

# Notice of Intent to Treat:

## **PEST MANAGEMENT PLAN #2017-2021-4 CONFIRMATION #402-0672-17/22**

The Ministry of Forests, Lands, Natural Resource Operations and Rural Development, Cariboo Region, is planning to aerially treat up to 17,000 hectares of Douglas-fir forest to reduce the populations of the western spruce budworm (*Choristoneura freemani*).

The biological insecticide Foray 48B (*Bacillus thuringiensis var. kurstaki*) will be applied by aircraft once on each site on or about June 5 to July 5, 2019 depending on weather conditions.

The following proposed treatment sites are located within the 100 Mile House District and the Cariboo-Chilcotin District.

### **Williams Lake Timber supply area:**

- White Lake area west of Williams Lake
- Meldrum area west of Williams Lake
- Till Lake south west of Williams Lake
- Lower Meldrum south west of Williams Lake
- Felker Lake south of Williams Lake
- Colpitt south of Williams Lake

### **100 Mile House Timber Supply Area:**

- Canoe North east of 100 Mile House

All sites proposed for treatment are covered by the Southern Interior Area Forest Health Program Pest Management Plan # 2017-2021-4, confirmation #402-0672-17/22. The pest management plan and maps of the treatment areas may be viewed at:
