Appendix A – Board of Directors as of December 31, 2024	28
Appendix B – Call2Recycle British Columbia Members	29
Appendix C – Call2Recycle Public Collection Facilities in British Columbia	32
Appendix D – Private British Columbia Collection Facilities	45
Appendix E - Recycling Process – Downstream Flow Chart	47
Appendix F – Auditor's Report on Non-Financial Information	48
Appendix G – Audited Financial Statement.....	56

1. Executive Summary

Call2Recycle is pleased to provide this report on the performance of its battery recycling program in British Columbia from January 1, 2024 to December 31, 2024. Throughout this document, Call2Recycle presents actual performance against the provincially approved targets set out in its 2020-2024 Extended Producer Responsibility (EPR) plan, approved in 2024 by British Columbia's Ministry of Environment and Parks.

All information in this annual report has been subject to a third-party audit of non-financial information. It has been reviewed by an independent auditor and verified as fairly stated according to the audit criteria. Please see [Appendix F](#) and [Appendix G](#) for the complete auditor's reports.

Products within plan	Dry-cell, primary and rechargeable consumer batteries sold as a stand-alone product or for replacement purposes only and weighing less than five (5) kilograms.	
Program website	www.call2recycle.ca www.call2recycle.ca/british-columbia	
Recycling Regulation Reference	Topic	Summary (5-bullet maximum)
Part 2, section 8(2)(a)	Public Education Materials and Strategies	<ul style="list-style-type: none"> • Launched new consumer brand, Recycle Your Batteries, Canada!, supported by branded Smart collection containers, boxes and television ads, as well as online and outdoor promotions to underscore key recycling messages. • Leveraged partnership with soccer star, brand ambassador and BC native Christine Sinclair to elevate the <i>Recycle Your Batteries, Canada!</i> message. • Sponsored various BC sports organizations, including Burnaby and Kamloops Blaze Soccer Clubs, North Vancouver FC, Peninsula FC, Richmond FC, and more. • Call2Recycle continues to partner with 12 other Producer Responsibility Organizations to support the First Nations Recycling Initiative (FNRI), which aims to increase awareness about recycling programs in First Nations communities in BC. • Conducted annual national campaigns around National Battery Day (February), Earth Month (April), and Circular Economy Month and Waste Reduction Week (October).

Recycling Regulation Reference	Topic	Summary (5-bullet maximum)
Part 2, section 8(2)(b)	Collection System and Facilities	<ul style="list-style-type: none"> • Call2Recycle offers public and private battery collection boxes within manufacturing, retail/wholesale, public agency, and business services settings, including the IC&I sector. • Call2Recycle rolled out a new generation of Smart Containers across the province, the most advanced in North America, equipped with heat and fill sensors to increase safety and efficiency. • In 2024, active Call2Recycle collection facilities increased by 4% in BC, from 1,769 in 2023 to 1,833. Of these, 792 locations were public collection facilities, up 39 and surpassing the target of 600 established in the EPR plan. • An active collection facility must meet at least one of the following criteria: it has enrolled in the program during the calendar year; or it has shipped batteries (a minimum of one box or one bulk shipment) during the calendar year; or it has ordered a replacement box within the calendar year. • Call2Recycle drop-off locations remain highly accessible to BC residents with 96% of people having a public collection facility within 15 km of their home.
Part 2, section 8(2)(c)	Product Environmental Impact Reduction, Reusability and Recyclability	<ul style="list-style-type: none"> • Batteries collected by Call2Recycle in BC are typically consolidated and sorted within the province at Cirba Solutions (formerly Retrie) in Trail, BC or GFL in Delta, BC. Batteries are then sent to one of Call2Recycle's contracted processors based on their chemistry and the processor's capacity.

Part 2, section 8(2)(d)	Pollution Prevention Hierarchy and Product / Component Management	<ul style="list-style-type: none"> Call2Recycle continues to be the only battery recycling organization in Canada certified to four internationally recognized standards for battery collection, transportation and recycling safety: R2v3, ISO 14001, ISO 45001 and ISO 9001. These certifications affirm its commitment to the highest operational, environmental and occupational health and safety standards.
--------------------------------	---	--

Recycling Regulation Reference	Topic	Summary (5-bullet maximum)
Part 2, section 8(2)(e)	Product Sold and Collected and Recovery Rate	<ul style="list-style-type: none"> Call2Recycle collections in BC surpassed one million kilograms for the first time (1,026,305 kg), increasing 8% over 2023 collection numbers. Based on sales data reported by obligated producers¹, an average of 2,442,216 kg of batteries were sold in British Columbia from 2021 to 2023. The Call2Recycle program collected 1,026,305 kg of used batteries in 2024, reflecting a recovery rate of 42%. This is a 2% increase over the previous year.
Part 2, section 8(2)(e.1)		<ul style="list-style-type: none"> See Section 7 for breakdown of collections per regional district
Part 2, section 8(2)(f)	Summary of Deposits, Refunds, Revenues and Expenses	<ul style="list-style-type: none"> Call2Recycle collected Environmental Handling Fees (EHFs) on all primary and rechargeable stand-alone/replacement batteries in 2024. Fees vary based on battery type (primary or rechargeable) and size. \$6,430,597 in revenue (British Columbia) \$6,415, 916 in expenses (British Columbia)

¹ Call2Recycle uses sales of primary and rechargeable batteries based on number of units reported by producer members. Units are then converted to weights based on industry standards.

Comparison of Key Performance Targets		
Part 2 section 8(2)(g); See full list of targets in Plan Performance		
EPR Targets and Commitments	Performance	Strategies for Improvement
1. Recovery Rate – 52%	42%	<ul style="list-style-type: none"> • BC collections reached new record-breaking numbers, increasing by 8% over the previous year and the recovery rate is increasing, up 2% from the previous year. • Call2Recycle will continue to promote the new <i>Recycle Your Batteries, Canada!</i> consumer brand and host collection events in partnership with BC municipalities and businesses to drive battery collection activity. • Leveraging the results of its Ipsos consumer survey, Call2Recycle will plan and develop targeted promotions to address demographic gaps and non-recycling behaviours.

Comparison of Key Performance Targets		
Part 2 section 8(2)(g); See full list of targets in Plan Performance		
EPR Targets and Commitments	Performance	Strategies for Improvement
2. Number of Public Collection Facilities – Minimum 600	792	<ul style="list-style-type: none"> Target exceeded. Call2Recycle strives to optimize the number and efficiency of its collection facilities, seeking to achieve optimal distribution around the province, greatest accessibility to residents, collection performance, and the ability to host collection events (if applicable).
3. 95% of British Columbians living within 15 km of a public collection facility	96%	<ul style="list-style-type: none"> Target exceeded.
4. Maintain an awareness level of 87% or higher	86%	<ul style="list-style-type: none"> Overall awareness of battery recycling in British Columbia remained stable (rising slightly by 1% over the previous year). Although the target was not achieved, the actual awareness percentage is very close to the target. Call2Recycle will continue to actively promote the new <i>Recycle Your Batteries, Canada!</i> program and call to action, particularly among younger BC residents (18-34 years), who show lower levels of awareness compared to older BC residents.

