INTRODUCTION

Use of this Publication	1-1
Publication Format	1-1
Environmental Concerns	1-2
Legislation	1-2
Beneficial Management Practices	1-2
Conventions and Definitions	1-3
Environmental Farm Plans	1-4
Beneficial Management Practices (BMPs)	1-4
Limitations of this Reference Guide	1-4

FARMSTEAD

Introduction	2-1
Farmstead and the Environment	2-1
Buildings and Roads	2-2
Buildings and Roads Environmental Concerns	2-2
Buildings and Roads Legislation	2-2
Buildings and Roads Beneficial Management Practices	2-7
Farm Building Siting	2-8
Farm Building Construction	2-12
Farm Roads	2-14
Buildings and Roads Near Water	2-15
Stream Crossings	2-15
Land Clearing and Development	2-16
Adjacent Land Development	2-17
Odour Considerations	2-17
Treated Wood Products	2-18
Abandoned Farm Sites and Farmland	2-18
Farm Waste	2-19
Farm Waste Environmental Concerns	2-19
Farm Waste Legislation	2-19
Farm Waste Beneficial Management Practices	2-22
Farm Sewerage Systems	2-22
Farm Refuse Disposal Sites	2-23
Farm Refuse Disposal	2-23
Animal Health Care Products Disposal	2-25
Chemical Fertilizer	2-26
Chemical Fertilizer Environmental Concerns	2-26
Chemical Fertilizer Legislation	2-26
Chemical Fertilizer Beneficial Management Practices	2-30
Chemical Fertilizer Handling Storage and Disposal	2-30
Chemical Fertilizer Spills	2-30
Chemical Fertilizer Contingency Plan	2-31
Petroleum	2-32
Petroleum Environmental Concerns	2-32
Petroleum Legislation	2-32
Petroleum Beneficial Management Practices	2-35
Petroleum Storage	2-35
VOC Emission Reduction from Fuel Evaporation	2-37
Used Oil Disposal	2-37
Petroleum Spills	2-39
Petroleum Contingency Plan	2-39
Wood Residue	2-40

Wood Residue Environmental Concerns	2-40
Wood Residue Legislation	2-40
Wood Residue Beneficial Management Practices	2-44
Wood Residue Storage	2-44
Wood Residue Use	2-45
Wood Residue Leachate Control	2-47

Compost	2-48
Compost Environmental Concerns	2-48
Compost Legislation	2-48
Compost Beneficial Management Practices	2-52
Compost Handling and Storage	2-52
Compost Leachate Control	2-53
Composting Odour Control	2-53
Composting Noise Control	2-54
Composting Fly Control	2-54
Mushroom Media	2-54
Composting Livestock Mortalities	2-54
Composting and Greenhouse Gases	2-54

Energy Use	2-55
Energy Use Environmental Concerns	2-55
Energy Use Legislation	2-55
Energy Use Beneficial Management Practices	2-55
Energy Use	2-55

Heat Production and Agricultural Boilers	2-58
Heat Production and Agricultural Boiler Environmental Concerns	2-58
Heat Production And Agricultural Boiler Legislation	2-58
Heat Production and Agricultural Boiler Beneficial Management Practices	2-60

On-Farm Processing and Sales	2-61
On-Farm Processing and Sales Environmental Concerns	2-61
On-Farm Processing and Sales Legislation	2-61
On-Farm Processing and Sales Beneficial Management Practices	2-66
Product Processing and On-Farm Direct Sales Facilities	2-66
Abattoirs	2-67

LIVESTOCK

Introduction	3-1
Livestock and the Environment	3-1
Climate Change	3-1
Grazing	3-1
Nutrient Cycle	3-1
Vegetation Control	3-1
Indoor Poultry And Livestock Housing	3-2
Indoor Poultry and Livestock Housing Environmental Concerns	3-2
Indoor Poultry and Livestock Housing Legislation	3-2
Indoor Poultry and Livestock Housing Beneficial Management Practices	3-5
Protection of Water Quality	3-5
Protection of Air Quality	3-6
Outdoor Livestock Areas	3-8
Outdoor Area Environmental Concerns	3-8
Outdoor Area Legislation	3-8
Outdoor Area Beneficial Management Practices	3-13

