

**Pesticide Registration Numbers.** All pesticides registered in Canada must have a pesticide registration number. This number is listed on the product label. Many buyers are now requiring that growers record this number in their spray records. The following table lists the registration numbers of products recommended in this guide. For some pesticides, many formulation options are available and all registration numbers may not appear on this list. Read the label to ensure the product is registered for the proposed use.

MOA Group	Trade Name	Common Name	USE	Registration		Registered Crops
