Foundational education for
producers and resource
professionals

3

The 'Silvopasture in British Columbia Information Series' is package of learning modules designed to provide basic information and education on establishing and managing a silvopasture.

This training resource is intended for producers and natural resource professionals who want a starting point for understanding the many potential uses and management scenarios for using these agroforestry practices.

The information series is arranged into individual modules, each with specific learning outcomes, but linking together with the other modules in the series.

The content is arranged into three distinct types:

1. Core Units;
2. Case Studies; and,
3. Supplemental Units.

The series is also grouped into learning levels from 1 to 4, with complementary units grouped together in each level.

5

Core units provide essential information, and should be followed in sequence from:

1. An introduction to silvopasture, to,
2. The science and technical information supporting silvopasture management; to,
3. Silvopasture beneficial management practices (BMPs), split into two units; and finally,
4. Silvopasture planning.

6

Case studies are detailed examples of silvopasture implemented around British Columbia.

The case studies are intended to follow after specific core units to highlight real-world examples of the content introduced in those units.

Supplemental units cover selected topics with greater depth or technical information. Completing the supplemental units is optional, and skipping these units will not impair your overall understanding of the core information on silvopastoral management.

Content Ratings

Basic

Intermediate

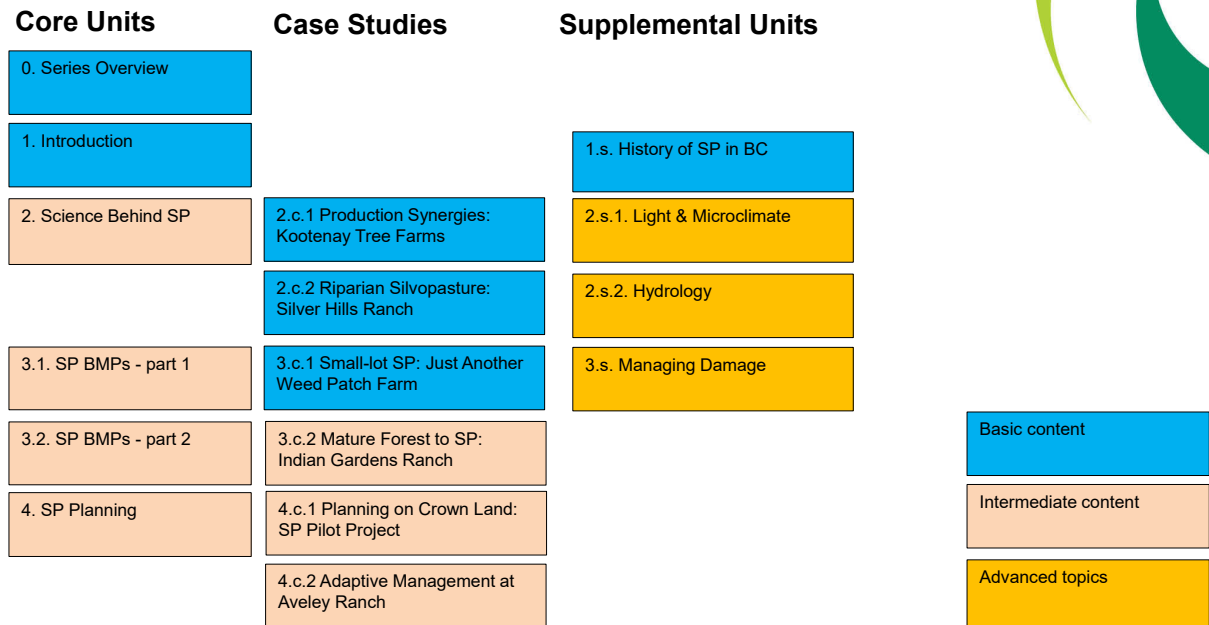

Advanced

8

Each module is also rated by its presumed comprehension level, from basic to advanced.

Silvopasture in BC Information Series

Basic information has no pre-requisites, and should be understandable to anyone with some basic knowledge about livestock and pasture management.

Intermediate topics rely on you having completed and understood the preceding basic units, and builds upon those foundations.

Advanced topics also rely on having completed and understood the preceding core units, but also present information requiring some post-secondary level science or management comprehension.
