

Staff Training Matrix

EMS Table 008-02/ Safety Appendix 13-1

Course Name	Priority of Training* H / M / L	Course Duration # of days	Target audience Rationale to support retraining frequency & degree of training recommended	Retraining Frequency & Direction	Trainer/Retainer Qualification**
Accident Incident Investigations (PSA course)	H/M	1 day	OH&S regulations requires all incidents and accidents to be investigated, therefore, each business area and headquarters needs 2-3 people trained in accident investigation to conduct investigations	5 years recommended ³	All training delivered by PSA or qualified trainer ¹
Advanced Incident Investigation Training (BCFSC Course)	H/M	1 day	Required for staff with basic investigation training to manage and investigate serious workplace incidents.	5 years recommended ³	All training delivered by an certified and experienced BCFSC trainer ²
ATV/ Motorcycle Safety Training	H/M	1 day	Required for all staff with field work component in position duties that requires use of this equipment	5 years recommended ³	All training delivered by qualified trainer ¹ ATV Trainer classification through the BC Forest Safety Council

H= Critical to EMS / SFM / Safety Program Function

M= Supports control for common hazards

L= Supports control for lower risk and less common hazards

Competency reviews can be used to determine training frequency after initial training

****Trainer/Retrainer Qualifications**

1) Qualified trainer determined by BCTS

2) Certified Trainer is qualified by another identified body recognizing the qualification of the party to deliver the specified training

3) Definition of Recommended Retraining: Supervisors can provide some flexibility based on Safety Competency Evaluations (see Chapter 13 BCTS Safety Manual) in consideration of the risk of the activity, employee input and experience.
