1. Executive Summary

Products within plan	Tires
Program website	www.tsbc.ca

Recycling Regulation Reference	Topic	TSBC – 2023 Summary Report
Part 2, section 8(2)(a)	Public Education Materials and Strategies	<ul style="list-style-type: none"> • TSBC continued its educational campaign in 2023 and was pleased to bring back the Ambassador Team to attend community events. In addition, TSBC ran scrap tire collection events throughout the province. With the creativity of TSBC’s team, the awareness campaign included messaging through channels such as: <ul style="list-style-type: none"> • TV (new in 2023) and bus ads in key markets identified by either population or need; • Advertorials in key markets; • A strong online presence that included social and digital media; • Numerous blog posts on the TSBC web site; and • The annual Community Grant Program to incent the use of BC rubber in qualified projects across the province (10 in 2023).
Part 2, section 8(2)(b)	Collection System and Facilities	<ul style="list-style-type: none"> • As in previous years, TSBC offered options to the public beyond acceptance of their replaced tires through BC retailers when they purchased new ones. Tires not left with the retailer at that time, known as “orphan” tires, were also captured through: <ul style="list-style-type: none"> • The Return to Retailer (R2R) Program, whereby retailers currently accept up to 4 tires from each member of the public; and • 14 Scrap Tire Collection Events that were held throughout BC in 2023. • Scrap tires were also collected by haulers for the program from other registered sites that either generate or have tires available for collection, such as landfills, auto wreckers, small auto body shops and garages.
Part 2, section 8(2)(c)	Product Environmental Impact Reduction, Reusability and Recyclability	<ul style="list-style-type: none"> • Reduction initiatives focused on educating the public on extending the life of tires to keep them out of the waste stream as long as possible. • Reusability of tires continued to be realized through retreading and “culling” of good used tires for re-use. • Recyclability enhancements remained challenging given the durable structure of a tire, designed to ensure safety and a long road life.

Recycling Regulation Reference	Topic	TSBC – 2023 Summary Report
Part 2, section 8(2)(d)	Pollution Prevention Hierarchy and Product / Component Management	<ul style="list-style-type: none"> • TSBC has always incented the 3R (recycling) options over 4R (energy recovery) options through the financial incentive rates offered for each. • In 2023, 87% of the total tonnes of rubber processed were recycled.
Part 2, section 8(2)(e) Part 2, section 8(2)(e.1)	Recovery Rate and Product Sold and Collected	<ul style="list-style-type: none"> • The 2023 “Recovery Rate” was 97% across all regulated tire types. See the Non-Financial Information Audit Report in Appendix B. • See the breakdown of Collection Volumes by Tire Type by Regional District in Appendix C.
Part 2, section 8(2)(f)	Summary of Deposits, Refunds, Revenues and Expenses	<ul style="list-style-type: none"> • TSBC’s Independently Audited Financial Statements are referenced in Section 8 and included as Appendix A to this report.

Plan Performance – 2023

As TSBC’s Extended Producer Responsibility Plan for the period September 20, 2021 to September 19, 2026 has not yet been approved by the Ministry, the targets referenced below are from the prior Plan.

Performance Measures (as agreed with the Ministry)		Annual Targets			Performance																																			
1.	Recovery Rate (Total # Units Collected in reporting year / Total # Units Sold 5 years prior to reporting year)	90%			97%																																			
2.	The percentage allocation of total tonnes of scrap tires (i.e. all rubber, steel and fibre) <u>processed and shipped</u> Note: on average, rubber accounts for 70% of the total tire weight, with 15% steel and 15% fibre	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th></th> <th style="background-color: #1a3d4d; color: white;">Recycling</th> <th style="background-color: #1a3d4d; color: white;">Energy Recovery</th> <th style="background-color: #1a3d4d; color: white;">Landfill</th> </tr> </thead> <tbody> <tr> <td>Rubber</td> <td style="text-align: center;">88%</td> <td style="text-align: center;">11%</td> <td style="text-align: center;">1%</td> </tr> <tr> <td>Steel</td> <td style="text-align: center;">100%</td> <td></td> <td></td> </tr> <tr> <td>Fibre</td> <td></td> <td style="text-align: center;">98%</td> <td style="text-align: center;">2%</td> </tr> </tbody> </table>				Recycling	Energy Recovery	Landfill	Rubber	88%	11%	1%	Steel	100%			Fibre		98%	2%	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th></th> <th style="background-color: #1a3d4d; color: white;">Recycling</th> <th style="background-color: #1a3d4d; color: white;">Energy Recovery</th> <th style="background-color: #1a3d4d; color: white;">Landfill</th> </tr> </thead> <tbody> <tr> <td>Rubber</td> <td style="text-align: center;">87%</td> <td style="text-align: center;">11%</td> <td style="text-align: center;">2%</td> </tr> <tr> <td>Steel</td> <td style="text-align: center;">100%</td> <td></td> <td></td> </tr> <tr> <td>Fibre</td> <td></td> <td style="text-align: center;">100%</td> <td></td> </tr> </tbody> </table>					Recycling	Energy Recovery	Landfill	Rubber	87%	11%	2%	Steel	100%			Fibre		100%	
	Recycling	Energy Recovery	Landfill																																					
Rubber	88%	11%	1%																																					
Steel	100%																																							
Fibre		98%	2%																																					
	Recycling	Energy Recovery	Landfill																																					
Rubber	87%	11%	2%																																					
Steel	100%																																							
Fibre		100%																																						

Performance Measures (as agreed with the Ministry)		Annual Targets	Performance
3.	Number of collection sites (i.e. registered retailers that will take back a scrap tire from the consumer at the time a new tire is sold)	1,850	2,077
4.	a) Total number of retailers and generators in BC that take back orphan tires (R2R) b) Number of R2Rs in each Regional District	a) 800 province-wide b) At least 25% of registered retailers in each Regional District are R2R locations	a) 783* b) Achieved
5.	Education and Awareness a) Awareness of where to take scrap tires for safe disposal b) Awareness of where to go to find information on safe disposal locations	a) 61% b) 77%	a) 50%** b) 64%**

* See [Section 4 / Collection System and Facilities](#) for further discussion on these results.

** See [Section 3 / Consumer Education and Awareness](#) for further discussion on these results.

2. Program Outline

TIRE STEWARDSHIP BC ASSOCIATION (TSBC) is a not-for-profit society responsible for operating BC's scrap tire recycling program in accordance with its Ministry of Environment & Climate Change Strategy approved [Extended Producer Responsibility Plan](#) and the [BC Recycling Regulation](#).

The society is governed by a Board of [seven directors](#) representing the following member organizations:

- Retail Council of Canada;
- Western Canada Tire Dealers Association;
- Tire and Rubber Association of Canada; and
- New Car Dealers Association of BC.

TSBC is accountable to its stakeholders and the public for the collection, processing and environmentally sound disposal of all scrap tires designated under the BC Recycling Regulation.

TSBC collects an eco-fee on the sale of every new tire from TSBC registered retailers (producers) including online sales as well as tires on vehicles imported from the United States. The eco-fee rates are set by TSBC and vary based on tire size and category. 100% of the fees collected are applied to the operation of the program including transportation and processing of the tires, program administration, communication and education, community grants, and a reserve fund. In 2023, of the \$25M collected in eco-fees, \$27M was paid out in Transportation, Processing and Manufacturing Incentives, representing 92% of all expenses, and \$250,000 was awarded in grants for 10 projects in communities throughout BC. TSBC experienced another deficit year in 2023 and to rectify this, the eco fee on Passenger & Light Truck Tires was increased, effective January 01, 2024, to reflect the rising costs in every line item of the business.

