Appendix 5 Third Party Independent Report for Non-Financial Information	27

1. EXECUTIVE SUMMARY

HPSA has continued to increase the quantity of products returned per capita from 0.0203 to 0.021kg, representing a 4% increase in collection, or 96,677 kg of post-consumer pharmaceuticals returned for disposal. The British Columbia Medications Return Program (BCMRP) continues to operate around 1,160 collection sites, representing a total of 94.4% of eligible BC pharmacies.

- **Information:** The public continued to receive information on proper medication disposal through a number of channels, including: easy-to-find links to pharmacies through the Recyclopedia app available on the Recycling Council of British Columbia's (RCBC) website, links to our program on the British Columbia Pharmacy Association's (BCPhA) website, and on the majority of Regional District and municipal websites, and through HPSA's website directory and integrated pharmacy search tool.
- **Promotion:** In January 2014, HPSA supported the efforts of the BC Pharmacy Association's Medications Return Campaign. The 2014 campaign focused on media relations while providing BCPhA members with links to access promotional materials available at no cost through our Association. Over 50 pharmacies requested materials in one week alone. News releases, issued jointly with eight participating regional districts, were targeted to local media in each region, and interviews and photo ops arranged with participating Pharmacy members. Because of the age range of the target audience, the campaign focused on traditional media – print, radio and TV. Social media outlets, such as regional districts' Twitter and Facebook sites, were also used to supplement news releases.

Our program continues to focus on unused and expired medications from households and continues to offer multiple solutions to reflect local/regional differences. Permanent collection programs provide ongoing, year-round drop-off services for consumers.

Once approved, this report will be available on our website at www.healthsteward.ca.

Products within plan	Prescription drugs, over-the-counter drugs and natural health products
Program website	www.healthsteward.ca

Recycling Regulation Reference	Topic	Summary Report
Part 2, section 8(2)(a)	Public Education Materials and Strategies	The public is kept informed about proper medication disposal through a number of channels, including: easy-to-find links to pharmacies through the Recyclopedia app and web search available on the Recycling Council of British Columbia's website, our own directory on HPSA's website and on the majority of Regional District or Municipalities' websites which link either directly to HPSA's website or to the RCBC Recyclopedia App(see Appendix 1).
Part 2, section 8(2)(b)	Collection System	<p>Section 5 (1) (c) (iii) of the regulation requires that a plan must adequately provide for reasonable and free consumer access to collection facilities. Since 1997, HPSA has established a comprehensive network of permanent collection sites under the BCMRP where the public can conveniently return health products for responsible disposal. This network consists of community pharmacies as well as some clinics, hospitals, community centers and other collections sites with a significant volume of consumer returns. HPSA produces an annual District Summary Report (Section 7, Table 1) that shows the number of registered collection locations per capita by district and demonstrates the high level of consumer access and program coverage in B.C.</p> <p>The provincial average is 3,984 people per HPSA registered collection location.</p> <p>See Section 7</p>
Part 2, section 8(2)(c)	Product Environmental Impact Reduction, Reusability and Recyclability	<i>n/a</i>

Recycling Regulation Reference	Topic	Summary Report
Part 2, section 8(2)(d)	<u>Pollution Prevention Hierarchy and Product / Component Management</u>	All products returned are disposed of through incineration.
Part 2, section 8(2)(e)	<u>Product Sold and Collected and Recovery Rate</u>	We increased the quantity of products returned per capita from 0.0203 to 0.0209 kg, representing an increase of 4% in collection or 96,677 kg returned for destruction.
Part 2, section 8(2)(e.1)		See Appendix 2 for breakdown per regional district
Part 2, section 8(2)(f)	<u>Summary of Deposits, Refunds, Revenues and Expenses</u>	<i>n/a</i>

In 2014, HPSA began to operate under its 2012-2018 Stewardship Plan while awaiting approval. HPSA set several new performance measures and targets and is reporting against those references.

