

Background

The Director has published a system for categorizing or describing fuels under section 6.3 of the Renewable and Low Carbon Fuel Requirements Regulation (Regulation). Each Carbon Intensity Record (see Information Bulletin RLCF-006 Carbon Intensity Records) or report referred to in section 6.2 (2) of the Regulation that provides information on a Part 3 fuel must identify the fuel by either the fuel type listed in the table below or an acceptable alternative identified in the table below.

The reports referred to in section 6.2 (2) of the Regulation include:

- Part 2 compliance reports,
• Part 3 compliance reports,
• Supplementary reports under section 3 (2) or 7 (2) of the Greenhouse Gas Reduction (Renewable and Low Carbon Fuel Requirements) Act (Act),
• Exemption reports,
• An exclusion report under section 11.032 (1) of the Regulation,
• An application for validation of credits under section 11.101 (1) of the Regulation,
• A Credit Transfer Report under section 29 of the Regulation, and
• Carbon Intensity Records, either in one of the above reports or under section 6.2 (1) of the Regulation.

A report that does not adhere to the Director's system for categorizing or describing fuels will be in contravention of section 6.3 of the Regulation and may be subject to an administrative penalty of up to \$100,000.

System for Categorizing or Describing Fuels

The following table contains the names recognized by the Ministry for categorizing and describing fuels.

Table with 2 columns: Type of fuel as specified by the Act or Regulation, and Acceptable alternatives. Rows include biodiesel fuel, CNG, diesel fuel produced from biomass, electricity, ethanol produced from biomass, hydrogen, hydrogenation-derived renewable diesel fuel, LNG, natural gas-based gasoline, petroleum-based diesel fuel, petroleum-based gasoline, propane, and gasoline produced from biomass.