TSBC operates a retail-based collection system. Most consumers leave their scrap tires at the retailer location when purchasing new tires. These tires are collected on a regular basis by haulers that transport the tires to three processing sites in BC, two in Delta and one on Vancouver Island. Some motorists choose to take their scrap tires home for disposal at a later date. TSBC refers to these tires as "orphan" tires and offers the consumer two free disposal options: drop off at collection events throughout the year and/or at Return to Retailer (R2R) locations throughout BC that accept up to 4 car tires, clean and off-rim, from the public. TSBC publishes the [collection events](#) and [R2R locations](#) on its website. The R2R location information is also available through the Recycling Council of BC's [Recyclepedia](#) (web and mobile app)

After tires are collected, the majority are recycled into products by [Liberty Tire Recycling](#) located in Delta with the remainder used for energy recovery. The products created are coloured landscaping mulch and crumb rubber. The crumb rubber is processed into new products such as playground surfaces, tiles, arena flooring and agricultural mats. With the Manufacturing Incentive Program and landscaping mulch product, TSBC is pleased to report that the volume of finished products made from BC rubber [in BC](#) continues to

grow, expanding six-fold since 2009 with further growth anticipated as the recycled rubber manufacturer, [North West Rubber](#), expands its operation in Abbotsford.

All scrap tires collected are recycled right here in BC due in part to the success and growth of the Delta recycler, Liberty Tire Recycling, and the Abbotsford manufacturer, North West Rubber. Both companies have made significant investments in recent years to grow their capability, capacity and product lines and they continue to do so, strengthening their position in a competitive marketplace. Of the volume recycled, 56% is made into product in BC with the rest shipped to markets in North America. TSBC seeks to work with the recycler and the manufacturing sector to increase that percentage by encouraging the growth of the BC recycled rubber product sector by way of the Manufacturing Incentive Program.

3. Public Education Materials and Strategies

TSBC continues to focus its stakeholder outreach on a broad education and communication campaign, raising consumer awareness on “what happens to the money” and “what happens to the tires.”

The TSBC website is the main hub for information shared with both the general public and tire retailers with the site successfully acting as a landing point for comprehensive information and materials on tire recycling in BC.

To continue educating and raising consumer awareness, TSBC built on its 2022 program approach. The objective of the program was to increase awareness of tire recycling across BC residents, especially vehicle owners, and to improve their understanding of the connection between scrap tires and their second life. The call to action was to highlight the consumers’ ability to find a recycling location through the TSBC website. The messaging was delivered through TV ads, bus ads, and digital media, supported by social media posts, community engagement through tire collection events, TSBC ambassadors at community events and school programming, and through PR outreach to the media.

In addition to the disposal messaging, TSBC’s communications program focuses on educating the consumer on “Reduce” and “Reuse”, two key Rs in the hierarchy that are often overlooked but critical to the environment now and in the future. Another area of focus was the retailers (producers) with the objective of helping them understand their role and responsibilities in the program, and developing relationships to allow for partnerships when it comes to collection event hosting, additional R2R participants, and potential grant program partners.

The following tools were used to deliver this strategy:

Educational Tools – Paid Media & Earned Media

Through both paid media (TV, bus and digital media ads), and earned media (social media, website, PR outreach), TSBC continues to grow an engaged audience while educating consumers about the benefits of tire recycling in BC. Results are tracked through the results of two consumer awareness surveys, one is a multi-steward SABC survey which is conducted every two years, and the other conducted independently each year in partnership with Interchange Recycling.

Paid Media - In 2023, TSBC implemented TV ads for the first time, supplemented by TV and video ads, which were delivered in markets determined by either population (Metro Vancouver / Vancouver Island) or feedback from local governments that specifically asked TSBC to conduct more education in their regions. Digital advertising included paid search, YouTube ads, and paid social media posts. The TV ads reached over 5 million impressions, and the bus ads reached over 2.5 million impressions. Digital advertising reached a total of over 6 million impressions in 2023.

Earned Media - TSBC continued to work with a PR agency to conduct and manage media outreach efforts. This year, their efforts generated 126 news mentions with a potential reach of approximately 10 million. TSBC also garnered 17 broadcast (radio and TV) media mentions with a potential reach of almost 12 million.

TSBC continues to grow its online presence with increased activity on Facebook, Twitter, Instagram, and LinkedIn, as well as through articles shared on the TSBC.ca website. The most engaging content generally involves playground projects completed through the TSBC Community Grant Program, tire collection events held across BC, and community events and initiatives. Followers are also interested in hearing about industry news and TSBC partnerships.

Educational Tools – [TSBC website](#)

The website design focuses on providing information to two main stakeholder groups: registered participants and the public. For the public, the website informs visitors on:

- [Recycling drop off locations \(R2R location finder\);](#)
- [Community Events and Programs;](#)
- [Community Grant Program;](#)
- [News and Updates;](#)
- [Tire Recycling in BC;](#) and
- [Extended Producer Responsibility \(stewardship\) Plans and Annual Reports.](#)

Educational Tools – RCBC Hotline and Recyclepedia & BC Recycles

As in prior years, TSBC contributed funding to the [Recycling Council of BC](#) to operate the [Recycling Hotline](#) and its Recyclepedia [Smart Phone App](#). In 2024, TSBC developed its own location finder on the TSBC web site. Funding will still be provided to RCBC but limited to only those inquiries handled directly by RCBC's suite of tools. These tools are excellent resources for the consumer, particularly for information on tire drop off locations, and by supporting RCBC this helps provide the one-stop-shop for citizens of BC looking for information on where to recycle their waste. TSBC also contributes to and supports the BC Recycles website, a Stewardship Agencies of BC (SABC) initiative.

Educational Tools – Retailer Hub

In 2023, TSBC launched a new webpage called 'Retailer Hub,' serving as an educational platform aimed at engaging and informing tire retailers' owners, accountants, and staff. This comprehensive tool features answers to frequently asked questions, information pertinent to tire retailers (the obligated party under the Regulation), resources and guides outlining the scrap tire recycling program and their involvement, as well as a dedicated section for communication and feedback. This initiative marks another milestone in TSBC's ongoing efforts to establish an effective educational and communication channel between TSBC and retailers. In 2024, TSBC will be launching a monthly retailer newsletter – TireTalk - as another communication channel for key messages to this stakeholder group.

TSBC also engages with the public in the ways detailed below.

Educational Program – Event Ambassador Tour

In 2023, TSBC partnered with a PR agency to conduct an ambassador tour across the province, aimed at raising awareness for the TSBC scrap tire recycling program. From June 1 to August 31, two TSBC ambassadors traveled throughout the province, representing TSBC at targeted events and Return-to-Retailer (R2R) locations. Their objective was to inform the public about the R2R program, showcase available online educational resources, and provide insights into the tire recycling process and its impact.

The PR agency designed an eye-catching booth for the tour to attract event attendees visually. Throughout the tour, representatives attended 15 community events, visited 11 R2R locations, and conducted surveys with 241 BC residents. These efforts succeeded in capturing the attention of over 40,000 individuals and garnered media coverage, potentially reaching 64.19k people.

Community Grant Program

The [Community Grant Program](#) is now in its 15th year and has provided over \$6.1M in grants to over 341 projects in 94+ communities throughout BC. The program provides matching funds up to a maximum of \$30,000 per project to not-for-profit organizations, schools, municipalities, etc., that use BC recycled rubber. This program not only benefits the communities but is an excellent way to get the word out on “what happens to the tires” and “what happens to the money.” The ability to showcase how BC residents' benefit when scrap tires are diverted from landfills and recycled into marketable products is invaluable.

In 2023, grants totaling \$250,00 were awarded to 10 successful applicants from communities throughout BC. The grants awarded resulted in the use of approximately 215,000 lbs of BC rubber (the equivalent of approximately 27,921 car tires) for playground and spray park surfaces, recreational flooring, pathways and outdoor fitness area projects. The Community Grant Program was featured in community papers and on social media. Grant awardees are required to have onsite signage to officially recognize TSBC as a contributor to these important projects and to advise the local MLA and Mayor and Council of the project and the grant.

