

Fee Increases Effective April 1, 2018

The Ministry of Environment and Climate Change Strategy (the Ministry) is moving forward with increases to fees related to the authorization of waste discharges under the Environmental Management Act (EMA). These increases primarily relate to: Waste discharge permit applications with current discharge fees, application and amendment fees; and Annual fees for air, effluent, refuse and storage permits.

Clients should note that discharge fees increase by 21% in accordance with the recently approved Permit and Approval Fees and Charges Regulation, effective April 1, 2018.

Each drop-down menu item on the [Guidance, Forms & Fees for Waste Discharge Authorizations page](#) provides specific fee details.
