Agricultural Land Inventory: Regional District of North Okanagan 2026

Survey includes ALR and other parcels with observed farmland.

The BC Ministry of Agriculture and Food, and the Partnership for Water Sustainability in BC are completing an Agricultural Land Inventory (ALI) across the Regional District of North Okanagan (RDNO).

The ALI program started in Pitt Meadows in 1996 to support the Ministry's Strengthening Farming Program. Since then, ALIs have provided insight into the current state of the farming landscape across the province, including within the Agricultural Land Reserve (ALR).

To complete an ALI, Professional Agrologists and GIS technicians perform visual observations to help confirm mapped crops, irrigation, natural vegetation, buildings, livestock facilities, and farm practices within the ALR and parcels where significant farming is observable.

BC Plate XN 3725

Visual observations are conducted using public roads from a **white or grey Chevy Silverado** marked with "Ministry of Agriculture and Food" signs.

Agricultural Land Inventory data has been used to:

- Model potential impacts of climate change and different adaptation strategies;
- Model agricultural water demand for current and future climates;
- Inform the development of municipal Official Community Plans and Agriculture Area Plans;
- Understand the extent of actively farmed land and other major activities on the ALR land base; and
- Understand impacts to agriculture from new developments, bylaws, or regulations.

BC Plate XP 4460

Watch for survey crews making frequent stops between the hours of 7:00 a.m. to 6:00 p.m. across the region from **June 15th to June 26th**.
