

LEXIS 2.11 ENHANCEMENTS for Staff/Industry Users

(Release scheduled for June 27, 2024)

APPLICATION for Exemption updates:

****REQUIRED for all XML file submissions**** – Effective with the launch of LEXIS 2.11, uploading all XML file submissions requires users switch to LEXIS Schema 3. This replaces LEXIS Schema 2 to accommodate the longer description of "Location of Logs" in exemption applications. Files not employing Schema 3 will be rejected. Includes both Federal and Provincial exemption applications. [Accurately advertised description.](#)

*For advertising, the **Location of Logs description** is increased* – LEXIS will now accommodate up to 250 characters in the "Location of Logs" description on the Items tab of all new exemption applications. This is an increase from 50 characters, which forced some clients to greatly abbreviate the location details. The longer description will be accommodated on the PDF version of the weekly Advertising List. [Accurately advertised description.](#)

PERMIT Requests:

*Fees tab updated with **new columns*** – The Fees tab on the permit request has been improved to display all components relevant to the Fee in Lieu (FiL) of Manufacture calculation with a column for each factor. It will be easy to see how the fees are calculated using the AMV, volume, FiL% and MF, where relevant. Should the total fee for the permit need to be calculated outside of LEXIS, the 'Override Fees?' will be Yes and the fee values for each line of scale will be blank as they are no longer relevant to the calculation of the permit fee. Note that permits created prior to LEXIS 2.11 will have the new layout but will only display fees as shown at the time the permit was originally created. [Accurate and consistent information.](#)

*Fees tab updated with **Exemption Override Fee*** – When a Blanket OIC Exemption has a set Exemption Override Rate per cubic metre, the Override Rate will now display as the 'AMV (\$/m3 CAD)' on the permit Fees tab, with an indicator when the Override Rate is in effect. [Accurate and consistent information.](#)

Editing SHIPPING information on completed permit:

Client to edit Shipping Information – Clients can edit more info on Shipping tab on permits in Completed status using the Update button to save. The revised shipping information will be immediately available to print/save the corrected Provincial Permit. Simply make the change(s) then select the Update button to save. Ease of access for client, ministry staff, and Export Canada staff. [Time saver and convenience.](#)
