produced by CNMTS **must not** be used to replace the B.C. manifest for hazardous waste shipped from B.C. to another place within B.C. (intra-provincial) nor to another province/territory (interprovincial). If a movement document is used for the intra-provincial movement or interprovincial movement, a B.C. paper manifest must also be used in order to meet the provincial regulations

Visit the [ECCC's User guide](#) for more information.

The next portion of the manifest pertains to certification of the consignor. By signing this portion, the consignor certifies that the information contained in Part A is correct and complete.

Review the form to ensure the information is complete and accurate; signing means you accept responsibility for sending the shipment as listed.

Enter the full telephone number (including area code) where you can be reached:

- To clarify data
- To provide information in an emergency

Generator / consignor certification: I certify that the information contained in Part A is correct and complete. I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, and are classified, packaged, marked and labelled/placarded, and are in all respects in proper condition for transport according to applicable international and national governmental regulations.

Attestation du producteur / expéditeur: J'atteste que tous les renseignements à la partie A sont exacts et complets. Je déclare que le contenu de ce chargement est décrit ci-dessus de façon complète et exacte par la désignation officielle de transport et qu'il est convenablement classé, emballé, marqué, étiqueté, muni de plaques-étiquettes et à tous égards bien conditionné pour être transporté conformément aux réglementations internationales et nationales applicables.

DISTRIBUTING THE MANIFEST

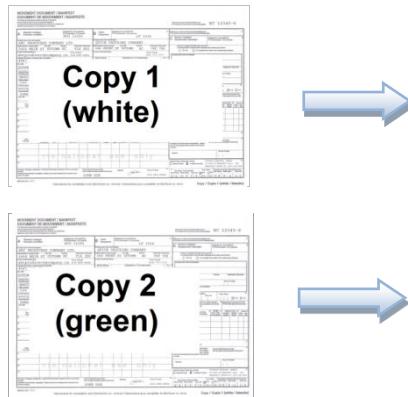

After completing Part A, give the Manifest to the "carrier" – the person taking the shipment from your site – and wait for the carrier to complete Part B, which must be completed before the shipment leaves the site.

Shipments within B.C.

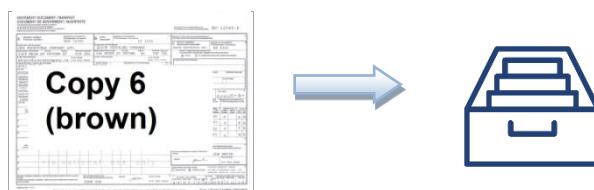

When the carrier has completed Part B, the consignor sends copies 3 to 6, and any attached documents with the carrier.

Consignor retains Copies 1 and 2 of the manifest

After the consignee has received the shipment, they will mail Copy 6 to the consignor
• Within 3 (three) days

If you have not received Copy 6 **within 3 days** of the expected day the shipment was received, the consignor must attempt to obtain Copy 6 from the consignee

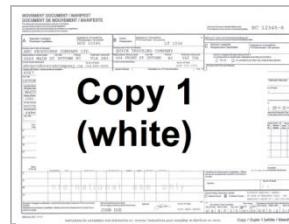

If you were unable to obtain Copy 6 from the consignee, you must notify the Ministry **within 10 days** after the shipment occurred

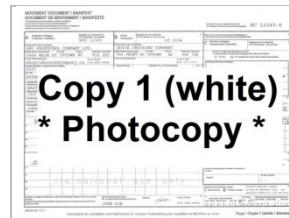

Shipments to other provinces in Canada

In addition to the requirements when shipping within B.C., you are required to photocopy Copy 1 and send the photocopy to the receiving jurisdiction in that province.

- Addresses for each province are listed on the reverse side of the Manifest.

Original to:
BC Ministry of Environment and Parks
Within 3 (three) days

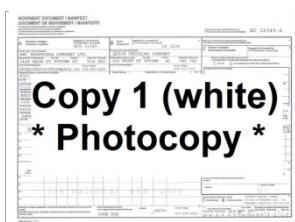

Photocopy to:
Authority in receiving province

Shipments to other countries

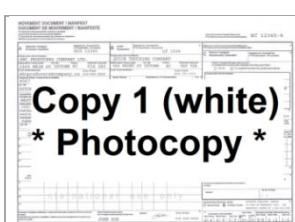

For international shipments, distribute Copy 1 as shown:

Original to:
BC Ministry of Environment and Parks **within 3 (three) days**

Photocopy to Canada Customs at point of exit

Photocopy to:
Waste Reduction and Management Division – Environment Canada, Place Vincent Massey, 351 St. Joseph Blvd., 9th floor Gatineau, Quebec K1A OH3

Other Copies of the manifest (Copies 2 and 6) are to be distributed as described on the previous page.

COMPLETING THE "MULTIPLE CARRIERS" SUPPLEMENT

When it is known in advance that a waste shipment will be transported from the consignor's site by more than one carrier to a single destination, the consignor completes Parts A and B of a manifest as shown below, and attaches a 4-copy *Multiple Carriers* Supplement. On the supplement, the first driver will fill out their information and other carriers will fill in additional information when they receive the shipment.