Comparison of Key Performance Targets		
Part 2 section 8(2)(g); See full list of targets in Plan Performance		
EPR Targets and Commitments	Performance	Strategies for Improvement
<p>5. Percentage of British Columbians who recycle all of their batteries - 54%</p>	44%	<ul style="list-style-type: none"> Continue to reinforce messaging that is resonating with consumers to “Collect, Protect, and Drop off” batteries, with an increased emphasis on “at least every 3 months” to deter storing batteries. Further build awareness of Call2Recycle’s new easy-to-remember consumer brand, <i>Recycle Your Batteries, Canada!</i> and its website, recycleyourbatteries.ca, to increase public education. Informed by Call2Recycle’s most recent Ipsos consumer survey, identify new, convenient collection options and incentives for lagging younger demographic.
<p>6. Recycling Efficiency Rate:</p> <p>Alkaline, Carbon Zinc, Zinc Air – 75%</p> <p>Lithium – 50%</p> <p>Ni-Cd – 65%</p> <p>Ni-Mh – 70%</p> <p>Li-Ion – 70%</p> <p>Small Sealed Lead Acid – 70%</p>	<p>Alkaline, Carbon Zinc, Zinc Air: 80-95%</p> <p>Lithium: 0%</p> <p>Ni-Cd: 72-73%</p> <p>Ni-Mh: 77-92%</p> <p>Li-on: 72%</p> <p>SSLA: 72%</p>	<ul style="list-style-type: none"> All Targets met, with the exception of lithium primary. Call2Recycle has become aware that its contracted lithium primary processor is not operating within the program’s standards, and a solution is being enacted.

2. Program Outline

Call2Recycle operates Canada's first and largest national battery collection and recycling program. Recently re-branded *Recycle Your Batteries, Canada!*, the program safely collects, transports and recycles consumer batteries weighing under five kilograms (5 kg) on behalf of battery manufacturers, retailers, distributors and other obligated producers. Call2Recycle has operated in Canada for more than 28 years and is the provincially approved EPR program for batteries in British Columbia. It safely maximizes the diversion of batteries from landfills through a vast network of collection partners operating 1,833 active collection facilities across the province as of December 31, 2024. Through these collectors and a series of battery sorting and processing partnerships, Call2Recycle offers a transparent and cost-effective end-of-life battery management for consumers and manufacturers alike.

Adhering to the highest standards for safety and operations and in full compliance with provincial regulations, Call2Recycle's program collects all household batteries, regardless of the battery chemistry, and sorts and processes the components for reuse. No battery collected through the program that can be recycled goes to landfills. The reclaimed materials are instead used in the manufacturing of new products, such as new batteries, cookware and appliances, thereby contributing to a strong Canadian circular economy.

3. Public Education Materials and Strategies

Call2Recycle is continually dedicated to building awareness of battery recycling and encouraging consumers to divert their used batteries from landfills. To this end, it executes a range of national outdoor, online and television promotional campaigns in support of such events as National Battery Day (in February) and Waste Reduction Week (in October), as well as regional campaigns targeted specifically to BC residents.

In 2024, Call2Recycle rolled out its new consumer brand, *Recycle Your Batteries, Canada!*, designed to increase its awareness with Canadian consumers and encourage battery recycling behaviours. This included a robust awareness campaign and distributing new boxes, posters, and easel cards to collection partners across its network. The new boxes and collateral include QR codes that allow consumers to learn more about battery recycling and to enter contests.

Call2Recycle also significantly increased its program's visibility and collections through its new brand ambassador, Canadian soccer legend and BC native Christine Sinclair, who was featured in various campaigns to raise awareness of *Recycle Your Batteries, Canada!* and encouraged Canadians to recycle their used batteries.

3.1. Website & Social

Online traffic originating from British Columbia increased in 2024 as Call2Recycle rolled out its new consumer brand and website, RecycleYourBatteries.ca, and introduced a consumer promotion featuring Christine Sinclair.

The new website features robust information designed to educate consumers about the three steps in safely recycling batteries through "Collect, Protect, Drop Off." The site also includes information on the environmental benefits of battery recycling, how batteries are recycled as well as additional safety information regarding the safe handling of lithium-ion and Damaged, Defective and Recalled (DDR) batteries.

The legacy Call2Recycle website continued to attract 9,921 visitors from BC in 2024, while RecycleYourBatteries.ca drew 75,104 visitors, and our online contest website attracted another 47,449 BC residents. Combined, the three sites accumulated 132,474 visits from BC residents, surpassing the 2023 total (83,192) by 59%. Call2Recycle anticipates online visits to RecycleYourBatteries.ca to continue to grow as the new consumer brand gains further traction with Canadians.

3.2. Campaigns

In 2024, Call2Recycle successfully executed high-impact digital and television campaigns to promote *Recycle Your Batteries Canada!*, raise awareness of battery recycling, and promote recycling behaviours.

In February 2024, consumers were introduced to the new brand through a bold television campaign that was advertised on National Television, including two appearances on the Oscars. New commercials titled "Decisions, Decisions" depicted the morality play that consumers experience when they decide between throwing batteries into the trash, or recycling responsibly.

In April, during Earth Month, digital ads encouraged consumers to enter the Earth Month Contest and recycle their batteries for a chance to win cash prizes. Consumers entered the contest by scanning QR codes printed on the new branded boxes and Smart Containers when they dropped off their batteries. Call2Recycle also posted additional educational content throughout Earth Month including consumer-focused blogs, social media posts and videos

In October, brand ambassador Christine Sinclair headlined our *Circular Economy Month* campaign, appearing in new TV commercials that inspired consumers, youth, and communities to increase their battery recycling practices. Commercials featuring Christine Sinclair were broadcast on national television and digital channels, encouraging Canadians to recycle their used batteries. Once again, consumers were invited to enter a contest by scanning a QR code on collection boxes and smart containers.

3.3. Sponsorships, Partnerships and Events

Extending our national campaign, featuring Christine Sinclair, to local communities, *Recycle Your Batteries, Canada!* proudly sponsored various **soccer clubs** across British Columbia in 2024, including the Burnaby Soccer Club, Kamloops Blaze Soccer Club, North Vancouver FC, Peninsula FC, and Richmond FC, encouraging BC youth to acquire early recycling habits. The *Recycle Your Batteries, Canada!* logo was proudly sported on numerous team uniforms and social media assets featuring Christine Sinclair were shared with local clubs to post to their own social media channels.

Throughout the year, Call2Recycle collaborated with regional and local BC governments and businesses to encourage battery recycling and create new battery drop-off locations. New **local collection partnerships** were formed with the cities of Burnaby, Delta, Richmond, the District of Kitimat-Stikine and Capital Regional District, and the University of British Columbia. Call2Recycle also collaborated with the District of Squamish on the [province's first curbside battery collection events](#) in June and November.

In total, Call2Recycle worked with various partners to organize and execute the following **battery collection events** across the province in 2024:

Location	Date
District of Squamish	June 3-7
Vancouver Landfill Open Day	June 7-8
Fraser Valley	Sept 14
Fraser Valley	Sept 15
Fraser Valley	Sept 21
McBride	Sept 21
Prince George	Sept 28
Township of Langley	Oct 19-20
District of Squamish	Nov 4-8

In addition, Call2Recycle worked with the Stewardship Agencies of BC, the BC Product Stewardship Council and the First Nations Recycling Initiative (FNRI) to further its collaboration on battery collection events.