Horse Riding Arenas	3-14
Outdoor Calving Areas	3-14
Confined Livestock and Outdoor Poultry Areas	3-14
Seasonal Feeding Areas.....	3-19
Grazing.....	3-21
Manure Handling and Storage	3-25
Manure Handling and Storage Environmental Concerns	3-25
Manure Handling and Storage Legislation	3-25
Manure Handling and Storage Beneficial Management Practices	3-30
Manure Handling.....	3-30
Manure Storage	3-31
Solid Manure Storage	3-32
Semi-Solid Manure Storage	3-34
Liquid Manure Storage	3-35
Manure Storage Sizing	3-36
Manure Gas Emissions Reduction.....	3-42
Manure Treatment.....	3-44
Manure Uses	3-46
Manure Spills.....	3-48
Manure Contingency Plan.....	3-48
Mortality Disposal	3-49
Mortality Disposal Environmental Concerns	3-49
Mortality Disposal Legislation	3-49
Mortality Disposal Beneficial Management Practices	3-52
Livestock Mortality Disposal.....	3-52
Mass Mortality Contingency Plan	3-55

CROPS

Introduction	4-1
Crops and the Environment	4-1
Buffers.....	4-1
Carbon Sequestration	4-1
Cover Crops.....	4-2
Flood Management.....	4-2
Grasses.....	4-2
Integrated Pest Management.....	4-2
Nutrient Cycle	4-2
Soil Erosion Control	4-3
Soil Structure	4-3
Runoff Filtration.....	4-3
Wildlife Habitat	4-3
Outdoor Crops	4-4
Outdoor Crop Environmental Concerns	4-4
Outdoor Crop Legislation	4-5
Outdoor Crop Beneficial Management Practices	4-8
Outdoor Crop Soil Management	4-8
Cover Crops.....	4-8
Contour Cropping	4-9
Crop Rotation	4-9
Buffers.....	4-9
Outdoor Crop Nutrient Management.....	4-9
Outdoor Crop Water Management	4-10
Noxious and Invasive Species Management.....	4-10
Outdoor Crop Management	4-10
Crop Residue.....	4-12
New Crop Development.....	4-12
Stewardship Crops	4-13
Crop Handling.....	4-13
Crop Processing.....	4-13
Crop Waste Disposal	4-14
Crop Storage.....	4-14
Forage Crop Storage	4-14
Indoor and Container Nursery Crops	4-16

Indoor and Container Nursery Crops	4-16
Environmental Concerns	4-16
Indoor and Container Nursery Crops Legislation	4-17
Indoor and Container Nursery Crops Beneficial Management Practices	4-20
Nutrients Applied Through an Irrigation System (Fertigation)	4-20
Noxious Species and Invasive Pests.....	4-21
Soilless Media.....	4-21
Greenhouse	4-22
Nursery.....	4-23
Crop Waste Disposal	4-24

PEST MANAGEMENT

Introduction	5-1
Pest Management and the Environment	5-1
Integrated Pest Management (IPM)	5-1
Noxious weeds	5-1
Pesticides	5-1
Pests	5-2
Invasive Pests	5-2
Pest Management	5-3
Pest Management Environmental Concerns	5-3
Pest Management Legislation	5-3
Pest Beneficial Management Practices	5-7
Integrated Pest Management (IPM)	5-7
Invasive Pests	5-9
Pathogens.....	5-12
Insects and Mites.....	5-12
Weeds	5-13
Wildlife	5-14
Rodents	5-14
Birds.....	5-14
Pesticides	5-15
Pesticide Environmental Concerns	5-15
Pesticide Legislation	5-15
Pesticide Beneficial Management Practices	5-21
Pesticide Applicators Certificate.....	5-21
Pesticide Risks	5-21
Pesticide Transport	5-23
Pesticide Storage Requirements	5-23
Pesticide Storage Recommendations.....	5-24
Pesticide Use.....	5-25
Pesticide and Pesticide Container Disposal	5-29
Pesticide Storage Fires	5-30
Pesticide Spills	5-31
Pesticide Contingency Plan	5-32