Partnerships – ARTist Response Team

In 2023, TSBC invested in various community events to demonstrate alignment with and support for education, Indigenous programming, and ocean cleanup. This included sponsoring the ARTist Response Team (ART), an entertainment company that educates on ecology through in-school programming. One of their initiatives, the Voices of Nature model, empowers students to take a leadership role in positive change through singing and advocating for the environment. This year, ART's Voices of Nature and Good Medicine Songs programs were held in 3 schools. During these projects, messages about the tire recycling program were incorporated into rehearsals, concerts, souvenir programs, discussions, and workshops, making connections between science, social studies, Indigenous worldviews, and the songs performed. For the first time, youth aged 14-17 were engaged through a project with a secondary school. Recognition for TSBC's support included logo placement on signage and posters, a full-page message in souvenir programs, inclusion on the ART website, social media posts, and verbal recognition during concerts. TSBC's tire recycling efforts were highlighted through student performances. TSBC is pleased to share this partnership with Interchange Recycling.

Partnerships – First Nations Recycling Initiative (FNRI)

Led by Recycle BC and in collaboration with 8 other stewards, TSBC finances a crucial initiative aimed at assisting First Nations communities interested in establishing recycling programs. This program is overseen by a dedicated First Nations field service specialist who travels across BC to meet with communities, offering guidance and support for their recycling endeavors by providing necessary tools and resources. Through this partnership, a variety of materials are collected, including car tires, medium truck tires, agricultural tires, logger skidder tires, and bicycle tires and tubes. These materials are then processed by Tire Stewardship BC.

In 2023, over 5,000 tires were collected and either removed or scheduled for removal from 11 different locations. This initiative has facilitated partnerships with numerous communities. Six First Nation communities were engaged with the FNRI for the first time, while 14 communities participated again. The initiative attended 5 community engagement events, made 22 community visits, supported 20 community clean-ups, and visited 8 Regional Districts, engaging with 6 of them. A copy of the 2023 Annual Report for FNRI can be found [here](#).

TSBC remains an active member of the Indigenous Zero Waste Technical Advisory Group and looks forward to continuing to collaborate with and support this group in its ongoing efforts.

Partnerships – Ocean Legacy Foundation (OLF)

In 2023, TSBC committed to providing a grant of \$30,000 per year for the next 5 years to Ocean Legacy Foundation. This funding aids OLF's tire clean-up expeditions across BC, including the removal of foam-filled tires from beach cleanups and dock deconstructions. The \$30,000 grant received in 2023 was used to purchase and commission a guillotine system that has significantly improved efficiency and safety around the separation process of the foam from the tire, which up until then had been done manually. In 2023, OLF received and processed 614 tires (12,243 kg) and redirected them from shorelines and waterways across British Columbia to Liberty Tire in Delta, with financial and operational support from TSBC. The majority of tires collected and processed by OLF had been used in dock construction and contained expanded polystyrene (EPS) foam to increase buoyancy, along with wooden or metal stakes. Separating these materials is critical to ensuring maximum recyclability. By partnering with OLF, TSBC ensures that scrap tires collected in BC are processed and repurposed within the province, contributing to a circular economy and reducing landfill waste.

Table 1 Consumer Education and Awareness – 2023

Performance Measure	2023		2022	2021	2020	2019
	Target	Performance				
Awareness of where to take scrap tires for safe disposal	61%	50%	47% (SABC 56%)	56%	48% (SABC 63%)	47%
Awareness of where to go to find information on safe disposal locations	77%	64%	61% (SABC 73%)	68%	62% (SABC 69%)	59%

Prior to 2019, TSBC’s consumer awareness surveys were completed only through the multi-steward SABC survey conducted every two years.

Since 2019, TSBC has conducted its own survey in partnership with the BC Used Oil Management Association (now known as Interchange Recycling) and this reduced scope/higher customized survey yielded very different performance results from the SABC survey. Other BC stewardship programs that participate in the multi-steward SABC survey also run their own surveys and have confirmed to TSBC that their individual survey results are also lower than in the SABC survey.

TSBC understands the most notable reason for the discrepancy in the SABC versus individual survey results is survey fatigue. This is because responses in the SABC survey are required for multiple stewardship programs combined with the fact that Return-it is the first program listed, and the nature of its product attracts high consumer recognition due to its strong marketing and brand awareness program. Going forward, TSBC will continue to participate in the SABC survey.

According to the results of the survey run through Leger in 2023, awareness of tire recycling plateaued, knowledge of recycling locations rebounded, retailers/mechanics were indicated as the top choice for tire disposal, and overall, advertising awareness remained the same as in 2022 (and the results continue to remain higher than in 2020/2021).

The results of the survey pertaining to the two targets, reflect missed targets but an improvement over 2022. TSBC is pleased to see the numbers trending higher given the significant amount of effort and financial commitments to this area of the business and the incredible reach we have received through the TV, digital and bus ads. Looking forward to 2024, we will be increasing our TV ads, with a strategic plan to reach a greater audience (including commercials run during the 2024 Paris Olympics) and will be reworking our digital advertising to match the creative used for TV ads for brand cohesiveness. We are working on increasing our in-person interactions with the general public by hosting more tire collection events and ambassador attendance at community events throughout the year, and we are also working on strengthening our communications with retailers through hosting lunch-and-learn sessions for staff in store, creating informative e-newsletters that will be shared monthly, and finding new ways to encourage retailers to share our message of tire recycling with their customers.

4. Collection System and Facilities

As the tire program is a retailer-based collection system, TSBC defines a collection facility as *“a TSBC registered retailer (producer) that, in the normal course of business, will accept one scrap tire for every new tire sold.”* This definition reflects that not all tire retailers are in a position to take back a scrap tire for every new tire sold. Examples include Home Depot, which may sell a trailer with new tires even though their primary business is not selling tires or equipment with new tires; an online retailer; or a business located out of province.

In 2023 there were 2,077 collection facilities compared to 2,059 in 2022. Although the change is not significant and simply reflects the retailers in business, events throughout the year that affect this number include new retailer locations, closed locations, and changes in retailer businesses that result in the retailers no longer, or now meeting, the definition of a collection facility.

Unlike other product stewardship programs where consumers must choose between putting their end-of-life product into the waste stream or taking it to a collection depot for recycling, most motorists exchange their scrap tires for new ones at the time of purchase. These tires are collected from the retailers

by haulers, some of which sort and cull the good used tires for reuse, with the remainder transported to TSBC registered processors. The majority of scrap tires generated annually are picked up at tire retailer locations where they are held for collection at no cost to the program.

TSBC also collects scrap tires from other registered sites that generate scrap tires as part of their normal business operations, such as auto wreckers and small auto body shops and garages.

An estimated 3% of the total annual generation collected results from motorists who choose to take their scrap tires home rather than leave them with the retailer for disposal. Ultimately, most of these orphan tires end up at a landfill where they are held for collection by haulers. TSBC does not have a contractual arrangement with any landfill or transfer station to accept tires on its behalf. The disposal option model for these orphan tires is the Return to Retailer (R2R) Program and Tire Collection events. TSBC's communications strategy focuses primarily on educating the consumer on where to take their orphan tires. TSBC's goal is that the consumer will only think of a tire retailer or an R2R location as a tire disposal option, and only use other options by choice and not necessity. However, changing behaviours and having these other disposal alternatives as an option, means this goal will take significant time and money to achieve.

The decrease in the volume of tires going to landfill (6% in 2012) shows that TSBC's measures to provide alternate disposal methods are working. R2Rs are registered retailers that have voluntarily agreed to accept up to 4 clean and off-rim car tires from the public. In addition to the TSBC website, the list of R2R locations is available on the RCBC website and the Recyclepedia app. In 2023, the number of R2R locations increased by ongoing efforts by TSBC to recruit retailers to voluntarily participate in the R2R program. Although the number of R2Rs in any given Regional District is greater than 25% of the total retailers in the region, TSBC will focus its efforts on continuing to add R2R locations while supplementing areas in need with collection events.