Call2Recycle also continued its longstanding **school partnership** with Earth Rangers to educate Canadian youth about the importance of battery recycling through the Battery Blitz program. In 2024, 16 elementary schools across British Columbia participated in the Battery Blitz program and recycling competition, collecting more than 3,200 kilograms of used batteries.

3.4. Consumer Awareness Assessment

Call2Recycle annually surveys British Columbia residents to assess their recycling awareness and habits. From 2023 to 2024, consumer awareness that household batteries can be recycled rose by 1% to 86%. This is within the margin of error of both last year’s number and the target noted in the EPR plan and represents stable awareness across BC residents. Awareness of Call2Recycle’s “Collect, Protect and Drop off” phrase rose significantly (by 11%), with 35% of respondents very or somewhat familiar with the phrase.

The overall recycling rate for household batteries slightly decreased from 75% in 2023 to 74% in 2024. Fewer residents (61% compared to 65% in 2023) are storing their batteries, and significantly fewer (63% compared to 72% in 2023) are storing them for a time when it is more convenient for them to recycle them, suggesting that more BC residents are recognizing and acting on convenient options for battery recycling. More than half (55%) of survey respondents were somewhat or very familiar with battery storage safety precautions.

Consumer Awareness and Recycling Incidences Targets ²	Target	2024 Actual
Percentage of British Columbians who are aware that consumer batteries can be recycled	87%	86%
Percentage of British Columbians who recycle <u>all</u> ³ of their consumer batteries (%)	54%	44%

The survey also found that while BC residents aged 18-34 are significantly more likely than older groups to have seen battery recycling ads online or on television, this age group is recycling less than their older counterparts. A notable portion of this younger demographic expressed interest in incentives like coupons or at-home recycling services and preferred modern drop-off solutions, such as subway stations or delivery services.

4. Collection System and Facilities

In 2024, Call2Recycle rolled out a new generation of Smart Containers for battery collection and transport. These Smart Containers are the most advanced in North America, equipped with heat and fill sensors for safety and efficiency. Over 150 Smart Containers were distributed to BC retail locations, including London Drugs, Save-On-Foods and Staples. Call2Recycle also expanded its automatic pick-up service in the Greater Vancouver Area, increasing the speed and efficiency of battery collection and processing in the province.

In addition to retail drop-off locations, the BC Call2Recycle collection network includes locations in business services, public agencies, manufacturing, and wholesale collectors.

² Based on a sample of 1,000 B.C. residents surveyed online via the Ipsos I-Say panel from February 4 to March 1, 2025. Online poll precision is measured using a credibility interval. Results are considered accurate to within +/- 3.5 percentage points, 19 times out of 20, of what the results would have been had all British Columbian adults been surveyed.

³ The survey also reported that 74% of British Columbians reported recycling some or all of their primary and rechargeable batteries in 2024. The 44% reported in the table represents the percentage of residents who recycled all of their batteries.

The number of active collection facilities in BC increased by 4% in 2024 to 1,833 from 1,769 in 2023, primarily driven by growth in the retail and business services sectors. A collection facility is considered active if it joined the Call2Recycle program in 2024 *or* returned a full box/bulk shipment of batteries during the year *or* ordered a replacement collection box during 2024.

2024 Active Call2Recycle Collection Facilities

Public	792
Private	1,041
Total	1,833

The following table lists the active collection facilities by sector. Full lists of Call2Recycle collection facilities are provided in [Appendix C](#) and [Appendix D](#).

2024 Active Collection Facilities by Sector

Sector	2024	2023	Change (#)	Change (%)
Business Services	409	382	27	7%
Public Agencies	682	677	5	1%
Manufacturing	58	60	-2	-3%
Retail	683	648	35	5%
Consumer	1	1	0	0%
Other	0	1	-1	-100%
Total	1,833	1,769	67	4%

Call2Recycle participates in the annual waste composition studies conducted in various regions of the province by the Stewardship Agencies of BC (SABC). Waste composition data typically provides a snapshot of the waste stream during each sampling period. Other stewardship agencies also manage batteries or products containing batteries in the province, therefore, changes in the number of batteries found in the waste stream during such studies cannot be solely attributed to Call2Recycle's program. However, the information from these audits informs areas for improvement.

In 2024, SABC retained Tetra Tech Canada to conduct four waste composition studies across Cowichan Valley Regional District (July 23 – August 2, 2024), District of Squamish and Squamish-Lillooet Regional District (September 9 – 17, 2024), City of Surrey (October 28 – November 2, 2024)

and Thompson-Nicola Regional District (December 9 – 13, 2024). Extrapolating the findings from each study, Tetra Tech Canada estimates that 0.2 kilograms of batteries were disposed of per capita across the province.

5. Product Environmental Impact Reduction, Reusability and Recyclability

Recycling is the most effective and practical way to divert used batteries from landfills and contribute to the circular economy. Whenever possible, Call2Recycle uses local service providers to minimize its environmental footprint. Call2Recycle's approved sorters and processors use state-of-the-art techniques to reclaim materials following the highest environmental, transportation, health and safety, and financial operations standards.

Please see [Appendix E](#) for Call2Recycle's sorters and processors flow chart.

6. Pollution Prevention Hierarchy and Product/Component Management

Call2Recycle is steadfastly committed to operating the safest, most efficient, transparent and socially responsible battery collection, transportation and recycling program in Canada. To this end, it was the first program of its kind to achieve Responsible Recycling (R2) certification, the electronics recycling industry's leading certification, and continues to be the only battery recycling organization in Canada certified to four standards for battery collection, transportation and recycling safety: R2v3, ISO 14001, ISO 45001 and ISO 9001. These distinctions confirm Call2Recycle's continued strict adherence to stringent requirements regarding safe, secure battery collection and processing, and proper downstream management of its battery collections, which includes not exporting to developing countries or sending materials to local landfills, and its commitment to the environment and occupational health and safety.

Call2Recycle manages batteries in accordance with the Pollution Prevention Hierarchy (PPH):

<p><i>(a) reduce the environmental impact of producing the product by eliminating toxic components and increasing energy and resource efficiency;</i></p>	<p>Call2Recycle encourages producers to manufacture batteries that have high efficiency, are energy-dense, and have a longer lifespan. This reduces the number of units introduced into the market.</p>
<p><i>(b) redesign the product to improve reusability or recyclability;</i></p>	<p>Call2Recycle encourages battery producers to design batteries in a manner that improves reusability and recyclability.</p>
<p><i>(c) eliminate or reduce the generation of unused portions of a product that is consumable;</i></p>	<p>This level of the PPH does not apply to program materials managed by Call2Recycle, as batteries are not consumable products.</p>
<p><i>(d) reuse the product;</i></p>	<p>Rechargeable batteries, by design, can be reused until they can no longer hold a reliable charge.</p> <p>In the context of battery refurbishment as a form of reuse, lithium-based rechargeable batteries are the most commonly eligible for refurbishment. Best practices and manufacturer recommendations stipulate that refurbished lithium batteries should undergo testing in accordance with UL 1642 standards. Call2Recycle is unable to guarantee compliance with these standards by lithium battery refurbishers. Given the importance of public safety, Call2Recycle does not endorse the practice of battery refurbishment at this time.</p> <p>Similarly, there are no official guidelines regarding refurbishing other rechargeable batteries; therefore, Call2Recycle does not support these activities due to safety risks and a lack of standards.</p>

