Amount of Old Growth Technical Advisory Panel (TAP) Priority Areas for Deferrals Harvested, by TAP Priority At-risk Old Growth Type			
TAP At-risk Old Growth Type	Total TAP Priority Areas for Deferrals (ha)	TAP Priority Areas for Deferrals harvested since Nov 2021*** (ha)	TAP Priority Areas for Deferrals harvested since Nov 2021 (% of At-risk Old Growth type total)
Ancient Forests	384,491	2,563	0.7%
Remnant Ecosystems (but not Ancient Forests)	513,627	5,991	1.2%
Big-Treed Old Growth (only)	1,680,002	24,864	1.5%
Total	2,578,120	33,418	1.3%

* Harvest reporting date - Change detection as of September 30, 2024, and RESULTS submissions as of January 2025

** The increase in the reported amount of TAP areas harvested since the previous update are due to a combination of: 1) harvest that has occurred since the harvest reporting date used in the previous update, and 2) harvest that occurred prior to the harvest reporting date used in the previous update that has since been entered into the government silviculture tracking system.