In 2020, TSBC conducted a survey to understand the challenges for local government and private depots in handling tires. The result was several actions by TSBC, including a commitment to conduct two annual clean outs at local government sites, work directly with respondents that had more unique challenges and conduct an annual survey seeking feedback on tire collection. The survey for 2023 received a higher response rate than in prior years. TSBC finds the responses very useful and is pleased that the response rate continues to climb. Although challenges for some remain, the over all response was more positive than in prior years, which has been the result of a concerted effort for the hauler to reach out to every site. TSBC remains unwavering in its commitment to do 2 cleans out per year and uses a tracking process that is reviewed bi-weekly by TSBC staff and the haulers to ensure these collections occur. For those sites with unique challenges, including unmanned or remote sites, TSBC provided funding in the form of either an annual stipend or a contribution to help cover the cost of moving the tires to a central location for

collection. TSBC will continue to monitor the results of these actions through surveys with affected stakeholders.

The waste audit process conducted annually is important to note in the context of tires disposed of at landfills. In conjunction with all SABC members, TSBC participates in and funds waste audits in a minimum of one Regional District per year. In 2023, SABC participated in one waste audit – The Regional District of Kootenay Boundary, where tires represented 0.3% of the total tonnes disposed. Despite being non-program materials, bike tires and tubes were included in the count as TSBC offers to collect and recycle them free of charge. This initiative has been in place since 2011.

TSBC also hosts province-wide tire collection events where the public can drop off any tire size, on or off rim, at no charge. No tire is turned away at the event, including non-program, to eliminate the risk of the tire being abandoned or dumped near the event location. The 2023 events are shown in [Table 2](#) below and include events hosted by TSBC and those TSBC participated in hosted by other parties. While these types of events are successful in terms of diverting tires that might otherwise be abandoned in the rural or urban environments, they remain costly to host, especially when TSBC receives tires on rims, which in 2023 represented 19% of the total tires collected. TSBC did run a pilot project in 2023 by having a company on site at the Kelowna event de-rimmed tires and a steel recycler also on site to haul them away. This approach avoids the transport of these rims down to Delta, an environmental and economic savings. TSBC will look at expanding this pilot project in 2024. Recognizing the invaluable opportunity to connect face to face with the public dropping off tires, representatives from Liberty Tire attended many of the events with a focus on educating the public on tire disposal options and what happens to the tires after being dropped off. In total, over 5,800 tires were collected thanks to the efforts of all involved, which included the retailers and Regional Districts willing to host these events and Liberty Tire Recycling which provided the trailers and manpower to accept and load the tires.

Table 2 Collection Events – 2023

Date	Facility / Event	City
April 16 & July 17	Sayward Days	Sayward*
April 29	Junk in the Trunk	Prince George
May 6	Integra Tire	Grand Forks

September 23	Community Centre	McBride*
October 2	Kal Tire	Cumberland

*requested / hosted by Regional District

5. Product Environmental Impact Reduction, Reusability and Recyclability

TSBC and producers continue to seek opportunities to reduce the environmental impacts associated with the life cycle of a tire, and to increase its reusability at the end of that cycle.

Reduction (1R)

While managing tires at their end-of-life is important, lengthening their lives so that fewer are used is essential – this is an area where both the motorist and industry can play a part. The life of a tire is significantly increased with proper tire maintenance, i.e., keeping tire pressure at the correct level. Tire manufacturers are making progress with the introduction of innovative tire lines specifically designed and constructed for low rolling resistance, which improves fuel efficiency. Tire manufacturers are also addressing the challenges presented by electric vehicles which, due to their weight, cause tires to wear at significantly higher rates. TSBC continues to work in partnership with the Tire and Rubber Association of Canada (TRAC) in their annual Be Tire Smart campaign which focuses on educating the motoring public on the benefits of proper tire inflation and maintenance. The need to continue these efforts to educate the consumer is supported by the results of a recent survey commissioned by TRAC to gauge attitudes and knowledge around the impacts of proper tire inflation on both internal combustion engine (ICE) vehicles and EVs. Over three quarters (77 per cent) of motorists know that correctly inflated tires improve fuel economy, lessen vehicle emissions, and protect the environment. Sixty-two per cent understand proper tire inflation plays an important role in optimizing EV range. However, the findings reveal a pressing need for more education about how to do tire care right, especially true among younger drivers.

Reusability (2R)

Retreading of medium truck tires and off-the-road (OTR) tires is an ongoing, commercially viable activity and accounts for significant volumes of tires diverted from end-of-life management. Replacing the worn tread allows the reuse of the casing (60-70% of the tire) up to 2 to 4 times, thereby extending the life of the tire. TSBC’s program incents this activity by not assessing an eco-fee on retreaded tires (equivalent to \$14 per medium truck tire). As retreaded tires are not program tires, their sales are not included in the diversion statistics. However, both medium truck and OTR tire retreading will continue to increase under the program as a result of the commercial strength of the market for this product.

Retreading of passenger and light truck tires is not currently recommended as these types of tires are not designed by the manufacturer to be retreaded. In addition, the culling by scrap tire haulers of worn tires not yet at their end-of-life has occurred since the program's inception in 1991. Most culled tires are exported and as such, never enter the recycling system in BC.

Recyclability

TSBC's ability to influence product design to increase recyclability is extremely limited. While this is an accepted and theoretically possible outcome in some industries, automotive tires are not simple consumer commodities. Instead, they are a critical element in the safe operation of motor vehicles. For this reason, the design and operating parameters of tires are mandated by federal regulations and international agreements.

The elements that make a tire "safe" also tend to be those that make it difficult to recycle. That said, advancements in end-of-life tire management are continuing. Tire manufacturers are pursuing their own environmental strategies, which involves innovation in manufacturing and the design of greener tires by doing such things as replacing high aromatic petroleum-based oils with bio-based oils from corn, canola, oranges, etc. Manufacturers are also beginning to incorporate recycled rubber into selected tire types and are actively investing in new sources of natural rubber supply such as guayule and Russian dandelion, which can be produced in North America.

An illustration of this commitment is the creation of the Tire Industry Project, under the support of the World Business Council for Sustainable Development, by ten leading tire manufacturers. In this project, launched in 2005, Bridgestone, Continental, Goodyear, Hankook, Kumho, Michelin, Pirelli, Sumitomo, Toyo and Yokohama are working together to find sustainable solutions for the industry throughout the tire life cycle. Fields of research include topics such as end-of-life tire management, particles emanating from tire wear, and the development of sustainable natural rubber.

Note: The tire industry has been working closely with stakeholders and regulators on the issue of 6PPD / 6PPD-q and has also created a consortium of tire manufacturers to evaluate alternatives to 6PPD. Information about the process and progress on the alternatives analysis to address this challenge can be found at the links below.

- *Press release: Largest Global Tire Industry Consortium Releases Preliminary 6PPD Alternatives Analysis Report:*
<https://www.ustires.org/largest-global-tire-industry-consortium-releases-preliminary-6ppd-alternatives-analysis-report>
- *Q&A: Stage 1 Alternatives Analysis for 6PPD in Tires:* <https://www.ustires.org/qa-stage-1-alternatives-analysis-6ppd-tires>

- *Stage 1 AA report (filed with California DTSC (regulator) by each of the members of the 6PPD Consortium on 3/29/24): https://www.ustires.org/sites/default/files/2024-03/USTMA%20Consortium%206PPD%20AA%20Preliminary%20Report_3-25-24.pdf*

TSBC has also created its own internal document related to this issue to assist with providing information to the media or the public. A copy of this document can be found [here](#). TSBC will continue to keep a watching brief on this worldwide issue.

6. Pollution Prevention Hierarchy and Product / Component Management

TSBC manages the collected products in accordance with the “pollution prevention hierarchy”, i.e., recycle (3R) before energy recovery (4R) before residual disposal (5R). TSBC incents the processing of scrap tires into higher value-added products by providing higher financial incentives to recycle a tire than to use a tire for energy recovery. Beyond primary processing, TSBC promotes the use of BC’s recycled rubber in products manufactured in BC through a Manufacturing Incentive.