<p>(e) <i>recycle the product;</i></p>	<p>The single-use batteries collected as part of the program are recycled, as, by design, they cannot be reused. Rechargeable batteries enter Call2Recycle’s stream at the end of life. Batteries that are collected as part of the program are recycled.</p> <p>Call2Recycle facilitates connections between interested battery processors and battery manufacturers, promoting the reuse of reclaimed materials from recycled batteries to produce new ones.</p> <p>Other materials recovered through the recycling process (e.g. metals) are sold as commodities for use in the manufacturing of new products.</p>
<p>(f) <i>recover material or energy from the product;</i></p>	<p>Any battery component that cannot be recycled will be managed via waste to energy.</p>
<p>(g) <i>otherwise, dispose of the waste from the product in compliance with the Act.</i></p>	<p>In rare instances where Call2Recycle downstream processors have exhausted all the above options, any residual material will be disposed of in compliance with the Act.</p>

The first of the following charts shows how the various materials extracted from the recycling process are managed, and the subsequent chart provides the Recycling Efficiency Rates (RER). Call2Recycle records RER by chemistry to illustrate the quantity of material reclaimed for use in secondary products from each battery chemistry relative to Call2Recycle’s provincial EPR plan targets.

Product End Fate for Data Year Ending December 31, 2024

Component Chemistry	Reuse	Recycle	Energy Recovery	Landfill	Other
Nickel Cadmium (Ni-Cd)	N/A	Yes	No	No	No
Nickel Metal Hydride (Ni-MH)	N/A	Yes	No	No	No
Lithium Ion (Li-Ion)	N/A	Yes	No	No	No
Small Sealed Lead Acid (SSLA)	N/A	Yes	No	No	No
Alkaline	N/A	Yes	No	No	No
Lead Carbonate	N/A	Yes	No	No	No
Lithium	N/A	No	No	Yes	No
Mercury	N/A	Yes	No	No	No
Nickel Iron	N/A	Yes	No	No	No
Silver Oxide	N/A	Yes	No	No	No
Zinc Carbon (mercury)	N/A	Yes	No	No	No
Zinc Carbon (no mercury)	N/A	Yes	No	No	No
Cardboard Boxes	No	Yes	No	No	No
Box Liner	Yes	Yes	No	No	No
Bags	No	Yes	No	No	No
Drums*	Yes	Yes	No	No	No
Non-Conforming**	No	Yes	No	Yes	No

*Drums are reused by the sorter to send materials to the appropriate processor. If not suitable for reuse, then the metal is recycled.

Call2Recycle met or exceeded RER targets for all battery chemistries, with the exception of lithium primary. The 2024 RER for all battery chemistries collected by Call2Recycle under the approved EPR plan are outlined below. Call2Recycle has updated its RER calculation chart to be more consistent with industry standards and best practices.

Recycling Efficiency Rates for 2024

Without Processors Identified

Battery Type	Rechargeable Battery Chemistry						Primary Chemistry					
	Ni-Cd		Li-ON	Ni-MH		SSLA	Alkaline				Lithium	
Metals	73%	72%	72%	77%	92%	68%	22%	30%	18%	10%	54%	0%

Total Material Recovery (%)	73%	72%	72%	77%	92%	72%	95%	82%	80%	88%	95%	0%
Unrecovered Material (%) / non-recovered for use in Secondary Market during Recycling Process: Water, Oxygen, Plastics, Organics (Carbon, Electrolytes)	27%	28%	28%	23%	8%	28%	5%	18%	20%	12%	5%	100%
Total	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%	100%

Recycling Efficiency Rates (RER)

Battery Chemistry	RER Target	Status	Battery Chemistry	RER Target	Status
Alkaline, Carbon Zinc, Zinc Air	75%	Exceeded	Ni-Cd	65%	Exceeded
Lithium	0%	Below	Ni-MH	70%	Exceeded
Small Sealed Lead Acid	70%	Exceeded	Li-Ion	70%	Exceeded

7. Product Sold and Collected and Recovery Rate

Call2Recycle monitors its battery collections across BC, tracking annual and year-over-year collection performance. In 2024, the program’s total battery collections in the province continued its record-breaking trajectory, increasing for the seventh consecutive year and surpassing one million kilograms for the first time ever. Collections grew by 8% over 2023’s historic numbers to reach 1,026,305 kg. Although the quantity of single-use batteries collected in 2024 dipped slightly from 2023, these batteries still made up the bulk of collections (62%), while rechargeable batteries represented higher year-over-year growth, increasing by 35%.

Call2Recycle 2024 Collections by Weight (kg)

Type	2024	2023	% Change
Single Use (Primary)	633,949	663,154	-4%
Rechargeable	392,356	291,420	35%
Total	1,026,305	954,574	8%

The recovery rate is a percentage calculated based on the volume of the batteries collected during the year, by weight, divided by the average weight sold into the market in the preceding three years (2021 through 2023). The weight sold is based on quantity information reported to Call2Recycle by its members through remittance of Environmental Handling Fees (EHFs). These are converted into weights based on industry standards.

Call2Recycle achieved a recovery rate of 42% in 2024. While collections in BC continue to break records, this recovery rate is shy of the 52% target in the EPR plan. Call2Recycle will analyze its annual consumer survey results and research data to identify the contributing factors and address barriers to recycling that are contributing to this shortfall. This analysis, along with our continued promotion of the *Recycle Your Batteries, Canada!* brand, and our partnerships to expand collection events and consumer awareness will help the program attain its EPR targets.

2024 Recovery Rate

Total Weight Collected in BC in 2024 (kg)	Avg. Total Weight Sold in BC from 2021-2023 (kg)	Recovery Rate (%)
1,026,305	2,442,216	42%

Across the province, the average collections per facility increased by 10.8 kg to 550.4 in 2024 from 539.6 kg in 2023. Two regions with small population sizes—Stikine, with two collection facilities, and Northern Rockies, with four facilities—did not return any boxes during this reporting period. Less populous, remote communities like these often take longer than a year to generate enough used batteries to fill the 30 kg-capacity collection box for return to Call2Recycle. Without a box return, the facility is deemed “inactive” for that year, but becomes active again when its box reaches capacity and the collection site returns it to Call2Recycle. As a result, year-to-year fluctuations in the active vs. inactive status of some facilities are expected, even though it may create the misconception that there is no activity in the region. In the Northern Rockies, for example, one facility was “active” this year, either requesting a new collection box or being a new addition to the Call2Recycle program.

On a per capita and per facility basis, Central Okanagan significantly outperformed all other regions in collections, collecting twice as many batteries per 1,000 people (546.8 kg) than the following highest regions: Comox Valley (265.1 kg), Sunshine Coast (262.1 kg), and Capital (258.5 kg). The Sunshine Coast and Fraser Valley had the highest per-facility collections after Central Okanagan, at 815.1 kg and 803.1 kg, respectively. Returns from Squamish-Lillooet and Bulkley-Nechako increased significantly in 2024, at 89% and 65% respectively, thanks to the launch of the curbside collection weeks in the District of Squamish, to the addition of four new collection sites (transfer stations) in Bulkley-Nechako. Call2Recycle held two multi-day collection events in Squamish in June and November, respectively, contributing to these strong returns.