NUTRIENT APPLICATION

Introduction	6-1
Nutrient Sources and the Environment	6-1
Amendments.....	6-1
Legumes and Nitrogen Fixation	6-1
Micronutrients and Metals.....	6-1
Nitrogen (N).....	6-2
Nutrient Source.....	6-2
Particle Size	6-2
Phosphorus (P).....	6-3
Potassium (K)	6-3
pH.....	6-3
Salts.....	6-4
Secondary Nutrients.....	6-4
Soil Amendments: Is it a Nitrogen Source or a Soil	

Conditioner?	6-4
Soil Amendment Sources	6-4
Manage as a Nitrogen Source or as a Soil Conditioner?	6-4
Accumulation of Soil Phosphorous	6-5
Contaminants in Soil Amendments	6-6
Nutrient Application	6-10
Nutrient Application Environmental Concerns	6-10
Nutrient Application Legislation	6-10
Nutrient Application Beneficial Management Practices	6-16
Right Source	6-16
Right Rate	6-17
Using the Post-Harvest Nitrate Test to Determine Right Rate	6-18
Right Time	6-18
Right Place	6-23
Nutrient Application Equipment Calibration	6-26
Forage Nutrients	6-26
Horticultural Crop Nutrients	6-27
Risk of Pollution During Nutrient Application	6-27
Nutrient Application Impact on Climate Change	6-30
Crop Monitoring and Nutrient Application	6-30
Nutrient Management Planning	6-30
Environmental Farm Plan Nutrient Management Plan Triggers	6-32
Manure Nitrogen Assessment 1: Farms that Generate Manure	6-33
Manure Nitrogen Assessment 2: Farms that Do Not Generate Manure	6-34

BIODIVERSITY

Introduction	7-1
Biodiversity and Habitat	7-1
What is Biodiversity?	7-1
Benefits of Biodiversity to Agriculture	7-2
Agricultural Landscapes are Important to Biodiversity	7-4
What is Habitat in an Agricultural Landscape?	7-4
Species at Risk	7-6
Impacts of Agriculture on Biodiversity and Habitat	7-7
Biodiversity Plans	7-9
Eight Agricultural Biodiversity Principles	7-10
Aquatic Biodiversity	7-11
Aquatic Biodiversity Concerns	7-11
Aquatic Biodiversity Legislation	7-11
Aquatic Biodiversity Beneficial Management Practices	7-14
Aquatic Habitat	7-15
Aquatic Life and Aquatic Habitat Protection	7-16
Changes In and About a Stream	7-17
Aquatic Life Establishment	7-17
Terrestrial Biodiversity	7-18
Terrestrial Biodiversity Concerns	7-18
Terrestrial Biodiversity Legislation	7-18
Terrestrial Biodiversity Beneficial Management Practices	7-21
Wildlife and Wildlife Habitat Protection	7-22
Wildlife Habitat Establishment	7-22
Plant Biodiversity Beneficial Management Practices	7-23
Livestock Management	7-23
Weeds	7-23
Biodiversity Conflicts	7-24
Biodiversity Conflict Concerns	7-24
Biodiversity Conflict Resolutions	7-25