[Table 3](#), which follows these descriptions, provides the 2023 product hierarchy results based on the various categories broken down by component type – rubber, steel and fibre.

Recycling (3R)

Referred to in the industry as Tire Derived Product (TDP), this category includes the rubber component that has been recycled and sold to market; it does not include rubber that is in inventory at the processor’s site as a product for sale at a later date. This reporting category also includes steel, extracted in the recycling process, sold as a product to an end use market. Should a recycling market for fibre be found, the fibre directed to this end use would also be reflected in this category. In 2023, TSBC missed its target of 88% by 1%, a result of finished product inventoried on site not being shipped to the end customer by December 31, 2023. As this was a timing issue, TSBC is confident that targets will be met going forward and as such is not providing any remediation strategies.

Energy Recovery (4R)

Referred to in the industry as Tire Derived Fuel (TDF), this category comprises not only the rubber but also the fibre extracted in the recycling process that is sold to a kiln. As iron is required in the kiln feed and the ash produced contains elements required in the chemistry of clinker, the tires are not only a fuel source but a beneficial raw material for the production of clinker at the cement plant. In addition, as natural rubber is a renewable resource that comprises 25% of an average of tire, energy recovered from tires can be categorized as a biofuel.

Residuals (5R)

Residuals include waste material from the recycling process – rubber, steel and fibre – that is ultimately disposed of at landfill. Typically, this would only include the rubber component (sweepings or non-

processable material) unless a drop in demand for steel and fibre is triggered by market forces beyond the control of the processor. As the availability of trailers to transport waste to landfill was limited once again in 2023, a portion of the rubber waste volume shown represents inventoried material from the previous calendar year. This issue is resolving itself and TSBC expects to be at, or close to, its target of 1% in 2024.

Table 3 Product Hierarchy Results – 2023

Component	Recycling (3R)	Energy Recovery (4R)	Landfill (5R)
Rubber	87%	11%	2%
Steel	100%		
Fibre		100%	

TSBC supports a mix of recycling and energy recovery end uses to ensure there is a market for all BC scrap tires and recycled tire products. This policy of allowing some tires to be used as a fuel supplement, in place since 1991, is economically and environmentally sound. It is a lower cost alternative which helps TSBC contain eco-fee levels, and all usage has appropriate environmental permits.

Tires used for energy recovery are market driven and vary from year to year. For example, the usage was at an all-time low in 2012 due to economic conditions in the cement industry combined with a record high demand for recycled products. However, increased use of tires for energy recovery can occur when recycling product markets decline, such as the economic downturn in 2008 to 2010. In recent years, the volume of BC tires consumed by Heidelberg Materials in Delta has been consistent primarily due to the limit TSBC imposes to ensure it meets its target.

The volume of whole tires and shred directed to energy recovery remains within TSBC’s target of 11%. TSBC continues to work with industry through its Research and Development Program and current participants to find recycling end uses for the fibre. Research to date includes the use of recycled tire fibre in concrete applications to create a value-added product that in most provinces is considered waste and landfilled, and also in recycled rubber products produced in BC.

7. Recovery Rate and Product Sold and Collected

The measure of effectiveness of stewardship programs recommended by the BC Recycling Regulation is the “Recovery Rate”, defined as the actual number of scrap tires collected/divided by the actual number of new tires sold in the reporting year. A report conducted by TSBC’s audit firm concluded the Recovery Rate as currently defined for a product with a life span beyond 1 year is not appropriate in the case of tires; this is because, with the robust tire collection system in place, the factors impacting the difference between sales and collection are the long-term life of a tire, tire sales trends (winter tires, new car

sales/vehicle registrations) and to a lesser degree the export of used tires for reuse. In TSBC’s current Extended Producer Responsibility Plan approved by the Ministry on December 7, 2018, the Recovery Rate for tires is defined as the “actual number of scrap tires collected in the reporting year/divided by the actual number of new tires sold 5 years prior” – a more meaningful measure which aligns with an objective of the Ministry for all stewardship programs.

Table 4 Recovery Rate 2023

Units Collected 2023	Units Sold 2018	Recovery Rate
4,108,770	4,238,972	97%

Table 5 Product Sold and Collected in 2023

Tire category	Units Sold	Units collected and delivered to a processor
Passenger & Light Truck	3,892,338	3,718,011
Medium Truck	377,452	384,286
Large Agricultural	18,393	5,736
Logger / Skidder	3,606	737
Total	4,291,789	4,108,770

8. Summary of Deposits, Refunds, Revenues and Expenditures

The TSBC program is funded by an Advance Disposal Fee (ADF), commonly referred to as an eco-fee. It is a condition of registration with TSBC that retailers remit ADFs monthly for every new tire sold to cover the costs of the program, which are primarily the collection and processing of the scrap tires.

The ADFs are set by TSBC and vary by tire type to adequately compensate for the higher costs of collecting and disposing of larger tires. The fees in 2023 are shown in Table 6 below. With significant financial losses in both 2022 and 2023 due to reduced tire sales and increased costs across all sectors of the business, TSBC made the decision to increase the PLT category, which had not been adjusted since 2008, from \$5 to \$6.50. This increase is effective January 01, 2024.

Table 6 Advance Disposal Fees – 2023

Tire category	ADF per tire
Passenger & Light Truck (PLT)	\$5
Medium Truck (MT)	\$14
Agricultural Drive	\$15
Logger / Skidder	\$35

Other OTR tires are excluded from the Recycling Regulation but with processing capacity and capability present, TSBC is hopeful the Ministry will agree to add the remaining OTR categories (up to 39” rim diameter) to the Regulation and provide a level playing field for the industry.

100% of fees collected are used for the operation of the scrap tire recycling program. Program revenues and expenses are provided in TSBC’s 2023 Independently Audited Financial Statements, included as [Appendix A](#).

9. Plan Performance

TSBC is currently operating under its [2018 Extended Producer Responsibility Plan](#) approved by the Ministry on December 7, 2018 and will continue to do so until its Plan submitted in August 2021 is approved. In the submitted Plan, TSBC has set new performance measures and targets but is required to report based on the performance measures and targets in its 2018 Plan, as reported in Table 7 below, and reporting commitments as reported in Table 8 below.

Table 7 Performance Measures, Targets and Results 2023

Performance Measures (as agreed with the Ministry)		Annual Targets	Performance
1.	Recovery Rate <u>(Total # Units Collected in reporting year / Total # Units Sold 5 years prior to reporting year)</u>	90%	97%

Performance Measures (as agreed with the Ministry)		Annual Targets				Performance			
2.	<p>The percentage allocation of total tonnes of scrap tires (i.e. all rubber, steel and fibre) <u>processed and shipped</u></p> <p>Note: on average, rubber accounts for 70% of the total tire weight, with 15% steel and 15% fibre</p>		Recycling	Energy Recovery	Landfill		Recycling	Energy Recovery	Landfill
		Rubber	88%	11%	1%	Rubber	87%	11%	2%
		Steel	100%			Steel	100%		
		Fibre		98%	2%	Fibre		100%	
3.	Number of collection sites (i.e. registered retailers that will take back a scrap tire from the consumer at the time a new tire is sold)	1,850				2,077			
4.	c) Total number of retailers and generators in BC that take back orphan tires (R2R)	c) 800 province-wide				c) 783			
	d) Number of R2Rs in each Regional District	d) At least 25% of registered retailers in each Regional District are R2R locations				d) Achieved			
5.	c) Awareness of where to take scrap tires for safe disposal	c) 61%				c) 50%			
	d) Awareness of where to go to find information on safe disposal locations	d) 77%				d) 64%

INDEPENDENT AUDITORS' REPORT

To the Members of Tire Stewardship B.C. Association

Report on the Financial Statements

Opinion

We have audited the financial statements of Tire Stewardship B.C. Association (the "Association"), which comprise the statement of financial position as at December 31, 2023 and the statements of operations, changes in net assets, and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly in all material respects, the financial position of the Association as at December 31, 2023, and results of its operations and its cash flows for the year then ended in accordance with Canadian Accounting Standards for Not-For-Profit Organizations.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Association in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

INDEPENDENT AUDITORS' REPORT (continued)

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Canadian Accounting Standards for Not-For-Profit Organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Association's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Association or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Association's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

INDEPENDENT AUDITORS' REPORT (continued)

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Association's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Association's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Association to cease to continue as a going concern.