Call2Recycle Collections by Region

Regional District	Active ⁴ Collection Facilities	2024 Total (kg)	2023 Total (kg)	Yr. to Yr % Change	Avg (Mean) Collections Per Facility (kg)	Collections Per 1,000 people ⁵ (kg)
Alberni-Clayoquot	24	4,073	4,089	0%	169.7	112.5

Total B.C.	1,833	1,026,305	954,574	7%	564.7	179.9

⁴ An active collection facility must meet one of the following criteria: enrolled in the program during the calendar year; has shipped a at least 1 box or 1 bulk shipment during the calendar year; or has ordered a replacement box within the calendar year. While this chart depicts the collection facilities that sent in a shipment in 2024, Call2Recycle has other facilities registered that may ship on an infrequent basis.

⁵ Population numbers based on the *Municipal and Sub-Provincial Areas and Population, 2011-2024 report provided by the [Government of British Columbia](#).*

8. Summary of Deposits, Refunds, Revenues and

Expenditures

Primary and rechargeable stand-alone or replacement batteries sold in BC are subject to an Environmental Handling Fee (EHF), a fee per unit sold. [EHFs](#) are calculated based on the cost of managing the collection and responsible recycling of each battery by specific type. Call2Recycle collected EHF's from producer members who reported sales between January 1 and December 31, 2024. Thanks to effective cost mitigation strategies, Call2Recycle will retain the existing EHF fee levels in British Columbia in 2025. As always, it will continue to monitor revenues to ensure the fee structure accurately reflects program costs. Please see [Appendix G](#) for Call2Recycle's audited financial statements.

9. Plan Performance

Performance Measures	2024 Results	Strategies for Improvement
Primary batteries collected	633,949 kg	<ul style="list-style-type: none"> Call2Recycle will continue to promote the consumer brand <i>Recycle Your Batteries, Canada!</i>, leveraging brand ambassador Christine Sinclair, and drive awareness of ideal battery recycling behaviour by emphasizing the convenience and ease of recycling through <i>Recycle Your Batteries, Canada!</i> program and other Call2Recycle collection activities. Call2Recycle will continue to prioritize developing and enhancing partnerships with local governments and business partners to expand opportunities for consumers to recycle their used batteries.
Rechargeable batteries collected	392,356 kg	
Total batteries Collected	1,026,305 kg	
Total Number of Collection Facilities (Private and Public)	1,833	

		<ul style="list-style-type: none"> • Call2Recycle will leverage the data and feedback from its consumer surveys to identify demographic gaps and successfully target its promotional efforts to address them. • Continue building on opportunities to add collection facilities where people live and shop (e.g. condominiums and local grocers) to optimize convenience for BC residents.
--	--	--

Performance Against EPR Plan Targets

Performance Measures	2024 Target	2024 Results	Strategies for Improvement
Recovery Rate	52%	42%	<ul style="list-style-type: none"> • Continue the ongoing deployment of Smart Containers across the province, alongside collaboration with sorting and processing partners to strengthen Call2Recycle’s infrastructure. • Leverage the findings of Call2Recycle’s annual Ipsos survey of BC residents to identify new opportunities for removing mental and behavioural barriers to recycling. • Call2Recycle will continue to promote the <i>Recycle Your Batteries, Canada!</i> brand and emphasize the “Collect, Protect and Drop Off” message to prompt consumers to take action on battery recycling at least every three months.
Accessibility	95%	96%	<ul style="list-style-type: none"> • Target exceeded • Call2Recycle will continue to strategically position public collection facilities to ensure accessibility and optimal collection productivity. This will include identifying high-traffic, repeat-visit locations for new facilities, such as retailers, and in-home

			and near-home facilities around multi-unit dwellings.
Performance Measures	2024 Target	2024 Results	Strategies for Improvement
Total Number of Public Collection Facilities	600 minimum	792 (active)	<ul style="list-style-type: none"> • Target exceeded
Consumer Awareness	87%	86%	<ul style="list-style-type: none"> • Call2Recycle will continue to promote its new consumer branding, <i>Recycle Your Batteries, Canada!</i>, which inherently calls consumers to action on battery recycling and will help drive consumer recall. • Continue developing and enhancing partnerships with local governments and businesses to expand opportunities for consumers to recycle their used batteries. • Leverage the data and feedback from its consumer surveys to successfully target its promotional and operational efforts at specific underperforming demographics. • Build on Call2Recycle’s “Collect, Protect and Drop Off” campaign to reinforce the message of the ease and importance of safe battery recycling practices.
Percentage of British Columbians who Recycle all their Consumer Batteries	54%	44%	<ul style="list-style-type: none"> • As noted previously, Call2Recycle will continue its consumer education campaigns in 2025. • It will also continue to monitor consumer awareness through in-depth surveys on

			battery recycling attitudes and behaviours across BC.
Recycling Efficiency Rate	Alkaline – 75% Lithium – 50% Ni-Cd – 65% Ni-MH – 70% Li-Ion- 70% SSLA – 70%	Alkaline: 80-95% Lithium: 0% NiCd: 72-73% NiMH: 77-92% Li-on: 72% SSLA: 72%	<ul style="list-style-type: none"> All Targets exceeded, with the exception of lithium primary. Call2Recycle has become aware that its contracted lithium primary processor is not operating within the program’s standards, and a solution is being enacted.

Appendix A – Board of Directors as of December 31, 2024

Call2Recycle Canada, Inc.'s Board of Directors is comprised of:

David Collie, Chair, Independent

Joe Borsellino, Chateau Manis Electronics Inc.

Annalise Czerny, Independent

Peter Daley, Dollarama Inc.

Tammy Giroux, General Motors of Canada

Marc Guitor, Panasonic Canada Inc.

Raman Johal, London Drugs Ltd.

Kevin Rejent, Energizer Holdings, Inc.

Paul Neilsen, Live to Play Sports

James McPhedran, Independent

Alan Moyer, Independent

Alma Obeid, Canadian Tire Corporation (CTC)

Tim Reuss, Canadian Automobile Dealers Association

Brian Temins, Cassels Brock & Blackwell LLP

Appendix E - Recycling Process – Downstream Flow Chart

Appendix F – Auditor's Report on Non-Financial Information

Independent Practitioner's Reasonable Assurance Report

To the Directors of Call2Recycle Canada, Inc.

We have undertaken a reasonable assurance engagement of the accompanying Management Assertion in Appendix A related to the Call2Recycle Canada Inc. ("Call2Recycle" or the "Entity") Recycling Program Disclosures, comprised of the following disclosures within Call2Recycle's Annual Report to the Ministry of Environment & Parks in Appendix B (the "subject matter information") for the year ended December 31, 2024:

- The location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of BC Regulation 449/2004 (the "Recycling Regulation");
- The Entity's description of how recovered product was managed in accordance with the pollution prevention hierarchy in accordance with Section 8(2)(d) of the Recycling Regulation;
- The Entity's description of total amounts of product sold and collected and recovery rate in accordance with Section 8(2)(e) of the Recycling Regulation; and
- The Entity's description of performance for the year in relation to approved targets under Section 8(2)(b), (d) and (e) in accordance with Section 8(2)(g) of the Recycling Regulation.