Performance Targets	2014 Results	Remediation Strategies
<p>A. Consumer Awareness [section 5 (1) (c) (iv)] Surveys will take place at specific intervals as the BCMRP further matures and are a tool used to help measure program performance and usage.</p> <p>A consumer awareness survey was developed in 2007 and used in 2010 and in 2013.</p>	<p>There was no consumer awareness survey in 2014. The next planned survey is set to occur in 2016.</p>	<p>HPSA remains committed to the consumer awareness targets for 2018 which include a 25 % increase in public awareness and a 10% increase in usage of the BCMRP compared to the 2012 results.</p>
<p>B. Number of Collection Points [section 5 (1) (c) (iii)]</p> <p>a) Contact existing pharmacies with ownership and/or manager changes on a quarterly basis.</p> <p>b) Contact pharmacies demonstrating a significant change in collection pattern.</p> <p>c) Contact new licensed community pharmacies on a quarterly basis as identified from lists obtained from the B.C. College of Pharmacists.</p>	<ul style="list-style-type: none"> • Maintained participation rate above 94.4%. • Decreased the capita per location Provincially from 4045 residents per collection site in 2013 to 3983 residents per collection location in 2014. 	<p>HPSA continues to contact new community pharmacies on a quarterly basis to increase participation rates.</p>
<p>C. Product Recovery Target Maintain a minimum collected quantity of 85 tonnes on a three-year rolling average.</p>	<p>Achieved with 3 year rolling average of 92.4 tonnes.</p>	<p>HPSA revised plan to reach 95 tons on a three-year rolling average in year 7 of the Stewardship Plan.</p>

Performance Targets	2014 Results	Remediation Strategies
<p>D. Promotion</p> <p>a) Promotion of program in different media.</p> <p>b) Publicity on the webpages of 25 Regional Districts or municipalities.</p> <p>c) Track traffic to BC page and access to locations.</p> <p>d) Work with communication firm for the promotion and advertising plan.</p> <p>e) Connect with pharmacists and help disseminate information on the program through the Ambassador or similar initiatives.</p> <p>f) Work with chain and independent pharmacies to increase the availability of collection bags for the public.</p> <p>g) Hold a minimum of 12 special events.</p>	<p>a) Promotion of program through TV, Radio, Print, and Internet (see Section 3 for details).</p> <p>b) Publicity on the webpages of 27 Regional Districts (see Appendix 1).</p> <p>c) 7,051 pageviews of BC specific content on HPSA's website and pharmacy locator tool updated monthly with new and deleted collection sites.</p> <p>d) Worked with communication firms regarding development of advertising and promotional materials.</p> <p>e) 48 site visits through the Ambassador program and promotion through the BCPhA's magazine. Bi-annual newsletters to pharmacies with attached order forms for free promotional materials (see Appendix 3)</p> <p>f) Chains continued to make available bags for pharmacists to distribute to the public with medications return information.</p> <p>g) Promotion at 24 community events.</p>	<p>HPSA continues to work to expand the scope of advertising and promotional activities. HPSA committed to participation in the 2015 BC Recycles Ambassador Tour and further site visits.</p>
<p>E. Waste Composition Studies</p> <p>The BC Stewards Group established a partnership agreement for participating in scheduled waste audits performed in five regional districts.</p>	<ul style="list-style-type: none"> • HPSA participated in the Sunshine Coast Regional District (SCRD) waste composition study. • HPSA has committed to participate in the Metro Vancouver waste composition study in 2015. 	<p>The BC Stewards Group continues to work to refine the system for EPR stewards.</p>
<p>F. Accessibility Indicators</p> <p>HPSA developed a new matrix as requested see section 7, Table 1</p>	<ul style="list-style-type: none"> • Reported (See Section 7, Table 1) 	

2. PROGRAM OUTLINE

The Health Products Stewardship Association (HPSA), formerly known as the Post-Consumer Pharmaceutical Stewardship Association (PCPSA) is a not-for-profit industry stewardship organization that meets its obligations as outlined in the BC extra provincial Society Act, and files the required reports with the Corporate Property Registry Branch of the Ministry of Finance. HPSA has been registered with Industry Canada since 2000.