The form is illustrated below; details are on the following pages.

 BRITISH COLUMBIA		Manifest Supplement - Multiple Carriers, Form 5 Under the authority of the Hazardous Waste Regulation, Section 47.1						
CONDITIONS: This form can only be used as an attachment to a HAZARDOUS WASTE MANIFEST under the following conditions: (a) There is only one Consignor (Generator) and only one Consignee (Receiver) for all of the waste listed on the referenced Manifest and on this form (b) There are no additions to or deletions of waste from the consignment after the shipment leaves the Consignor's site (c) The form must be attached to the Reference Manifest and must be in the vehicle when the shipment is being transported

OBJECTIVES

When you have completed this section, you should be able to:

- Locate the necessary information to complete the Manifest.
- Complete the Manifest accurately.
- Deliver the Manifest with the shipment.
- Complete the:
 - Multiple Consignors Supplement
 - Multiple Carriers Supplement
- Deliver and/or distribute the supplements.

LOCATING THE INFORMATION

Carriers are required to hold a valid licence issued by the BC Ministry of Environment and Parks in order to transport hazardous waste at a quantity exceeding the prescribed amount for which a manifest would be required (for details see Introduction section, [page 6](#)). You must also hold the same category of licence for the waste you intend to transport.

The information required to complete the Manifest correctly should be available on your Licence to Transport Hazardous waste. A copy of the licence must be in the vehicle at all times.

You require the following information:

Company Information

- 3 or 4-digit provincial identification number (LT number)
- Company name as it appears on the licence.
- Mailing address of your company.
- Email address and telephone number for company contact

Vehicle Information

- Licence plate number(s) (tractor and trailer) and province (for road vehicles).

Route Information

- Border crossing points for shipments crossing international borders.

Handling Knowledge

You must have completed training in transportation of dangerous goods if the hazardous waste you are transporting is also a dangerous good.

- If you are a driver, your employer is responsible for ensuring you have completed adequate training to protect the environment and ensure the safety of yourself and others in the case of an accident or other emergency.
- Emergency numbers to report spills or damage to shipments should be located in the Carrier's Contingency Plan

COMPLETING PART B OF THE MANIFEST

After the consignor – person sending the waste – has completed Part A and signed it, complete Part B as shown:

Enter your company name exactly as it appears on the licence		Enter the number assigned to you or to your company on your Licence to Transport Hazardous waste. For rail or other transportation modes, enter "N/A" or "Not Applicable" in the Provincial ID number.

After you complete part B, the consignor will remove Copy 1 and 2 and hand Copies 3 to 6 to you

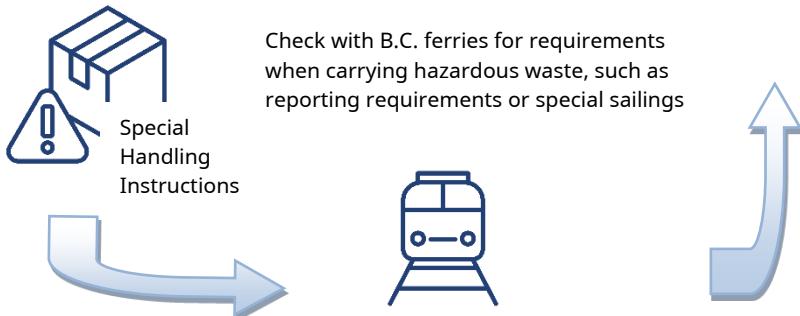

Carry Copies 3 to 6 with you:

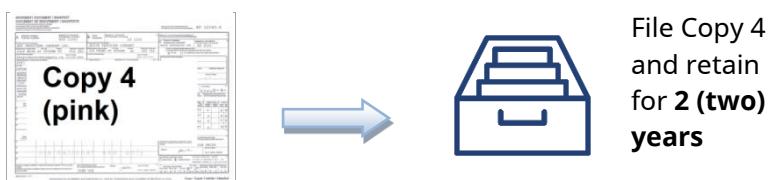

- Be sure to attach any additional documents – look for any "see attached" comments on the Manifest
- The consignor gives all documents to the person who takes control of the shipment en route (usually this person is the driver)
- At the receiving site, give copies 3 to 6 to the consignee (receiver)

Check with B.C. ferries for requirements when carrying hazardous waste, such as reporting requirements or special sailings

After completing Part C of the Manifest, the consignee will give you Copy 4 for your records

COMPLETING "MULTIPLE CONSIGNORS" SUPPLEMENT

If you are picking up a single type of waste from more than one consignor and taking it to a single location, you can complete one Manifest, and attach a 3-copy *Multiple Consignors* supplement.

This is a common practice if you are gathering bulk loads from a number of collection points. Examples of bulk load wastes include, but are not limited to, waste oil, waste solvents and waste batteries.