Management's responsibility

Management is responsible for the preparation of the subject matter information in accordance with the evaluation criteria as listed in Appendix B (the "applicable criteria"). Management is also responsible for such internal control as management determines is necessary to enable the preparation of the subject matter information such that it is free from material misstatement, whether due to fraud or error.

Management is responsible for the selection of suitable evaluation criteria in accordance with the Recycling Regulation Guidance on Third Party Assurance for Non-Financial Information in Annual Reports 2024 Reporting Year, dated November 2024 ("assurance requirements"), pursuant to Section 8(2)(h) of the Recycling Regulation made under the Environmental Management Act of the Province of British Columbia.

Our responsibilities

Our responsibility is to express a reasonable assurance opinion on the subject matter information based on the evidence we have obtained. We conducted our reasonable assurance engagement in accordance with Canadian Standard on Assurance Engagements 3000 (CSAE 3000), *Attestation Engagements other than Audits or Reviews of Historical Financial Information*. This standard requires that we plan and perform this engagement to obtain reasonable assurance about whether the subject matter information is prepared, is free from material misstatement.

Reasonable assurance is a high level of assurance, but is not a guarantee that an engagement conducted in accordance with this standard will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the decisions of users of our report. The nature, timing and extent of procedures selected depends on our professional judgment, including an assessment of the risks of material misstatement, whether due to fraud or error, and involves obtaining evidence about the preparation of the subject matter information in accordance with the applicable criteria.

The main elements of our work were:

- Obtain an understanding of internal control over the preparation of the subject matter information to assist in risk assessment and the design of assurance procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control over the subject matter information

- Identify and assess the risks of material misstatement in the subject matter information
- Design and perform procedures responsive to those risks and obtain sufficient, appropriate evidence to support our opinion, including selecting samples of transactions for review of substantive support
- Evaluate the sufficiency and appropriateness of evidence obtained in the context of the engagement.

We believe the evidence we obtained is sufficient and appropriate to provide a basis for our opinion.

Our independence and quality management

We have complied with the relevant rules of professional conduct / code of ethics applicable to the practice of public accounting and related to assurance engagements, issued by various professional accounting bodies, which are founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior.

Our firm applies Canadian Standard on Quality Management (CSQM) 1, *Quality Management for Firms that Perform Audits and Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, which requires the firm to design, implement and operate a system of quality management, including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Significant inherent limitations

Due to the nature of non-financial information, there are inherent limitations to this information and it cannot be tested with the same level of precision and clarity as financial and quantitative information. Further, there are varying approaches in how non-financial reporting can be tested and audited, whereas for financial reporting, rigorous and standardized procedures have been established. As such, the relevance, completeness, reliability, neutrality, and understandability of the criteria selected are dependent on the reader's perception. As such, this report should be read keeping in mind the specific evaluation criteria that has been identified in Appendix B.

Opinion

In our opinion, the Management Assertion in Appendix A related to the Call2Recycle's Recycling Program Disclosures, comprised of the disclosures within Call2Recycle's Annual Report to the Ministry of Environment & Parks in Appendix B for the year ended December 31, 2024 is prepared, in all material respects, in accordance with the applicable criteria presented in Appendix B.

Specific purpose of applicable criteria

The subject matter information has been prepared in accordance with the applicable criteria referred to above. As a result, the subject matter information may not be suitable for another purpose.

BDO Canada LLP

Chartered Professional Accountants, Licensed Public Accountants

Toronto, Ontario
June 27, 2025

Appendix A

Management Assertion

We have prepared the Recycling Program Disclosures, comprised of the following disclosures within Call2Recycle Canada Inc's Annual Report to the Ministry of Environment and Parks ("subject matter information") for the year ended December 31, 2024:

- The location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of BC Regulation 449/2004 (the Recycling Regulation);
- The description of how the recovered product was managed in accordance with the pollution prevention hierarchy in accordance with Section 8(2)(d) of the Recycling Regulation;
- The description of the total amount of the producer's product sold and collected and, if applicable, the producer's recovery rate in accordance with Section 8(2)(e) of the Recycling Regulation; and,
- The description of the performance for the year in relation to approved targets under Section 8(2)(b), (d) and (e) in accordance with Section 8(2)(g) of the Recycling Regulation.

We confirm, to the best of our knowledge and belief, that:

- (a) The subject matter information was prepared in accordance with the Evaluation Criteria stated in Appendix B (the "applicable criteria").
- (b) we are responsible for implementing internal controls necessary to enable the preparation of the subject matter information such that it is free from material misstatement, whether due to fraud or error.
- (c) We are responsible for the selection of suitable evaluation criteria in accordance with the Recycling Regulation Guidance on Third Party Assurance for Non-Financial Information in Annual Reports 2024 Reporting Year, dated November 2024 ("Assurance Requirements"), pursuant to Section 8(2)(h) of the Recycling Regulation made under the Environmental Management Act of the Province of British Columbia.

Michael Partab, CFO
Call2Recycle Canada Inc.

Appendix B

Recycling Program Disclosures

Assessment of the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation

Specific Disclosures in the annual stewardship report for which evaluation criteria were developed	
Disclosure per Annual Report	Reference (Page No.)
2024 Active Collection Sites by Sector - 1,833 sites	Pages 14-15 - Collection System and Facilities
Increase in the number of sites in 2024 - total of 67 sites or 4% more than prior year.	Page 15 - Collection System and Facilities

Evaluation Criteria

The following evaluation criteria were applied to the assessment of the location of collection facilities and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation:

- The collection facility met the definition of an active collection facility in accordance with the Recycling Regulations, i.e., a site that has shipped at least one receipt within the calendar year, ordered a replacement collection box within the calendar year, or any site that has enrolled in the program during the calendar year regardless of receipt;
- The number of active collection facilities in the listing of active collection facilities agree to the number reported in the Annual Report; and
- The difference in the number of active collection facilities in the current year’s listing of active collection facilities and the prior year’s listing of active collection facilities agree to the change in the number of active collection facilities reported in the Annual Report.

Assessment of the description of how the recovered product was managed in accordance with the pollution prevention hierarchy under Section 8(2)(d) of the Recycling Regulation

Specific Disclosures in the annual stewardship report for which evaluation criteria were developed	
Disclosure per annual report	Reference (Page No.)
Acknowledgements of the Pollution Prevention Hierarchy	Pages 16-18
Product management process employed	Page 16
Processor Efficiency Rates by Battery Type and Processor	Page 20 - Recycling Efficiency Rates for 2024

Under Call2Recycle’s Extended Producer Responsibility (“EPR”) plan the Entity collects and recycles primary and rechargeable consumer batteries that are sold as stand-alone product or for replacement purposes. Call2Recycle accepts dry-cell batteries weighing less than five (5) kilograms each.

Evaluation Criteria

The following evaluation criteria were applied to the assessment of the description of how the recovered product was managed in accordance with the pollution prevention hierarchy under Section 8(2)(d) of the Recycling Regulation.

- The Pollution Prevention Hierarchy described in the Annual Report, and related processes, agree to the descriptions stated in the ERP Plan;
- Third party accreditors have certified that Call2Recycle are compliant with R2v3, ISO 9001, ISO 14001, ISO 45001 for the audit period; and
- Third party processors who received batteries collected in BC from Call2Recycle have provided their RERs for the audit period.

