## Animal Health Centre Calf Scours Package

Test	Fee
Calf Scours Package*	\$110.00

\*The Calf Scours Package is for fecal samples from scouring calves affected during the first two weeks of life (excluding necropsy cases). Sample eligibility includes scouring calves that are zero to two weeks old as well as calves that are over two weeks of age but where scours originally developed during the first 2 weeks of life.

The package includes the following tests: culture and sensitivity, which includes enriched *Salmonella sp.* culture, polymerase chain reaction (PCR)-based typing of *E. coli* to detect enterotoxigenic and enteropathogenic strains, direct fecal smear for *Cryptosporidium spp.*, and PCR testing for rotavirus and coronavirus.

This package represents a 36% savings over ordering these tests individually. Order the package by indicating "Calf Scours Package" in the "Other" section under "Services Requested" in the Mammalian Submission Form.
