	<p>Ministry of Energy Mines and Low Carbon Innovation</p> <p><i>Issued: August 2015 Revised: October 2021</i></p>	<p>Renewable and Low Carbon Fuel Requirements Regulation</p> <p>Part 3 (Low Carbon Fuel) Credit and Debit Transfers</p> <p>Information Bulletin RLCF-013</p>
---	--	--

Background information

Under the [Greenhouse Gas Reduction \(Renewable and Low Carbon Fuel Requirements\) Act](#) (Act), a Part 3 fuel supplier's compliance with the low carbon fuel requirements of the [Renewable and Low Carbon Fuel Requirements Regulation](#) (Regulation) is calculated in terms of credits for low carbon fuels and debits for high carbon fuels as specified by section 6 of the Act. Fuel suppliers may transfer debits and validated credits in order to achieve compliance with the low carbon fuel requirements.

Credit validation

Before credits can be transferred they must be validated by the Director. Credits are most commonly validated through the submission of an annual Compliance Report that includes a net credit balance. For more information, refer to [Information Bulletin RLCF-003 – Compliance Reporting Requirements](#).

Credits that are awarded to fuel suppliers for the completion of milestones under Part 3 Agreements are valid when they are awarded.

Fair market value

All credit and debit transfer proposals must include a “fair market value” of any consideration, under section 11.11 (2) (c) (iv) of the Regulation. Transfers that the Director considers are underestimating “fair market value” or those using a “zero dollar” value must include a written explanation justifying the use of the identified credit or debit value.

Approval of transfers

All credit and debit transfers must be approved by the Director. Part 3 fuel suppliers may apply for the approval of transfers through the [Transportation Fuels Reporting System](#). The transfer of credits or debits will take effect on either the date on which the transfer is approved by the Director, or a date specified in the Credit Transfer Proposal, whichever is later.

Reporting transfers in a Compliance Report

The Low Carbon Fuels Branch will be proposing amendments to the Act and Regulation that would eliminate the requirement to report credit and debit transfers in compliance reports. Until these amendments are in place, compliance reports must include the approved credit and debit transfers that took place in the compliance period for which the report applies. Effective November 2019, credit transfers processed through the Transportation Fuel Reporting System are automatically reported with submission of your Compliance Report.

Credit Transfer Proposals that are approved between January 1 and March 31 can be included in a fuel supplier's compliance report for the previous compliance period, and therefore can be used to offset debits accrued in the compliance period to which the compliance report relates. For more information on compliance reporting, refer to [Information Bulletin RLCF-003 – Compliance Reporting Requirements](#).

Recognized Part 3 Fuel Suppliers

The following table lists the Part 3 fuel suppliers that have been recognized by the Ministry. Contact information is provided with the permission of the organization. The information provided is for convenience only and is accurate at the time of publication. It is recommended that each organization interested in credit transfers confirm with their trading partner their current status as a Part 3 Fuel Supplier.

Organization Name	Contact for Credit Transactions