INDEPENDENT AUDITORS' REPORT (continued)

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

As required by the British Columbia Societies Act, we report that, in our opinion, these principles have been applied on a basis consistent with that of the preceding year.

Tire Stewardship B.C. Association
NOTES TO FINANCIAL STATEMENTS
For the Year Ended December 31, 2023

Tire Stewardship B.C. Association (“TSBC”) is a Stewardship Agency registered in British Columbia and incorporated under the British Columbia Society Act as a not-for-profit organization on August 25, 2003. On October 13, 2017, TSBC transitioned to the new British Columbia Societies Act. TSBC is exempt from income taxes pursuant to Section 149(1)(l) of the Income Tax Act, Canada. On January 1, 2007, TSBC assumed responsibility for the Ministry of Environment (“Ministry”) FIRST Program and entered into an agreement to manage the industry stewardship program for scrap tires in British Columbia in accordance with a Ministry-approved Stewardship Plan. The 2018-2021 Stewardship Plan was approved by the Ministry on December 7, 2018. The 2022-2026 Plan was submitted to the Ministry on August 26, 2021.

The B.C. Recycling Regulation (449/2004) includes the requirement that all producers, as defined in the regulation and referred to in these notes as “tire retailers”, prepare or be part of an approved stewardship plan. Presently, TSBC has the only approved tire stewardship program in the province and accordingly all tire retailers in B.C. must be registered.

1. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with Canadian accounting standards for not-for-profit organizations, applied within the framework of the significant accounting policies summarized below:

Use of Estimates

The preparation of financial statements in accordance with Canadian accounting standards for not-for-profit organizations requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingencies at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. As discussed in note 6, the incentive payments to the processors are payable only after the processing is complete and the product is sold. An inventory of processed materials not yet sold, and unprocessed scrap tires exists at the processors’ plants. This inventory is estimated based on reports from the processors and actual inventories may vary significantly from this estimate. These estimates are reviewed periodically by management.

Revenue Recognition

TSBC follows the deferral method of accounting. Under this method, restricted revenue is recognized in the year in which the related expenses are incurred. Unrestricted revenue is recognized when received or receivable if the amount received can be reasonably estimated and collection is reasonably assured. Investment income is recognized when earned.

TSBC charges an advance disposal fee to tire retailers on the sale of new tires. This fee is variable based on the type of tires sold. Advance disposal fee revenues are collected by the tire retailers at the point of sale and reported to TSBC in the following month. TSBC accrues the advance disposal fee revenues and recognizes them as unrestricted revenues in the month in which they were generated as reported by the tire retailers.

Cash and Cash Equivalents

The cash presented on the statement of financial position consists of cash on hand and cash on deposit. The cash and cash equivalents component of investments consists of cash on deposit and investments in money market instruments.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

Intangible Asset

Intangible asset consists of software and is accounted for at cost. Amortization is based on its useful life using the straight-line method. The amortization method and the estimate of the useful life of the intangibles are reviewed annually. Intangibles are tested for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. Impairment of an intangible asset is recognized in an amount equal to the difference between the carrying value and the fair value of the related intangible asset. TSBC utilizes a direct valuation approach in determining the fair value of intangible assets.

Research and development

Research costs are expensed in the period incurred. Development costs are expensed in the period incurred unless, in the opinion of management, the deferral criteria set forth by the CPA Canada Handbook – Accounting are satisfied in all material respects, in which case development expenditures are capitalized and amortized over the estimated life of the related products.

Intangible Asset impairment

The carrying value of the intangible asset may be written down to recognize a reduction in its recoverable amount to its fair value. The impairment is measured by comparing the carrying value of the intangible asset to the fair value, based on the present value of undiscounted future cash flows expected to be generated from the intangible asset. An impairment charge is recorded in net income. Impairment charges are not reversed if there is a subsequent increase in its fair value.

Incentives Payable

Incentives payable to processors are due only after the processing is complete and the product is sold for an eligible end use (or in the case of whole tires used for tire derived fuel, when consumed by the facility). Incentives payable to manufacturers are due on receipt of crumb rubber from the processor or on sale of the final manufactured product depending on the manufacturers' processes. Incentives payable as of the end of the fiscal year are included in accounts payable and accrued liabilities.

Financial Instruments

Measurement of financial instruments

TSBC initially measures its financial assets and financial liabilities at fair value, except for certain related party transactions that are measured at the carrying amount or exchange amount, as appropriate.

TSBC subsequently measures all its financial assets and financial liabilities at cost or amortized cost, except for investments that are quoted in an active market, which are measured at fair value. Changes in fair value of these financial instruments are recognized in excess (deficiency) of revenue over expenses.

Financial assets measured at amortized cost on a straight-line basis include cash and cash equivalents and accounts receivable.

Financial liabilities measured at amortized cost on a straight-line basis include accounts payable and accrued liabilities.

Financial assets measured at fair value include quoted fixed income securities and equities.

1. SIGNIFICANT ACCOUNTING POLICIES (continued)

Impairment

Financial assets measured at cost are tested for impairment when there are indicators of impairment. The amount of the write-down is recognized in excess (deficiency) of revenues over expenses. The previously recognized impairment loss may be reversed to the extent of the improvement, directly or by adjusting the allowance account, provided it is no greater than the amount that would have been reported at the date of the reversal had the impairment not been recognized previously. The amount of the reversal is recognized in excess (deficiency) of revenues over expenses.

Transaction costs

TSBC's transaction costs related to financial instruments that will be subsequently measured at fair value are recognized in excess (deficiency) of revenues over expenses in the period incurred. The carrying amount of the financial instruments that will not be subsequently measured at fair value is adjusted for transaction costs directly attributable to the origination, issuance, or assumption of these instruments.

2. INVESTMENTS

	2023	2022
	\$	\$
Cash and cash equivalents, at amortized cost	68,506	16,296
Fixed income securities, measured at fair value	5,935,269	8,022,782
Equities, measured at fair value	2,154,907	2,072,279
Investments	8,158,682	10,111,357

Investment income is comprised of interest income of \$78,939 (2022 - \$51,267), dividends of \$59,716 (2022 - \$66,192), foreign nonbusiness income \$34,280 (2022 - \$114,984), other income \$147,673 (2022 - \$164,865), realized loss of \$246,909 (2022 - realized gain of \$50,506), unrealized gain of \$578,311 (2022 - unrealized loss of \$1,396,075), less investment management fees of \$54,558 (2022 - \$61,787).

3. INTANGIBLE ASSET

	2023	2022
	\$	\$
Software (net of amortization)	214,577	227,281

The software is being amortized on a straight-line basis over three years. The amount of amortization included in the statement of operations for this intangible asset was \$84,467 (2022 - \$106,794).

4. GOVERNMENT REMITTANCES

Accounts payable and accrued liabilities include Goods and Services Tax payable of \$142,570 (2022 - \$162,171).

5. NET ASSETS

TSBC's board of directors approved a transfer from the Program Reserve to the Unrestricted Reserve in the amount of \$3,593,602.

5. NET ASSETS (continued)

Unrestricted Net Assets:

- Funds the operational expenses of TSBC, are not externally restricted and are available for general use.

