

Field Card for use by LPC supervisors to support worker EMS and SFM training

BEFORE STARTING WORK KNOW ABOUT:

1. Environmental and Sustainable Forest Management Policies

- Complying with the law.
- Prevent & minimize impacts on the environment.
- Practice of sustainable forestry.
- Recognition and respect for indigenous rights
- Continuous Improvement

2. Emergency Response Plan

- Know your eERP roles and responsibilities.
- Be prepared for emergencies i.e. fire, spills and erosion events.
- Know location of applicable ER equipment (spill kit, hand tools, fire suppression).

3. Environmental Field Procedures

- EFP #1 “General” applies to all workers.
- EFP #2 “Supervisors” applies to project and/or onsite supervisors.
- EFP #3 “Developing & Planning” applies to planning & development activities.
- EFP #4 “Roads Bridges and Major Culverts” applies road construction, maintenance, inspections and deactivation activities.
- EFP #5 “Harvesting” applies to all phases of harvesting activities.
- EFP #6 “Fuel Handling” applies to fuel handling activities.
- EFP #7 “Dryland Sort” applies to dryland sort activities.
- EFP #8 “Marine Log Handling Facilities” applies to construction & operations of log dumps, helicopter water drop zones, and direct barge-loading facilities.

Ensure all workers are familiar with the EFPs that apply to their roles and responsibilities before starting work. Copies available from your supervisor or BCTS representative.

4. Stop Work Procedures (See EFPs)

If not sure, Stop Work and contact your project supervisor or BCTS representative.

5. What to report to Supervisor and BCTS

- Hazardous Material Spills, Uncontrolled Fires & Erosion / Landslide Events.
- Potential non-compliances and non-conformances.
- Unidentified resource features, values, or sensitive areas e.g. Karst, Bear dens, culturally modified trees
- Species of Management Concern sightings.
- Changes to project plan.
- Safety hazards, close calls/near misses, or accidents.
- STOP Work situations