The HPSA has been appointed as the agency to meet producer's regulatory obligations as health products stewards. HPSA's role is to perform on behalf of each member certain duties required under the regulation. As of December 2014, HPSA's membership was established at 154 stewards. The Program is accountable to its members, the general public and the government of British Columbia through the Ministry of Environment. The Program performance is publically accountable through the annual report.

This program is designed to capture unused or expired medications from the residential sector. The Program includes both products clearly attributable to an existing steward, and orphan products (those that are no longer in production, the steward is no longer in business, or products purchased outside Canada).

- ✓ All prescriptions drugs
- ✓ Over-the-Counter Medications
- ✓ Natural Health Products

HPSA provides all collection containers and collateral materials, pays all shipping and responsible disposal costs, so there is ***no cost to the public or collection sites to participate***. Collection systems are designed with user convenience and flexibility in mind.

The collection sites for the *Medications Return Program* are community pharmacies. Pharmacy managers interested in participating must complete a registration form. Details on the program (How it Works) are provided to ensure that the manager and their staff are knowledgeable on the program and its operations. All participating community pharmacies receive a guide containing instructions with information on the program for the public and containers.

3. PUBLIC EDUCATION MATERIALS AND STRATEGIES

HPSA's promotional and educational strategies are designed to ensure B.C. citizens know where and how to dispose of unused or expired medications.

A) Publicity

The Program has posters, brochures, flyers, bookmarks, etc. that can quickly be supplied to participating pharmacies, special events or other associates including Regional District Service offices and municipalities. The brochures provide clear directions on what is accepted and not accepted in the BCMRP, how to return the unused or expired health products and where returns are accepted in an easy to understand manner. HPSA offers its support to health awareness events and health trade shows that advertise responsible disposal of unused or expired health products.

B) Printed Materials

Take-Aways: Brochures and point of purchase signage are distributed to pharmacies and other locations such as clinics and doctor's offices through a reorder system by fax or email, free of charge. Brochures are presently available in English, while bookmarks are available in four languages (English, French, Punjabi and Chinese). More than 25,000 bookmarks and brochures destined for the public were ordered by pharmacies in 2014.

Municipal Garbage and Recycling Calendars: HPSA continues to promote the B.C. Medications Return Program in the recycling calendars published by Regional Districts and municipalities informing residents about municipal services.

Mail Outs: HPSA continues to provide promotional material to Regional Districts and municipalities or other groups/organizations interested in promoting the program.

News Bulletins: These are currently available on a quarterly basis to HPSA members. HPSA also provides a bi-annual e-bulletin for the community pharmacy managers.

Local Newspapers: HPSA has contributed to articles in community newspapers promoting the B.C. Medications Return Program. Other advertising and story initiatives take place during the Pharmacist Awareness Week, the Medications Return Campaign operated by the British Columbia Pharmacy Association and other health related events throughout the year.

C) Other Resources

Web Site: The HPSA website (www.healthsteward.ca) provides the public with information on the program and locations of collection sites for the disposal of health products. The site also provides a searchable database of participating pharmacies and details on products accepted by the program.

As HPSA continues to build the membership base, it can utilize the members' own promotional network to advertise the B.C. Medications Return Program. These initiatives are reported annually.

Consumer Information: Information on the safe use, storage and disposal of medications is provided to the consumer at the time of purchase and was published in various magazines such as the Seniors Information Directory and the Seniors Living Magazine.

Cross Promotion: Information was provided to numerous academic and other resources during the Medications Return Campaign:

1. British Columbia Drug and Poison Information Centre
<http://dpic.org/content/bc-medications-return-program-2014>
2. UBC Pharmacist Clinic
<http://clinic.pharmacy.ubc.ca/medication-returns/>
3. UBC Faculty of Pharmaceutical Sciences Facebook page
<https://www.facebook.com/ubcpharmacy>
4. AmWay Healthline
<http://www.amwayhealthline.com/category/modern-medicine/medications>
5. Century House Association (New Westminster)
<http://www.centuryhouseassociation.com/?p=3530>
6. Canadian Pharmacists Association
<http://www.pharmacists.ca/index.cfm/news-events/cpha-blog/pharmacists-need-to-promote-medication-and-sharps-return-programs/>

Regional District Advertising: Links to either HPSA's homepage and pharmacy locator tool or the HPSA sponsored Recyclepedia App appeared on the websites of 27 Regional Districts. HPSA's ad also ran in 9 recycling/collection calendars in 2014. See appendix 1 for full details.

