# **LIMITATION OF LIABILITY AND USER'S RESPONSIBILITY**

The primary purpose of this manual is to provide irrigation professionals and consultants with a methodology to properly design an agricultural irrigation system. This manual is also used as the reference material for the Irrigation Industry Association's agriculture sprinkler irrigation certification program.

While every effort has been made to ensure the accuracy and completeness of these materials, additional materials may be required to complete more advanced design for some systems. Advice of appropriate professionals and experts may assist in completing designs that are not adequately covered in this manual.

All information in this publication and related materials are provided entirely "as is" and no representations, warranties or conditions, either expressed or implied, are made in connection with your use of, or reliance upon, this information. This information is provided to you as the user entirely at your risk.

The British Columbia Ministry of Agriculture and the Irrigation Industry Association of British Columbia, their Directors, agents, employees, or contractors will not be liable for any claims, damages or losses of any kind whatsoever arising out of the use of or reliance upon this information.