SOILS

Introduction	8-1
Soil Quality Factors	8-1
Carbon to Nitrogen Ratio	8-1
Compaction	8-1
Drainage	8-2
Organic Matter	8-2
Potential Soil Contaminants	8-2
Micro-Elements and Metals	8-3
Nitrogen (N)	8-3
Phosphorus (P)	8-5
Potassium (K)	8-5
pH	8-5
Salts	8-6
Secondary Nutrients and Micronutrients	8-6
Soil Texture and Structure	8-6
Soil Management	8-7
Soil Management Environmental Concerns	8-7
Soil Management Legislation	8-7
Soil Management Beneficial Management Practices	8-11
Soil Cultivation	8-11
Soil Erosion Risk	8-12
Field Soil Erosion by Water	8-12
Soil Erosion Along Watercourses	8-14
Field Soil Erosion by Wind	8-14
Soil Loss by Harvest	8-15
Nutrient Management	8-15
Leachate Formation in Soil	8-15
Contaminant Movement in Soil	8-15
Soil Contamination	8-18
Soil Compaction	8-19
Soil Organic Matter Content	8-20
Organic Soil Subsidence	8-21

WATER

Introduction	9-1
Water Quality and Quantity Factors	9-1
Contaminants	9-1
Contaminant Pathways	9-3
Oxygen	9-4
Temperature	9-4
Water Withdrawal	9-4
Water Supply	9-5
Water Supply Environmental Concerns	9-5
Water Supply Legislation	9-5
Water Supply Beneficial Management Practices	9-10
Licensing of Water	9-10
Water Volume Requirement	9-11
Fertigation	9-12
Water Quality Protection	9-13
Water Quality Treatment	9-14
Wells and Groundwater Protection	9-14
Domestic Water	9-16
Livestock Watering	9-16
Watering Livestock Directly from Watercourses	9-17
Water Control Structures	9-19
Water Intakes	9-19
Irrigation	9-21
Irrigation Environmental Concerns	9-21
Irrigation Legislation	9-21
Irrigation Beneficial Management Practices	9-24
The Role of Soil in Irrigation	9-25

Agriculture's Contribution to Climate Change	12-5
Farm Activities and Impacts	12-6
Climate Change Mitigation	12-7
Climate Change Environmental Concerns	12-7
Climate Change Mitigation Legislation	12-7
Climate Change Mitigation	
Beneficial Management Practices	12-9
Reduce Energy Use and Inputs	12-10
Replace Fossil Fuels	12-12
Remove Carbon/Restore Vegetative Cover	12-13
Climate Change Adaptation	12-15
Impacts of Climate Change on Agriculture Concerns	12-15
Beneficial Management Practices for Adaptation	12-20

APPENDICES

Legislation & Enforcement	A-1
Introduction	A-1
A.1 Local Government	A-1
A.2 Provincial Government	A-3
A.3 Federal Government	A-20
A.4 Enforcement By Regulatory Agencies	A-24
A.5 Information For Landowners	A-26
Climatic Information	B-1
B.1 Precipitation	B-2
B.2 Peak Irrigation Flow Requirements	B-4
B.3 Annual crop water Requirements	B-6
Publications & Websites	C-1
C.1 Publications and On-line pdfs	C-1
C.2 Websites	C-12
Glossary Of Terms	D-1
Metric Conversion	E-1