National Prescription Drug Drop-Off Day: HPSA supported the collective efforts of police detachments across the country for the second annual National Prescription Drug Drop Off Day. Collection containers and promotional materials were supplied to every detachment that made requests including the Vancouver Police Department who collected 68.5kg of unused and expired medications into HPSA containers for responsible disposal.

The Canadian Association of Chiefs of Police released a 2 minute video (<https://www.youtube.com/watch?v=aQWZtlc59L4>) detailing the dangers of keeping unused and expired medication around the home, or of flushing these medications down the toilet. The video featured a Medications Return Program collection container and urged viewers to drop off medications on national prescription drug drop off day, or return them to their nearest pharmacy.

Numerous stakeholders, media, police detachments, associations and HPSA members joined together to promote the responsible disposal of medications. This resulted in 143 individual tweets from organizations and individuals such as the Partnership for a Drug Free Canada, the Canadian Broadcasting Corporation, Federal Minister for Health the Honourable Rona Ambrose (PC), resulting in hundreds of retweets across numerous demographics.

Canadian Association of Chiefs of Police (CACP) President Chief Constable Jim Chu discusses National Prescription Drug Drop-Off Day

Pharmacy Participation:

LONDON DRUGS

London Drugs’ website has a static link on all webpages for Medication Disposal (<http://www.londondrugs.com/Medication-Disposal/Medication-Disposal,default,pg.html>). Customers are reminded of the importance of properly disposing of their unused and expired medications through the Medications Return Program.

PHARMASAVE

Pharmasave stores participate in the HPSA programs and have the following program information on their website. (http://www.pharmasave.com/default/0/healthfeatures_details.aspx?selectedhfid=48&selectedartid=48)

REXALL

During the months of March and April each year, Rexall promotes a medicine cabinet clean out with their customers by providing them with a disposal bag for unused and expired medications (see below) and a checklist designed to help consumers keep only useful medications in their home. The Rexall web site (www.rexall.ca/medicinecabinet) contains information for consumers on how to ensure they only have safe and effective medications in the medicine cabinet. Rexall stores are registered as collection locations in the HPSA programs.

Medicine Cabinet Cleanup
Helpful tips and advice on how to manage your Medicine Cabinet

Manage Your Medicine Cabinet
In a busy household, especially with children, it's very important to give your medicine cabinet regular checkups. Here are some simple steps to manage your medicine cabinet and ensure that you have safe, effective and up-to-date products.

SHOPPERS DRUG MART

In the corporate environmental responsibility page of the Shoppers Drug Mart (SDM) web site they promote that their customers are provided with a safe disposal option for their expired medications at all their stores. (<http://corporate.shoppersdrugmart.ca/en-ca/social-responsibility/environment-responsibility.aspx>)

In the provincial services section, British Columbians are reminded that they can safely dispose of their medications, syringes, pens, needles and lancets (<http://www1.shoppersdrugmart.ca/en/health-and-pharmacy/pharmacy-services/details?province=bc&service>)

— **Medication Disposal**

We can safely dispose of your medications, syringes, pen needles and lancets.
[Top of the Page](#)

In May of 2014, SDM partnered with the Partnership for a Drug Free Canada to launch a three month national campaign to clean out Canada's households of unused and expired prescription drugs as well as OTC medications. The campaign featured print and television advertising (video: <https://www.youtube.com/watch?v=sMwGROQur0k>).

I Don't Flush: HPSA supported and participated in promoting the 'I Don't Flush' campaign. The campaign was in partnership with the Clean Water Foundation.

Public Service Announcements were aired nationally on Shaw Communications channels over 2,000 times. Corus Radio played an audio version on selected radio stations. Initial estimates at the time of preparation of this report from the Clean Water Foundation are 'about 27 million media impressions for the pharma campaign' (source: <https://twitter.com/IDontFlushNews/status/563210348426428416>).

