

Tailgate Training for LPC supervisors to review with workers

Worker Awareness Card

Before starting work, you should be aware of...

ENVIRONMENT MANAGEMENT SYSTEM (EMS)

Complete a pre-work with your supervisor and understand your role.

Have a project plan and map available and know your location at all times.

Know which Environmental Field Procedure (EFP) cards apply to you, review them and have them available.

Be prepared for environmental emergencies and know location of response equipment (spill kits, fire equipment).

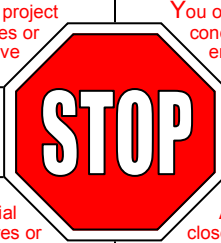

STOP WORK AND CONTACT YOUR SUPERVISOR IF:

You're uncertain of the project plan, your responsibilities or hazardous/ sensitive areas.

You observe unfavourable conditions that could cause environmental damage.

A previously unidentified resource feature is found.

Species at risk sightings.

Hazardous material spills, uncontrolled fires or landslides occur.

Any safety hazards, close calls/ near misses or accidents that occur.

BCTS IS CERTIFIED UNDER THE SFI® STANDARD

The 2015-2019 Sustainable Forest Initiative® (SFI) standard is based on a set of principles, including:

Environmentally Appropriate

Socially Beneficial

Economically Viable

Legally Compliant