The form is illustrated below; details are on the following pages.

OBJECTIVES

When you have completed this section, you should be able to:

- Locate necessary information to complete the Manifest.
- Complete the Manifest accurately.
- Distribute the Manifest copies correctly.
- Distribute the copies of the supplements correctly.

LOCATING THE INFORMATION

Before you can receive and handle hazardous waste, you must have the necessary information to complete the Manifest correctly. All the required information should be available on the registration and approved Operational Plan, or other authorization issued to your facility.

If you do not have the knowledge to verify the hazardous waste information, or to complete other parts of Part C of the Manifest, refer to:

- The Hazardous Waste Regulation
- The Transportation of Dangerous Goods Regulations
- The Hazardous Waste Legislation Guide
- A qualified professional

You require the following information:

Company Information

- 5-digit provincial identification number (RS number), as issued on your registration or other appropriate authorization number.
- Company name as it appears on your registration form (if registration is required).
- Company address - business mailing address, and physical location of the receiving site.

Note: any consignee must have an authorization from the BC Ministry of Environment and Parks to receive hazardous waste.

Information about the hazardous waste you receive

The consignor and the consignee should have a contract indicating the type of waste to be managed and the agreed management method for that waste. The consignor should have provided the waste information to the consignee before shipping the waste.

- Classification number and United Nations identification number (UN No.) if under TDG Regulations, and packing group if assigned.
- Physical state of waste and shipping name
- Packaging and transporting requirements.
- Special handling instructions.
- Decontamination procedures required.
- Handling and storage and processing methods.

If you are an employee of the consignee, your employer is required to provide adequate training to ensure you are able to handle and/or process hazardous waste safely.

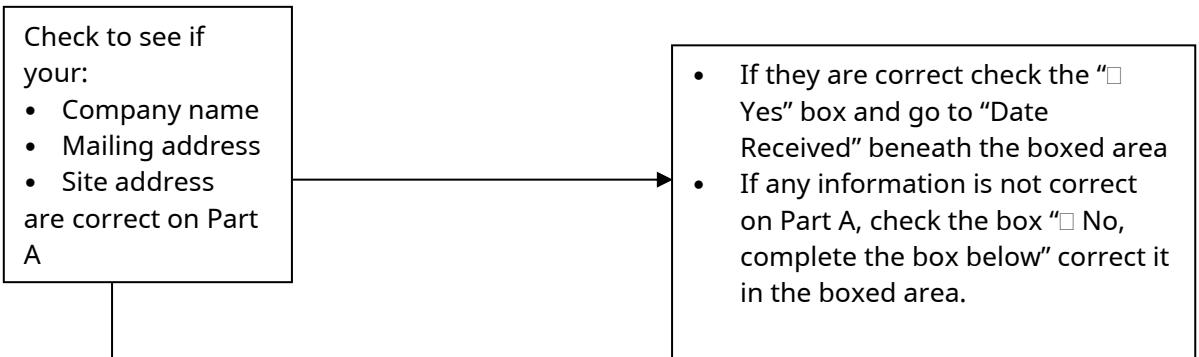

Training must be documented and meet the requirements of the Hazardous Waste Regulation. For hazardous wastes that are dangerous goods, training requirements under the TDG Regulations must also be met.

COMPLETING PART C OF THE MANIFEST

As soon as the waste is delivered to you, check the shipment and complete Part C as shown (Copies 1 and 2 will have already been removed):

Review the description of the waste in Part A of the form and ensure that is what you have received.

If there are problems (as listed below) with the shipment, contact the consignor for clarification and also notify the Ministry at EnvAuthorizationsReporting@gov.bc.ca:

- Waste not as described on the Manifest
- Quantities that indicate wastes may have been removed or lost from the shipment (for example, more than 5% discrepancy between quantity shipped and quantity received)
- Shipments of hazardous waste without a manifest
- Unsafely packaged shipments

After entering information about the hazardous waste received, enter information about how it will be managed:

ENFORCEMENT AND PENALTIES

The *Environmental Management Act* (EMA) allows officers to stop road or rail vehicles or vessels at any reasonable time and to request they be opened for inspection.

Officers may also inspect vehicles to check compliance with the EMA. As a result, a vehicle and its cargo may be seized or ordered to be dealt with in any manner considered necessary. Any costs incurred in the disposal or handling of an impounded vehicle or waste will be charged to the owner. In carrying out such inspections, officers may examine or remove records, conduct investigations, take samples for analysis, or take other measurements as necessary.

A carrier failing to comply with manifest or transport licence requirements, as well as the requirements of the Environmental management Act and the Hazardous Waste Regulation may:

- be fined of up to \$200,000.00
- be imprisoned for up to six months and/or
- have their licence suspended or cancelled.

DISCLAIMER

This manual is not a legal document. This document does not supersede or replace the *Environmental Management Act* or its regulations; in the case of omissions or discrepancies, the Act and the Hazardous Waste Regulation apply. It is intended for guidance only.