Television and radio advertisements can be found by visiting www.idontflush.ca.

8. North Okanagan
9. Squamish Lillooet
10. Township of Spallumcheen

E) Sponsorship

RCBC Toll-Free and Recyclopeda HPSA has contracted with the Recycling Council of British Columbia’s “recycling hotline” service and financed the on-line recycling information database called Recyclopeda.

The 2014 BC Medications Return Campaign (January) The Strategy for 2014 was a focus on media relations while providing British Columbia Pharmacy Association (BCPhA) members with links to access promotional materials available at no cost through HPSA.

News releases, issued jointly with participating regional districts, were targeted to local media in each region, and interviews and photo ops arranged with participating Pharmacy members.

To benefit Pharmacy members, a strategy of the campaign was promoting proper return practices – e.g., returning medications in a ziplock bag, blacking out any patient identification, not including pill bottles, etc. – in all key messages and news releases.

Because of the age range of the target audience, the campaign focused on traditional media – print, radio, and TV. Social media outlets, such as regional districts’ Twitter and Facebook sites, were also used to supplement the news releases.

BCPhA members were encouraged to order free HPSA promotional materials in December, promoted through the BCPhA website spotlight, Issue Update and Practice Updates.

Urban Mining

HPSA and the Medications Return Program were key sponsors for the Urban Mining project by the Artist Response Team which included a handbook and song for school aged children. The project helps students and teachers make the links between recycling and being good ocean stewards. It is loaded full of science articles paired with comic strips which help illuminate the content, questions, activities and actions that students can take the lead on.

Almost everyone has had to take medicine at some point. The doctor writes out a prescription and we get it filled at the drug store. But sometimes not all the medication gets used, and it sits in the cupboard and becomes expired. What should you do with old medicines?

If medications get old or you don't need them, return them to your pharmacy. This is the best option. You can call your local drugstore to confirm their participation in the Medications Return Program, or use this link to find one in your area: www.healthsteward.ca

Don't put old medicine in the trash, where children, pets or urban wildlife can find them. Your trash will eventually make it to a local landfill where your medications still have the potential to leach out.

Medicines should never be flushed down the toilet or poured down the sink, that will take the drugs into the local sewage system. Modern water treatment plants are not fully designed to deal with medication disposal. Drugs can leach into the water table, eventually coming out somewhere, like a lake or stream, putting pets, livestock or wildlife at risk.

Threespine Stickleback are small endangered fish that live along the coast of BC in many creeks and ponds. Keeping medicines out of the sewage system minimizes the amount of pollution in the water where these little fish live.

DON'T WORRY KIDS... I'M TOO COOL TO BE A GARBAGE BEAR, BUT PEOPLE SHOULD NOT BE THROWING PILLS INTO THE TRASH!

Children be safe!
If you see pills anywhere, in your house, on the ground or in the garbage, do not touch them. Tell an adult so the medications can be properly stored or disposed of.

Ambassador Program

The ninth annual Summer Ambassador Program began in May 2014 spreading the recycling message to over 120 communities throughout British Columbia. Two teams canvassed the province of British Columbia to help spread the messages and awareness of relevant take-back programs at community events and gathered stewardship-specific feedback from government representatives.

Ambassadors visited **48** HPSA facilities. Many of the pharmacies stated that public awareness about the Medications Return program has been improving recently and rated the program very well.

The Ambassadors met with 17 district government officials to discuss HPSA and the Medications Return Program.

Ambassadors prepare to hand out bags at a public event for consumers to collect and return their unused and expired medications to pharmacy.

HPSA's stand up banners and promotional materials traveled around to 24 events throughout the province.