Assessment of the description of total amounts of the producer’s product sold and collected and, if applicable, the producer’s recovery rate in accordance with Section 8(2)(e) of the Recycling Regulation

Specific Disclosures in the annual stewardship report for which evaluation criteria were developed	
Disclosure per annual report	Reference (Page No.)
Processor Efficiency Rates by Battery Type and Processor	Page 20 - Recycling Efficiency Rates for 2024
Average weight of batteries sold in BC from 2021-2023 2,442,216KG, Primary batteries collected in 2024: 663,949KG, Rechargeable batteries collected in 2024: 392,356KG, Total batteries collected in 2024: 1,026,305KG.	Pages 6 and 20-23

Call2Recycle collected the environmental handling fee for recyclable and primary batteries from members. Members report their sales of recyclable and primary batteries sold in BC on a monthly basis using a portal.

Call2Recycle’s internal database maintains a list of product shipments from collection facilities, stratified by regional district, for the reporting year under review and includes the following information:

- a. The Collection Facility name/address.
- b. The date of collection from the facility.
- c. The consolidation site or processor to which the product was delivered.
- d. The date of delivery to the consolidation site or processor.
- e. The amount of product collected (in units and in weight, where applicable).

Evaluation Criteria

The following evaluation criteria were applied to the assessment of the description of total amounts of the producer’s product sold and collected and, if applicable, the producer’s recovery in accordance with Section 8(2)(e);

- The amount of product sold has been calculated using source data from independent sources;
- The source data for the amount of product sold is complete;
- The amount of product sold reconciles to the amounts published in the Annual Report;
- The environmental handling fees received for the amount of product sold reconciles to the Call2Recycle’s audited financial statements;
- Third party processors who received batteries collected in BC from Call2Recycle have provided their RERs for the audit period; and
- The batteries collected weights reported in the annual report are based on received and recorded sorted battery chemistries by weight at consolidation/sorting facilities and do not include packaging (boxes, pallets, drums, non-conforming items). Collection totals are stated in the annual report are supported by documentation such as shipping documentation and receipt reports.

Assessment of the description of performance for the year in relation to targets in the approved EPR Plan under Section 8(2)(b), (d) and (e) in accordance with Section 8(2)(g) of the Recycling Regulation

Specific Disclosures in the annual stewardship report for which evaluation criteria were developed			
Performance Measure	Plan Target	2024 Result	Reference
Recovery Rate	52%	42%	Page 24 - Plan Performance Table
Public collection sites	600	792	Page 15 - Collection System and Facilities Page 25 - Plan Performance Table
Recycling Efficiency Rate	Alkaline 75-95% Lithium 50-65% Ni-Cd 65-80% Ni-MH 70-85% Li-Ion 70-95% SSLA 70-95%	Alkaline 80-95% Lithium 0% Ni-Cd 72-73% Ni-MH 77-92% Li-Ion 72% SSLA 72%	Page 26 - Plan Performance Table

For the year ending December 31, 2024, Call2Recycle did not establish specific performance criteria in their EPR plan in relation to Sections 8(2)(d) of the Recycling Regulation.

Evaluation Criteria

The following evaluation criteria were applied to the assessment of the description of performance for the year in relation to targets in the approved EPR plan under Section 8(2)(b) and (e) in accordance with Section 8(2)(g) of the Recycling Regulation in the approved EPR plan.

- The list of targets in the ERPPlan agrees to the list of targets reported in the Annual Report;
- The targets are neutral and consistent with the targets approved in the stewardship plan;
- The performance of the targets is supported by evidence; and
- The performance of the targets is calculated accurately.

Appendix G – Audited Financial Statement

**Call2Recycle Canada, Inc.
Financial Statements
For the Year Ended December 31, 2024**

Independent Auditor's Report

**To the Members of
Call2Recycle Canada, Inc.**

Opinion

We have audited the financial statements of Call2Recycle Canada, Inc. (the "Entity"), which comprise the statement of financial position as at December 31, 2024, and the statements of changes in net assets, operations and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Entity as at December 31, 2024, and its results of operations and its cash flows for the year then ended in accordance with Canadian accounting standards for not-for-profit organizations.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Entity in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. The other information comprises the information included in the Annual Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in this auditor's report. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian accounting standards for not-for-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Entity's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Entity or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Entity's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Entity to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Call2Recycle Canada, Inc. Notes to Financial Statements

December 31, 2024

1. Significant Accounting Policies

Nature and Purpose of Operations

Call2Recycle Canada, Inc. (the "Entity") is a not-for-profit organization formed on January 1, 2017. The Entity's head office is registered in Toronto Ontario, and conducts its operations throughout all of Canada.

The Entity's purpose is to promote social welfare by addressing environmental concerns related to the recycling or proper disposal of consumer batteries. The Entity operates battery collection and recycling programs and educates the public with respect to the proper disposal and recycling of batteries, and related products.

The Entity seeks to be the leader in the environmentally sound collection, transportation and recycling of batteries and related products. The Entity is committed to a cleaner, healthier environment through public education on battery recycling. All aspects of the Entity's business are conducted in an environmentally sensitive manner, as the Entity is convinced that sound environmental product stewardship and sound business practices go hand in hand.

The Entity is exempt from income tax under Section 149(1) of the Income Tax Act (Canada).

Basis of Accounting

The financial statements have been prepared using Canadian accounting standards for not-for-profit organizations.

Revenue Recognition

The Entity follows the deferral method of accounting for revenues.

Unrestricted revenues are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured. Restricted revenues are recognized as revenue in the year in which the related expenses are incurred.

Steward fees are received from legally obligated stewards in regulated provinces (QC, ONT, BC, MB, PEI, SK and NS), and from non-legally obligated battery manufacturers in all other jurisdictions based on sales into those jurisdictions. The Entity recognizes these fees as revenue in the year that battery units are sold by the stewards to consumers and businesses.

The costs of the corresponding collection and recycling for some of these batteries may occur in future years, and those associated costs are reported as expenses of the Entity in the year that they are incurred. Call2Recycle Canada, Inc. is committed to the collection and recycling of these batteries.

Call2Recycle Canada, Inc. Notes to Financial Statements

December 31, 2024

1. Significant Accounting Policies (continued)

Revenue Recognition - Continued	<p>Unrestricted net investment income is recognized as revenue when earned.</p> <p>Unrestricted revenues from the sales of recycled materials are recognized in income when the recovered materials are sold and the amount to be recovered can be estimated and collection is reasonable assured.</p>
Financial Instruments	<p>Financial instruments are recorded at fair value at initial recognition.</p> <p>In subsequent periods, equities traded in an active market and derivatives are reported at fair value, with any change in fair value reported in income. All other financial instruments are reported at cost or amortized cost less impairment. Transaction costs on the acquisition, sale or issue of financial instruments are expensed for those items measured at fair value and charged to the financial instrument for those measured at amortized cost.</p> <p>Financial assets are tested for impairment when indicators of impairment exist. When a significant change in the expected timing or amount of the future cash flows of the financial asset is identified, the carrying amount of the financial asset is reduced and the amount of the write-down is recognized in net income. A previously recognized impairment loss may be reversed to the extent of the improvement, provided it is not greater than the amount that would have been reported at the date of the reversal had the impairment not been recognized previously, and the amount of the reversal is recognized in net income.</p>
Use of Estimates	<p>The preparation of the financial statements requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Items subject to such estimates and assumptions include:</p> <ul style="list-style-type: none"> - accrued expenses - allocation of expenses - allowance for doubtful accounts
Accounts Receivable	<p>Uncollectable amounts receivable are written off at the time the accounts are determined to be uncollectable. There is no allowance for doubtful accounts at December 31, 2024 as management of the Entity considers any possible bad debts to be negligible.</p>

Call2Recycle Canada, Inc.
Notes to Financial Statements

December 31, 2024

1. Significant Accounting Policies (continued)

Expenses Material management and processing costs are recorded when the collection and processing services (freight, handling, recycling of materials) has been provided. Other expenditures are recognized as incurred.