Program Reserve:

- Ensures that funds are available to meet the potential incentives owing to processors for the whole tires and unsold product from previously delivered tires. TSBC has entered into agreements with processors to provide incentives to process and sell their products. The incentive is paid when the product is sold.
- Assists, in the event of a cessation of the Tire Stewardship Program, or the wind up of the Society, or other contingencies with the potential financial consequences that may arise if such events were to occur.
- Ensures funds are available to fund research and development activities and other initiatives needed to sustain a tire-recycling program in the province of British Columbia.

6. COMMITMENTS

As at December 31, 2023, whole tires and unsold product at registered processor facilities were estimated at 7,819 tonnes (2022 - 8,056 tonnes). The incentive payments to processors could amount to a future liability of up to \$2,202,398 (2022 - \$2,199,505).

TSBC has also entered into an operating lease for its premises. Expected future minimum lease Payments for the next 3 years are as follows:

Year ending		\$
December 31, 2024		75,726
December 31, 2025		75,726
December 31, 2026		25,242

7. FINANCIAL INSTRUMENTS

TSBC's financial instruments consist of cash and cash equivalents, accounts receivable, investments (note 2), and accounts payable and accrued liabilities.

Risks and Concentrations

TSBC is exposed to various risks through its financial instruments, without being exposed to concentrations of risk. The following analysis provides a measure of the TSBC's risk exposure as at December 31, 2023.

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk arises from the potential that registered tire retailers who are required to remit advance disposal fees on their tire sales will fail to perform their respective obligation to remit these funds to TSBC. TSBC is exposed to credit risk from these registrants. However, TSBC has many registered tire retailers, which minimizes the concentration of credit risk.

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. Unless otherwise noted, it is management's opinion that, under normal circumstances, TSBC is not exposed to significant liquidity risk arising from these financial instruments.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

7. FINANCIAL INSTRUMENTS (continued)

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Unless otherwise noted it is management's opinion that, under normal circumstances, TSBC is not exposed to significant currency risk arising from these financial instruments.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. TSBC is exposed to interest rate risk on its fixed and floating interest rate financial instruments. Fixed-interest instruments subject TSBC to a fair value risk since fair value fluctuates inversely to changes in market interest rates. Floating rate instruments subject TSBC to related cash flow risk. Unless otherwise noted it is management's opinion that, under normal circumstances, TSBC is not exposed to significant interest rate risk arising from these financial instruments.

Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. TSBC is exposed to other price risk through its investments in fixed income securities and equities for which the values fluctuate with the quoted market price and interest rates.

INDEPENDENT REASONABLE ASSURANCE REPORT FOR SELECTED NON-FINANCIAL INFORMATION

To the Members of Tire Stewardship B.C. Association

We have been engaged by the management of Tire Stewardship B.C. Association (the “Stewardship Agency”) to perform a reasonable assurance engagement in respect of the following information, detailed within the Stewardship Agency’s Annual Report to the Ministry of Environment and Climate Change Strategy and in Attachment 1, for the year ending December 31, 2023 (together the “Subject Matter”):

- The location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of B.C. Regulation 449/2004 (the “Recycling Regulation”);
- The description of how the recovered product was managed in accordance with the pollution prevention hierarchy in accordance with Section 8(2)(d) of the Recycling Regulation;
- The total amount of the producer’s product sold and collected and the producer’s recovery rate in accordance with Section 8(2)(e) of the Recycling Regulation; and,
- Performance for the year in relation to approved targets under Section 8(2)(b), (d) and (e) in accordance with Section 8(2)(g) of the Recycling Regulation.

The objective of this Report is to disclose how the Stewardship Agency’s management has discharged its responsibility to report on the Subject Matter in accordance with Sections 8(2)(b), (d), (e) and (g) of the Recycling Regulation.

RESPONSIBILITIES

Management is responsible for the preparation and fair presentation of the Subject Matter in accordance with the evaluation criteria as listed in Attachment 1 and for such internal control as management determines is necessary to enable the preparation of the Subject Matter such that it is free from material misstatement, whether due to fraud or error.

Our responsibility in relation to the Subject Matter is to perform a reasonable assurance engagement and to express an opinion based on the work performed and evidence obtained. Our opinion does not constitute a legal determination on the Stewardship Agency’s compliance with the Recycling Regulation.

INDEPENDENT REASONABLE ASSURANCE REPORT FOR SELECTED NON-FINANCIAL INFORMATION (continued)**EVALUATION CRITERIA**

Management is responsible for the preparation of suitable evaluation criteria in accordance with the *Guide to Third Party Assurance for Non-Financial Information in Annual Reports – 2022 Reporting Year*, dated November 2022 as specified by the Director under Section 8(2)(h) of the Recycling Regulation. The evaluation criteria presented in Attachment 1 are an integral part of the Subject Matter and address the relevance, completeness, reliability, neutrality, and understandability of the Subject Matter.

SCOPE OF THE ASSURANCE ENGAGEMENT

We carried out our reasonable assurance engagement in accordance with the International Standard on Assurance Engagements 3000 (“ISAE 3000”), Assurance Engagements other than Audits or Reviews of Historical Financial Information, published by the International Federation of Accountants.

This standard requires that we comply with the independence and other ethical requirements of the International Ethics Standards Board for Accountants Code and that we apply International Standard on Quality Control 1. ISAE 3000 also requires that we plan and perform the engagement to obtain reasonable assurance about whether the Subject Matter is free from material misstatement. A reasonable assurance engagement includes examining, on a test basis, evidence supporting the amounts and disclosures within the Subject Matter. The procedures selected depend on our judgement, including the assessment of the risks of material misstatement in the Subject Matter, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity’s preparation and fair presentation of the Subject Matter in order to design assurance procedures that are appropriate in the circumstances, but not for purpose of expressing a conclusion on the effectiveness of the entity’s internal control.

The main elements of our work were:

- Inquiring and discussing with the Stewardship Agency’s management to obtain an understanding of the management and information systems, processes and relevant controls used to generate, aggregate and report the data in the Annual Report;
- Testing relevant controls, transactions and source records on a sample basis;
- Agreeing the number and changes in the number of collection facilities to supporting documentation;
- Inspecting source documentation for proper classification of collection facilities and other registered retailers on a test basis;

INDEPENDENT REASONABLE ASSURANCE REPORT FOR SELECTED NON-FINANCIAL INFORMATION (continued)

- Confirming the existence and location of collection facilities and other registered retailers on a test basis;
- Confirming the total amount of producer's product sold and collected during the year on a test basis;
- Agreeing the total amounts of the producer's product sold and collected and processor's product end-fate during the year to source records on a test basis;
- Confirming the total weight of each category of product end-fate during the year with processors on a test basis;
- Agreeing data used in calculations to source records on a test basis;
- Re-performing calculations on a test basis including the recovery rate and product end-fate percentage calculations;
- Inspecting a sample of the Stewardship Agency's compliance and education program review results to obtain assurance over self-reported data;
- Agreeing the applicable Annual Report target data to the approved stewardship plan to ensure completeness and consistency; and
- Reviewing the consistency of the Subject Matter with the related disclosures in the Annual Report.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

INHERENT LIMITATIONS

Non-financial performance information is subject to more inherent limitations than financial information, given the characteristics of the Subject Matter and the methods used for determining and calculating such information. Qualitative interpretations of relevance, materiality, and the accuracy of data are subject to individual assumptions and judgements. Furthermore, the nature and methods used to determine such information, as well as the evaluation criteria and the precision thereof, may change over time. Accordingly, it is important to read our report in the context of the evaluation criteria.

OPINION

In our opinion, the Subject Matter within the Stewardship Agency's Annual Report for the year ended December 31, 2023, presents fairly in accordance with the evaluation criteria, in all material respects.