LIST OF FIGURES

FIGURE 2.1 Environmentally Sound Building Construction	2-13
FIGURE 2.2 A Well-Planned Above Ground Fuel Storage Facility	2-36
FIGURE 2.3 A Well-Planned Outdoor Composting Facility	2-53
FIGURE 3.1 Biofilter System on an Indoor Livestock Facility.....	3-7
FIGURE 3.2 An Environmentally-Sound Confined Livestock Area – Soil-Based Yard	3-16
FIGURE 3.3 An Environmentally-Sound Confined Livestock Area – Hard-Surfaced Yard	3-18
FIGURE 3.4 An Environmentally-Sound Seasonal Feeding Area.....	3-21
FIGURE 3.5 Leak Detection Under a Manure Storage Facility	3-32
FIGURE 3.6 Typical Solid Manure Storage Facilities	3-34
FIGURE 3.7 Nutrient recovery process on the farm (Source: Hallbar Consulting, 2016).....	3-46
FIGURE 5.1 Pesticide Storage Shed	5-24
FIGURE 5.2 Identifying Aquatic and Terrestrial Buffer Zones	5-28
FIGURE 6.1 Nutrient Application Setbacks to a Watercourse.....	6-24
FIGURE 6.2 Generalized Dry Matter Accumulation versus Time of Year.....	6-27
FIGURE 7.1 Eight Principles of Agricultural Biodiversity	7-10
FIGURE 8.1 Screen shot of the information that can be obtained from the on-line BC Soil Information Finder Tool (SIFT) tool.....	8-2
FIGURE 8.2 Simplified Nitrogen Cycle.....	8-4
FIGURE 8.3 Effect of pH on Availability of Nutrients in Soil	8-5
FIGURE 8.4 Relay Cover Crop in Corn Stubble.....	8-15
FIGURE 9.1 An Outdoor Livestock Water Trough Installation	9-17
FIGURE 9.2 A Managed Access to a Watercourse for Livestock.....	9-18
FIGURE 9.4 Preferred Flow or Macropore Flow (Surface Water Flow Directly to Drain Tiles).....	9-49
FIGURE 9.5 How Buffers Protect Water	9-61
FIGURE 9.6 Leachate Production, Movement and Environmental Risks.....	9-62
FIGURE 10.1 Farm emissions sources	10-4
FIGURE 10.2 Example of vegetative buffer objectives.....	10-16
FIGURE 10.3 Effect when buffer vegetation is too dense (low canopy porosity).....	10-16
FIGURE 10.4 Vegetative Buffer Around Ventilation Exhaust.....	10-19
FIGURE 11.1 Relationship between Buffers and Riparian Areas	11-3
FIGURE 11.2 Suggested Manure Application Buffer Widths Depending Upon Risk of Activity	11-10
FIGURE 11.4 Tree Windbreak	11-12
FIGURE 11.5 Approximate Reduction of Wind Velocity by a Single-Row Windbreak.....	11-12
FIGURE 11.7 Examples of Functioning Conditions of Riparian Areas	11-23
FIGURE 12.1 A simplified representation of the greenhouse effect	12-3
FIGURE 12.2 Schematic relationship between agriculture and climate change adaptation and mitigation.....	12-3
FIGURE 12.3 Example of an agricultural carbon cycle	12-4
FIGURE 12.4 Mitigation options include reduce, replace, and remove/restore approaches.....	12-9
FIGURE 12.5 Five step adaptive planning and management process.....	12-17