4. COLLECTION SYSTEM AND FACILITIES

Since 2000, HPSA has increased the number of registered pharmacies from 575 to 1,160 representing 94.4% of licensed community pharmacies in the province. HPSA’s collection location network consists of community pharmacies as well as some clinics, hospitals, community centers and other collections sites with a significant volume of consumer returns. HPSA provides promotional items (posters, brochures, flyers, etc.) for display and has a news bulletin circulated annually in the spring and fall (see Appendix 3). There is no charge to the consumer to return products. Community pharmacies currently participating in the program can be located by the public on the HPSA website at www.healthsteward.ca, or by accessing the Recycling Council of British Columbia’s Recyclopedia app at www.rcbc.bc.ca. In addition:

- Pharmacies are a natural, logical and safe site for the public to return health products.
- Pharmacies offer easy access to those with special needs and varying degrees of personal mobility.
- Pharmacists are very knowledgeable about the dispensing of health products and provide advice on individual medical conditions and the proper use of health products.
- Many pharmacies are open during extended hours, offering a convenient place for consumer disposal year-round.
- The provincial average is 3,984 people per HPSA registered collection location.

The following lists provide an example of materials that would be acceptable. Note that this list is not exhaustive.

5. PRODUCT ENVIRONMENTAL IMPACT REDUCTION, REUSABILITY AND RECYCLABILITY

The Canadian Council of Ministers of the Environment in their Extended Producer Responsibility Product Evaluation Tool proposed several criteria to measure the impact of pharmaceutical waste on human and environmental health.

The bulk of human pharmaceuticals found in waterways most likely got there by way of sewage. It is questioned whether take-backs have any real environmental and safety benefit. Taking unused pharmaceuticals out of landfills might have only a small difference in the concentrations found in water. But take-back programs may help prevent leftover pharmaceuticals from being misused, diverted or illicitly used.

MRP MEDICATIONS RETURN PROGRAM

YES	NO
<ul style="list-style-type: none"> ✓ All prescription drugs ✓ OTC Medications (pills/liquids) ✓ Natural Health Products in oral dosage form ✓ Anti-fungal creams ✓ Anti-bacterial creams ✓ Inhalers ✓ Patches 	<ul style="list-style-type: none"> Sharps, syringes or needles Shampoos Mouthwash Antiperspirants Antiseptics Pharmaceuticals from farms/ hospitals Pharmacy waste produced by the pharmacy Expired samples from doctor's office

Loose pills, blister packs, etc
No free liquids

6. POLLUTION PREVENTION HIERARCHY AND PRODUCT / COMPONENT MANAGEMENT

The pollution prevention hierarchy requirements outlined in the *Recycling Regulation* to reduce the environmental impact are not feasible for pharmaceutical products; consequently, HPSA disposes of the waste at government-approved facilities through incineration.

7. PRODUCT SOLD AND COLLECTED AND RECOVERY RATE

Section 5 (1) (c) (iii) of the British Columbia Recycling Regulation requires that a plan must adequately provide for reasonable and free consumer access to collection facilities. HPSA produces an annual District Summary Report that shows the number of registered collection locations per capita by district and demonstrates the high level of consumer access and program coverage in B.C. A list of participating pharmacies can be found in Appendix 4.

Medications may have a long delay between the time of purchase and return and prescriptions drugs should be fully consumed unless otherwise directed by a health professional. The *Medications Return Program* collects medications; not the bottle or vial used to market the product or used to dispense the prescription. We recommend that containers be recycled by pharmacists or the consumer.

HPSA increased the quantity of products returned per capita from 0.0203 kg to 0.0209 kg representing a 4% increase in collection or 96,677 kg returned for disposal (Appendix 2). The highest rate of return was Central Kootenay at .0321 kg followed by Capital at .0313 kg; the lowest rate was Skeena-Queen Charlotte at .0118 kg.

Appendix 2 shows the absolute collection of medication in kilograms (mass recovered) by regional districts.

Section 7, Table 1 2014 Collection Location per Capita by Regional Districts

District	Collected (Kgs)	Population	Area (km ²)	Population Density	Collection Locations (#)	Capita per Location
Alberni-Clayoquot	495.51	30876	6,588	4.69	12	2573

n/a

9. THIRD PARTY ASSURANCE REQUIREMENTS FOR NON-FINANCIAL INFORMATION

HPSA has the following elements of third-party assurance requirements for non-financial audits (See Appendix 5):

- The number and location of collection facilities;
- Total amount of product sold and collected; and
- Management of product collected in accordance with the pollution prevention hierarchy.

