Pollination	Insufficient data at this time
Frost Susceptibility	Insufficient data at this time
Excessive Soil Moisture Tolerance	Insufficient data at this time
Disease/ Insect Susceptibility	Insufficient data at this time
Trellising	Recommended

Blueberry Management Guide

Variety: Calypso

Machine/Hand Harvest	Fruit hangs onto bush well, but is expected to machine-pick
Yield/Timing	Late mid-season, between Liberty and Bluecrop
Market	Intended primarily for fresh
Berry Flavour	Good flavour Has been noted in some trials to have poor texture.
Fruit Size	Medium-large
Firmness	Very firm
Shelf life	Insufficient data at this time
Colour	Medium blue
Scar Quality	Possibility that fruit skin may tear at harvest if plants under-irrigated
Other Comments	Needs further evaluation to determine performance and best management practices in our region