LIST OF TABLES

TABLE 2.1	Building and Facilities Setbacks from Watercourses for Riparian Protection and Drinking Water Protection in Farming Areas	2-11
TABLE 2.2	Fuel Loss Beneficial Management Practices	2-38
TABLE 2.3	Emissions regulation limits for Boilers and Heaters Fuelled by Biomass	2-59
TABLE 2.4	Boiler Capacity Conversion to Megawatts	2-60
TABLE 3.1	Typical Outdoor Area Terms for Livestock Groupings	3-13
TABLE 3.2	Basic Pasture and Range Assessment Questions	3-23
TABLE 3.3	Average Daily Livestock Waste Production and Suggested Storage	3-37
TABLE 3.4	Efficacy of Covered Manure Storage Options for Emission Reduction	3-43
TABLE 3.5	Mortality Disposal Options Based on Cause of Death	3-53
TABLE 5.1	Steps to Developing an Integrated Pest Management (IPM) Plan	5-10
TABLE 5.2	Example of a Buffer Zone on a Pesticide Label	5-27
TABLE 5.3	Hazardous Waste Regulation for Empty Pesticide Containers	5-30
TABLE 6.1	Phosphorus: Converting P to/from P_2O_5	6-3
TABLE 6.2	Potassium: Converting K to/from K_2O	6-3
TABLE 6.3	Management of Soil Amendments Based on Carbon-to-Nitrogen Ratio	6-5
TABLE 6.4	Managing On-Farm Soil Amendment Sources as Nitrogen Sources or Soil Conditioners	6-7
TABLE 6.5	Managing Off-Farm Soil Amendment Sources as Nitrogen Sources or Soil Conditioners	6-8
TABLE 6.6	Setback distances required for Application of Nutrient Sources	6-12
TABLE 6.7	Timing Manure Applications to Match Crop Nitrogen Requirements in Coastal Regions	6-19
TABLE 6.8	Timing Manure Applications to Match Crop Nitrogen Requirements in Interior Regions	6-20
TABLE 6.9	Monthly Manure Spreading in Coastal Regions and High Precipitation Areas Relative to Environmental Risks of Contaminating Surface and Drinking Water	6-21
TABLE 6.10	Monthly Manure Spreading in the Interior region Relative to Environmental Risks of Contaminating Surface and Drinking Water	6-22
TABLE 6.11	Liquid Manure Application Methods by Order of Preference	6-25
TABLE 6.12	Solid Manure Application Methods by Order of Preference	6-25
TABLE 6.13	Components of a Nutrient Management Plan (NMP)	6-31
TABLE 6.14	Baseline Values Used for Assessing the Requirement for a Nutrient Management Plan (used in Worksheets #4, #5)	6-32
TABLE 6.15	Assumed Annual Manure Nitrogen Excretion Values and Manure Nitrogen Concentrations in Storage for Various Animal Types	6-35
TABLE 8.1	Factors that Affect Risk of Contaminant Leaching	8-16
TABLE 8.2	Soils with saturated hydraulic conductivity of more than 10^{-3} cm/second	8-17
TABLE 8.3	Suggested Concentration Limits of Metals in Nutrient Sources and Soils	8-19
TABLE 9.1	Screen Mesh Open Area	9-19
TABLE 9.2	Irrigation Water Quality Guidelines	9-26
TABLE 9.3	Irrigation System Application Efficiency	9-28
TABLE 9.4	Steps to Complete an Irrigation System Assessment	9-31
TABLE 9.5	Crop Adjustment Factors for Trickle Irrigation Systems	9-36
TABLE 9.6	Drought Response System	9-67
TABLE 10.1	Agricultural Air Emission Sources	10-9
TABLE 10.2	Relative effectiveness of vegetative buffers	10-16
TABLE 10.3	Materials Prohibited from being burnt under the Open Burning Smoke Control Regulation	10-28
TABLE 11.1	Farm Activity and Buffer Type	11-8
TABLE 11.2	Basic Riparian Assessment Questions	11-20
TABLE 12.1	Greenhouse gas emissions for various fuels and energy types used on farm	12-10
TABLE B-1	October to March or April Precipitation That May Need to be Stored for Various BC Locations	B-3
TABLE B-2	Estimated Peak Irrigation Flow Rate Requirements for Various BC Locations	B-5
TABLE B-3	Estimated Annual Crop Water Requirements for Various BC Locations	B-7

LIST OF WORKSHEETS

#1 Determining Suitability and Size	3-15
#2 Sizing Liquid Manure Storage.....	3-39
#3 Sizing Solid Manure Storage	3-41
#4 Manure Nitrogen Application Assessment for farms that Generate Manure	6-33
#5 Manure Nitrogen Application Assessment for farms that Use Manure but do not Generate Manure	6-34
#6 Screen Area Check for Fishery Requirements of Water Intakes	9-20
#7 System Peak Flow Rate Check - Sprinkler	9-33
#8 System Peak Flow Rate Check - Trickle.....	9-34
#9 Annual Water Use Check -Sprinkler	9-38
#10 Annual Water Use Check - Trickle.....	9-40
#11 Confined Livestock Area, Determining Volume of Contaminated Runoff from Outside Yard	9-56