HPSA prepares annual audited statement for all three of these core elements that verify the mass balance of materials in aggregate as they flow in through the “chain of custody” as follows:

- A community pharmacy registered in the HPSA program is typically scheduled on a service frequency based upon their historical waste generation. The pharmacy may also initiate a request for pickup to HPSA or its service provider.
- A truck is dispatched to the pharmacy to pick up the HPSA pail(s) of medications.
- At the pharmacy the driver affixes a bar code label to each HPSA collection container and uses a handheld device to scan that barcode.
- The driver leaves the desired amount of replacement container(s) with a receipt from the Driver’s handheld device documenting the number of waste containers collected and the supply of new collection containers.
- The driver estimates the weight of the medications pail(s) and records it on a bill of lading/manifest document.
- Medications pails are delivered to an approved transfer and processing facility where each container’s bar code is scanned to validate receipt and ensure the number of containers collected at each pharmacy is equal to the number of containers received at the facility.
- HPSA medications pails collected from other sites are consolidated and weighed, manifested and shipped to an HPSA approved disposal facility.
- At the disposal facility, the medications are weighed to verify the received weight, incinerated and a Certificate of Destruction is provided to HPSA.

No

- Sharps, syringes or needles
- Shampoos
- Mouthwash
- Antiperspirants
- Antiseptics
- Pharmaceuticals from farms / hospitals
- Pharmacy waste produced by the pharmacy
- Expired samples from doctor's offices

Don't Forget

Extra packaging for dry medications such as paper and cardboard, vials or bottles should be removed.

These items can be recycled!

PROMOTING POSITIVE PROGRAM

DIALOGUE WITH CUSTOMERS

Creating a positive dialogue when it comes to the British Columbia Medications Return Program (BCMRP) can be beneficial to both your business, your customers, and your community.

As a Pharmacist/Pharmacy Assistant, you are well aware of the dangers posed by the storage and potential use or abuse of unused or expired medications in the home. By educating your customers you can greatly reduce the risk to their families and foster a trusting relationship.

Encourage customers to check for and replace any expired medications and natural health products and remind them that these can be returned to the pharmacy free of charge. This ensures that your customer's family is kept safe and can create new business for your pharmacy.

Promotional materials for the BCMRP are available free of charge to aid in educating your customers.

Visit healthsteward.ca/collection/british-columbia for the promotional materials order form.

AMBASSADOR UPDATE

The BC Ambassadors visited a number of participating pharmacies this summer to gain insight on the perception of the British Columbia Medications Return Program (BCMRP) at the pharmacy level. Overall, feedback was very positive! The most common comments encountered by our ambassadors included confusion over what can be placed into the waste containers, as well as a need for more public education with regards to the program.

We have provided a helpful graphic on the left side of this newsletter to aid Pharmacists and pharmacy employees in determining what is considered acceptable waste for inclusion in the BCMRP containers.

The ambassadors also aided in public promotion of the BCMRP this summer with contributions to radio, newspapers, blogs, and booths set up at various outdoor festivals and events.

Appendix 5 Third Party Independent Report for Non-Financial Information

INDEPENDENT AUDITOR'S REPORT TO Health Products Stewardship Association

We have audited the following Sections within Health Products Stewardship Association's (the "Stewardship Agency") Annual Report for the year ended December 31, 2014 (together the "Subject Matter"):

- Section #1 *collection facilities;*
- Section #2 *Product sold and collected*

The objective of this Report is to disclose how the Stewardship Agency's management has discharged its responsibility to report on the Subject Matter in accordance with Sections 8(2)(b), (d) and (e) of the Recycling Regulation.

The Subject Matter is the responsibility of the Stewardship Agency's management who has prepared the Subject Matter in accordance with the evaluation criteria which are an integral part of the Subject Matter. Our responsibility is to express an opinion on this Subject Matter based on our audit. Our audit does not constitute a legal determination on the Stewardship Agency's compliance with the Recycling Regulation.