2. Cash

The Entity maintains the majority of its cash balance in a Canadian financial institution. The Canada Deposit Insurance Corporation (CDIC) insures this account up to \$100,000 for this financial institution. From time to time the aggregate funds held in this institution may exceed the CDIC insured limits and may not be covered by CDIC insurance. Management does not anticipate any material effect on the financial position of the Entity as a result of this concentration.

3. Marketable Securities

The carrying amounts of investments are comprised of the following:

	2024	2023
At fair value:		
Cash held for long-term investment	\$ 1,288,669	\$ 889,018
Bonds	15,215,224	17,451,919
Equity investments	5,188,026	8,528,393
Real estate funds	1,179,394	1,335,543
Hedge fund investments	1,233,290	920,999
Precious metals and commodity funds	110,759	125,087
	\$ 24,215,362	\$ 29,250,959

**Call2Recycle Canada, Inc.
Notes to Financial Statements**

December 31, 2024

4. Government Remittances

Included in accounts payable and accrued liabilities are government remittances payable of \$297,817 (2023 - \$147,899).

5. Board Designated Net Assets

The Entity's governing board has designated \$17,701,641 (2023 - \$22,963,177) as of December 31, 2024 for future use in the regulated provinces of Quebec, Ontario, British Columbia, Manitoba, Prince Edward Island, Saskatchewan and Nova Scotia. The designated balances by regulated province are as follows:

	<u>2024</u>	<u>2023</u>
Quebec	\$ 10,452,773	\$ 12,035,871
Ontario	(4,649,997)	(244,067)
British Columbia	8,148,982	8,175,136
Manitoba	2,388,077	2,388,515
Prince Edward Island	(170,352)	(181,468)
Saskatchewan	1,239,176	789,190
Nova Scotia	292,982	-
Total	<u>\$ 17,701,641</u>	<u>\$ 22,963,177</u>

6. Material Management and Processing

Material management and processing is comprised of the following:

	<u>2024</u>	<u>2023</u>
Material management and processing	\$ 28,587,793	\$ 23,735,105
Recycled materials income	(1,359,149)	(992,395)
	<u>\$ 27,228,644</u>	<u>\$ 22,742,710</u>

Call2Recycle Canada, Inc. Notes to Financial Statements

December 31, 2024

7. Allocation of Expenses

Expenses are charged directly to their respective jurisdiction based on actual costs as incurred. When expenses are not identified to a specific jurisdiction, but benefit all jurisdictions, they are allocated among the jurisdictions based on the Entity's allocation methodology. Collections and processing costs are allocated based on battery collections for each jurisdiction. Salary and benefits are allocated based on employee time allocation by jurisdiction. Other expenses, including professional fees, general marketing, communication and promotion, shared service costs, office supplies, and occupancy, which cannot be identified with a specific jurisdiction are allocated based on the total population at the end of the year in the jurisdiction.

8. Significant Contractual Arrangements

The Entity is governed by a Board of Directors that is separate and independent of its former parent entity, but continues to contract IT services (2023 included accounting and managerial services) from Call2Recycle, Inc. US. Fees paid for contracted services to Call2Recycle, Inc. US for 2024 were CDN \$1,004,074 (2023 - \$1,075,586). This fee is assessed to the Entity net of a US \$Nil (2023 - \$272,187) fee recovery collected by Call2Recycle, Inc. US for battery sale license fees collected from US battery companies who are selling into certain Canadian markets. Included in accounts payable and accrued liabilities is CDN \$Nil (2023 - \$199,742) in respect of these contracted services.

Call2Recycle Canada, Inc. Notes to Financial Statements

December 31, 2024

9. Financial Instruments

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Entity is exposed to credit risk resulting from the possibility that the registrants of the Entity defaults on their financial obligations; if there is a concentration of transactions carried out with the same counterparty; or of financial obligations which have similar economic characteristics such that they could be similarly affected by changes in economic conditions. The Entity's financial instruments that are exposed to concentrations of credit risk relate primarily to its accounts receivable. The Entity's registrants are numerous and diverse, which reduces the concentration of risk. Management closely evaluates the collectibility to mitigate this risk.

Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

The Entity is exposed to financial risk that arises from fluctuations in the sale of recyclable batteries and consumer electronic products. This risk is minimized by an expected corresponding decrease in program delivery and recycling process expenses and by the regulations established by the respective Department of the Environment in each jurisdiction in which the Entity operates.

The Entity is exposed to market risk through its investment in marketable securities, the value of which changes through fluctuations in market values. The investment policies of the Entity are designed to mitigate this risk through diversification of the portfolio.

Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Entity is exposed to currency risk as a result of its significant contractual arrangement for IT services (2023 - including accounting and managerial services) with a US organization and its stock portfolio holdings denominated in US currency.

**Call2Recycle Canada, Inc.
Notes to Financial Statements**

December 31, 2024

10. Commitments

The Entity has entered into various lease commitments for building rentals. Expected payments over the next five years are as follows:

	2025	2026	2027	2028	2029
Quebec	\$ 37,933	\$ 3,178	\$ -	\$ -	\$ -
British Columbia	20,526	-	-	-	-
Ontario	37,215	113,104	116,038	116,772	118,975
	<u>\$ 95,674</u>	<u>\$ 116,282</u>	<u>\$ 116,038</u>	<u>\$ 116,772</u>	<u>\$ 118,975</u>

11. Contingencies

During fiscal 2021, the Entity conducted reviews of various service providers in the Province of Ontario who collected recyclable materials on behalf of the Entity. As a result of the reviews, certain service providers had their contracts terminated for non-compliance with program requirements.

At the time of the terminations one service provider had previously submitted invoices to the Entity for materials collected in the amount of \$1.4 million which are included in accounts payable. Subsequent to the date of termination of the agreement, no further materials have been accepted from the service provider and no further payments have been made against the outstanding accounts payable balance.

Upon termination of the agreement the Entity has demanded a refund of prior amounts paid to the service provider based upon the observations made in its compliance reviews.

In addition to the \$1.4 million in accounts payable in dispute, the service provider has filed a claim for an additional \$10.5 million in costs plus damages. The Entity in turn has filed a claim for \$5.2 million in damages plus interest and costs.

Management is not able to estimate the likelihood of either any recovery or losses as the outcome of this matter and therefore no further provisions have been made in these financial statements. Any gains or losses will be recorded at the time they become known.

The Entity is subject to other possible legal claims of which the legitimacy or magnitude cannot be determined at this time. Subsequent to year end, a legal claim was filed against the Entity for \$15.0 million in damages. As management is not able to estimate the likelihood of any loss at this time, no provision for these claims have been made in these financial statements. Any loss will be recorded at the time they become known.