INDEPENDENT REASONABLE ASSURANCE REPORT FOR SELECTED NON-FINANCIAL INFORMATION (continued)

- The location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation;
- The description of how the recovered product was managed in accordance with the pollution prevention hierarchy under Section 8(2)(d) of the Recycling Regulation;
- The total amounts of the producer's product sold and collected and the producer's recovery rate in accordance with Section 8(2)(e); and
- The performance for the year in relation to approved targets under Sections 8(2)(b), (d) and (e) in accordance with Section 8(2)(g) of the Recycling Regulation.

OTHER MATTERS

Our report has been prepared solely for the purposes of management's stewardship under the Recycling Regulation and is not intended to be and should not be used for any other purpose. Our duties in relation to this report are owed solely to the Stewardship Agency, and accordingly, we do not accept any responsibility for loss occasioned to any other party acting or refraining from acting based on this report.

Baker Tilly Victoria Ltd.

CHARTERED PROFESSIONAL ACCOUNTANTS

Victoria, BC
June 27, 2024

Attachment 1

Tire Stewardship B.C. Association ("TSBC") Assurance / Evaluation Criteria
For Data From Reporting Year Ended December 31, 2023

Collection Facilities

Assessment of the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation

Specific Disclosures in the annual stewardship report for which evaluation criteria were developed	
Disclosure per annual report	Reference (Page # / Table #)
Number and Location of Collection Facilities	Page 10, Section 4 and Page 19, Table 7
Change in Number and Location of Collection Facilities	Page 10, Section 4

Evaluation Criteria

The following evaluation criteria were applied to the assessment of the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation.

1. The number of collection facilities is measured by the number of registered retailers, as at year end, that will take back a scrap tire from the consumer at the time a new tire is sold (TSBC's fiscal year ends December 31st).
2. The location of collection facilities is included in the list of registered retailers that is provided on the TSBC website as at December 31, 2023.
3. The change in the number and location of collection facilities is based on direct comparison of the number of collection facilities on a provincial and regional district basis compared to the equivalent data for the preceding year.

Attachment 1 (continued)

Tire Stewardship B.C. Association ("TSBC") Assurance / Evaluation Criteria
For Data From Reporting Year Ended December 31, 2023

Pollution Prevention Hierarchy

Assessment of the description of how the recovered product was managed in accordance with the pollution prevention hierarchy under Section 8(2)(d) of the Recycling Regulation

Specific Disclosures in the annual stewardship report for which evaluation criteria were developed	
Disclosure per annual report	Reference (Page # / Table #)
Recycling (3R)	Page 16, Table 3 and Page 19, Table 7
Energy Recovery (4R)	Page 16, Table 3 and Page 19, Table 7
Residuals (5R)	Page 16, Table 3 and Page 19, Table 7

Evaluation Criteria

The following evaluation criteria were applied to the assessment of the description of how the recovered product was managed in accordance with the Pollution Prevention Hierarchy under Section 8(2)(d) of the Recycling Regulation.

TSBC manages products in accordance with the "Pollution Prevention Hierarchy", i.e., recycle ("3R"), before energy recovery ("4R"), before residual disposal ("5R"), and reports on volumes in each of the 3R, 4R and 5R categories.

1. Recycling (3R)

This category includes the rubber, steel and fibre components that have been recycled and sold to market. It does not include rubber, steel or fibre that is in inventory at the processor's site for sale or disposal at a later date.

The number of tonnes is recorded on Processing Incentive claims substantiated by Processor's sales invoices to customers.

2. Energy Recovery (4R)

This category comprises the rubber, steel and fibre components of whole tires and shred used for energy recovery, in addition to fibre extracted in the recycling process.

Shred & Fibre: The number of tonnes is recorded on Processing Incentive claims substantiated by Processor's sales invoices to customers.

Whole Tire: The number of tonnes is recorded on Processing Incentive claims substantiated by the user's Tire Burn Report adjusted for volumes of import tires received during the same period.

Attachment 1 (continued)

Tire Stewardship B.C. Association ("TSBC") Assurance / Evaluation Criteria
For Data From Reporting Year Ended December 31, 2023

3. Residuals (5R)

This category includes waste material from the recycling process (sweepings) and any fibre or steel that cannot be sold to a market and is ultimately disposed of at a landfill.

The number of tonnes is recorded on Processing Incentive claims substantiated by shipping documents to the landfill and copies of weigh scale tickets.

Product Sold, Collected and Recovery Rate

Assessment of the description of total amounts of the producer's product sold and collected and the producer's recovery rate in accordance with Section 8(2)(e) of the Recycling Regulation

Specific Disclosures in the annual stewardship report for which evaluation criteria were developed	
Disclosure per annual report	Reference (Page # / Table #)
Units Sold 2018 = 4,238,972	Page 17, Table 4
Units Collected 2023 = 4,108,770	Page 17, Table 4
Recovery Rate (Units Collected 2023/ Units Sold 2018) = 97%	Page 17, Table 4 and Page 19, Table 7

Evaluation Criteria

The following evaluation criteria were applied to the assessment of the description of how the total amounts of the producer's product sold and collected and the producer's recovery rate has been calculated in accordance with Section 8(2)(e) of the Recycling Regulation.

1. The recovery rate is expressed as a percentage of the number of units (units are defined as whole tires) collected in the reporting year divided by the number of units sold 5 years prior to the reporting year.
 - a. The number of units collected is recorded at the time of pick up on a TSBC waste manifest form and delivered to a TSBC registered processor.
 - b. The number of units sold is recorded at the time the Advance Disposal Fee (ADF) is reported by the retailer on TSBC's ADF Return form.
 - c. The number of units collected and sold are self-reported data that are subject to reviews of their completeness and accuracy on a sample basis under TSBC's Compliance and Education program. In 2023, 108 (2022 - 108) reviews were completed. Note: This figure does not include the harmonized compliance reviews conducted by a 3rd party on behalf of the Canadian Association of Tire Recycling Agencies.

 For Data From Reporting Year Ended December 31, 2023

Performance for the Year

Assessment of the description of performance for the year in relation to targets in the approved stewardship plan under Section 8(2) (b), (d), (e) and in accordance with Section 8(2)(g) of the Recycling Regulation

Specific Disclosures in the annual stewardship report for which evaluation criteria were developed				
Disclosure per annual report	Targets in approved stewardship plan			Reference (Page # / Table #)
Collection Facilities: 8(2)(b)				
Number and Location of Collection Facilities	1,850			Page 19, Table 7
Change in Number and Location of Collection Facilities	No Target			Page 10, Section 4
End of Fate: 8(2)(d)	3R	4R	5R	
Rubber	88%	11%	1%	Page 19, Table 7
Steel	100%			Page 19, Table 7
Fibre		98%	2%	Page 19, Table 7
Recovery Rate: 8(2)(e)				
Units Sold	No Target			Page 17, Table 5
Units Collected	No Target			Page 17, Table 5
Recovery Rate (Total # Units Collected in reporting year / Total # Units Sold 5 years prior to reporting year)	90%			Page 19, Table 7
Education and Awareness:				
Awareness of where to take scrap tires for safe disposal	61%			Page 19, Table 7
Awareness of where to go to find information on safe disposal locations	77%			Page 19, Table 7

Attachment 1 (continued)

Tire Stewardship B.C. Association ("TSBC") Assurance / Evaluation Criteria
For Data From Reporting Year Ended December 31, 2023

Evaluation Criteria

The following evaluation criteria were applied to the assessment of the description of performance for the year in relation to targets in the approved stewardship plan under Section 8(2)(b), (d), (e) and in accordance with Section 8(2)(g) of the Recycling Regulation.

- All stewardship plan targets relating to Section 8(2)(b), (d), (e) and in accordance with Section 8(2)(g) of the Recycling Regulation have been identified and disclosed in the annual report;
- The expected outcomes and target dates as included in the annual report are consistent with the targets in the approved stewardship plan; and
- The facts disclosed in the annual update on progress are supportable by neutral and understandable evidence.

The education and awareness performance measure results presented in the annual report were obtained from a survey held in partnership with the BC Used Oil Management Association and conducted in October 2023 by Leger, an independent third party.