EVALUATION CRITERIA

The suitability of the evaluation criteria is the responsibility of management. The evaluation criteria presented in Attachment 1 are an integral part of the Subject Matter and address the relevance, completeness, reliability, neutrality and understandability of the Subject Matter.

SCOPE OF THE AUDIT

We carried out our audit in accordance with the International Standard on Assurance Engagements 3000 (ISAE 3000) published by the International Federation of Accountants. This Standard requires, amongst others, that the assurance team possesses the specific knowledge, skills and professional competencies needed to understand and audit the information included within the Subject Matter, and that they comply with specific requirements to ensure their independence.

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the Subject Matter. An audit also includes assessing the evaluation criteria used and significant estimates made by management, as well as evaluation overall presentation of the Subject Matter. The main elements of our work are presented in Attachment 1.

OPINION

In our opinion, the Subject Matter within the Stewardship Agency's Annual Report for Report for the year ended December 31, 2014 presents fairly in accordance with the evaluation criteria, in all material respects:

- the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation;
- the description of how total amounts of the producer's product sold and collected has been calculated in accordance with Section 8(2)(e).

Our report has been prepared solely for the purposes of management's stewardship under the Recycling Regulation and is not intended to be and should not be used for any other purpose. Our duties in relation to this report are owed solely to the Corporation, and accordingly, we do not accept any responsibility for loss occasioned to any other party acting or refraining from acting based on this report.

the Auditor's
Report Evaluation**

Evaluation Criteria

Assessment of the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation

Specific Disclosures in the annual stewardship report for which evaluation criteria were developed	
Disclosure per annual report	Reference (Page # / Table #)
1160 collection facilities for year ending December 31, 2014	Page 1, 14, Table 1
96,677 kg was returned for disposal	Page 1, 3, 15, Table 1, Appendix 2
Collection locations	Appendix 4

Criteria

The following evaluation criteria were applied to the assessment of the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation

1. We obtained a list of all of the Collection Facilities from the Association as at December 31, 2014.
2. The listing stated 1160 facilities, matching the number in the 2014 annual report.

Attachment 1 to the Auditor's Report Evaluation Criteria (ctd).

3. We randomly selected 30 Collection Facilities in accordance with the Sample Size General Guidance suggested. Registration forms were not available for most of the locations. This is because as of January 1, 2012 the Association began using a new company to manage the program. Any forms would be with the old company, and could not be retrieved. Management indicated that starting in 2012, there were registration forms filled out and retained for new registrants. They will not go back and get old registrants to sign a new form. Newer locations tested did have forms. We called each facility and verified the existence by confirming the address of the facility. We asked each facility to acknowledge the existence of the Medication Returns Program pails at the location. Two out of the thirty sites only accepted returns from their own patients. One did not accept any returns. Twenty-seven were aware of the program, and accepted returns. .
4. To test the completeness of the listing, we selected 30 Collection Facilities in accordance with the Sample Size General Guidance suggested. We traced these from the clients listing to Appendix 4 in the annual report. There were no exceptions, all locations appeared in Appendix 4.
5. We obtained the historical data for the total number of Collection Facilities for the past 3 years as reported by the Association in the annual reports: (2014 – 1160; 2013 – 1132; 2012 – 1095). The fluctuation over the 3 year period is 6%, and is because of a general increase in the number of sites.

The following evaluation criteria were applied to the assessment of the description of how total amounts of the producer's product sold and collected and, if applicable, the producer's recovery rate has been calculated in accordance with Section 8(2)(e); and,

1. All of the product is collected by one company, Stericycle.
2. We obtained their monthly invoices, which contain a breakdown of the total product collected by weight. The report is broken down by dates and locations
3. All of the product is sent for incineration. Nothing is recovered or sold.
4. We obtained the quarterly Certificates of Destruction provided by Stericycle. We agreed this to the monthly invoices, and investigated and variances.
5. We totaled the Certificates of Destruction for the year, and agreed this to the total in the annual report (96,676.93 kgs).
