**Subject:** SAVE THE WORKING FOREST FOR ALL GENERATIONS PETITION

Good Afternoon, Al and Garry

My name is Carl Sweet. I am a supplier to the Forest Industry in Campbell River. I have been lucky enough to chat with you gentlemen on a few occasions. The first time with the Inland Group in Campbell River and the second with the TLA board on a conference call. Thank you for both those opportunities to express concern for the future of old growth logging. I have also written a letter on my own families behalf. Today I reach out to you one last time

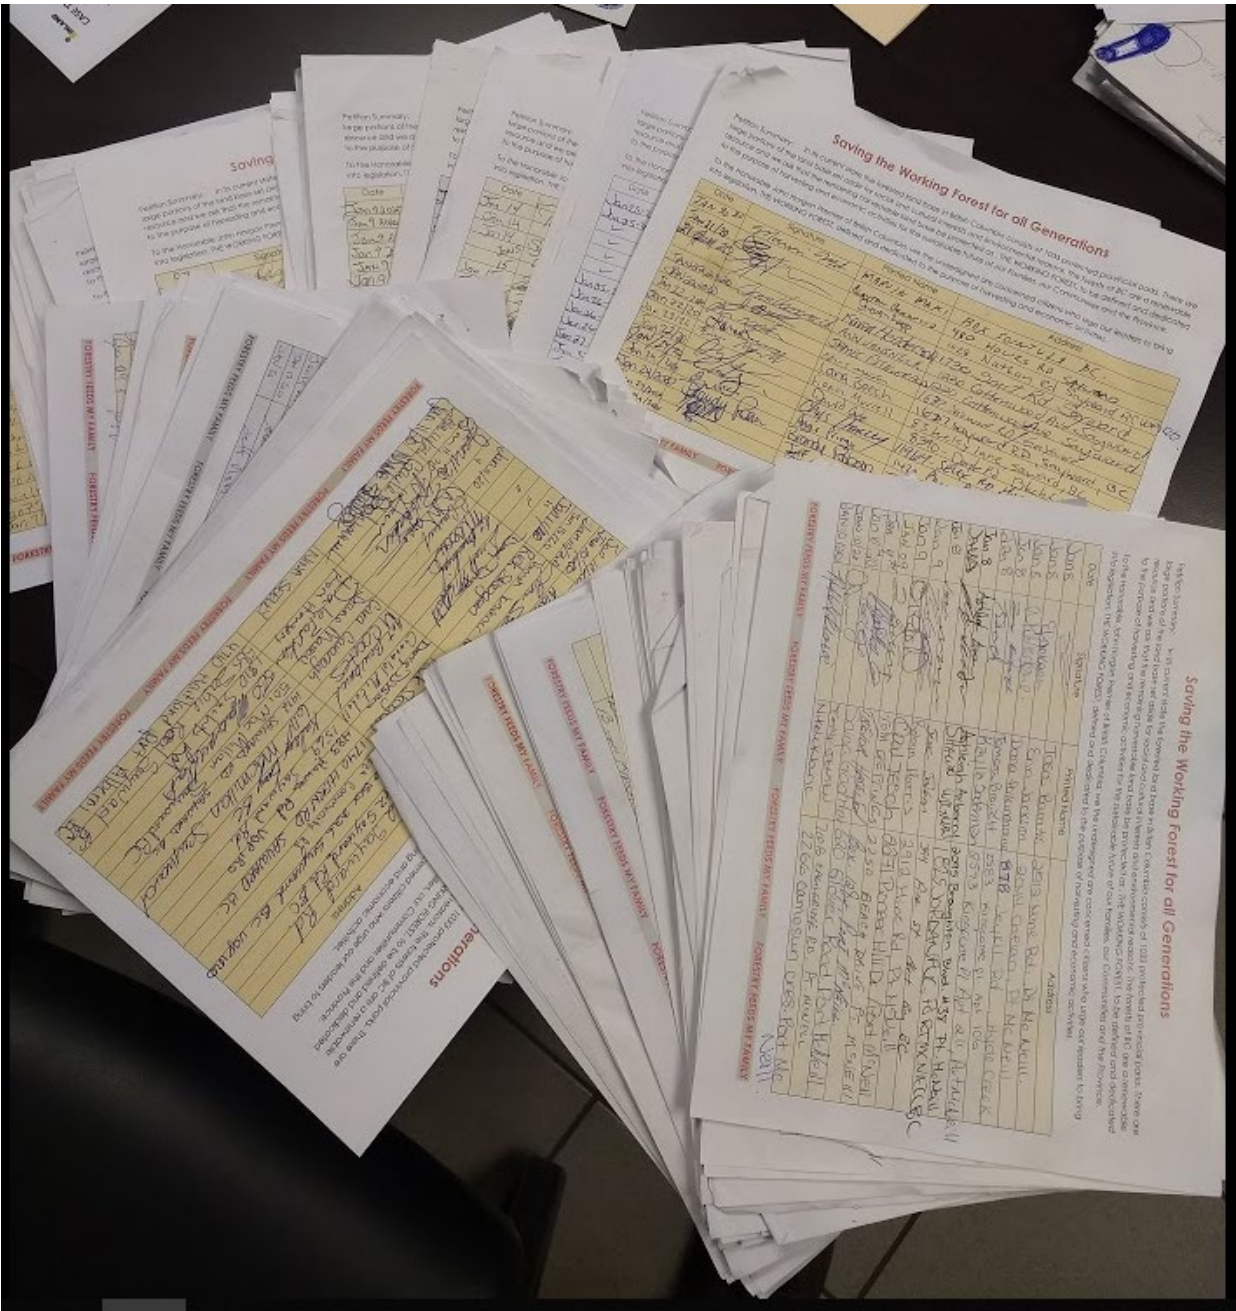

Attached is a Petition that has been created at a Grass Roots level in Campbell River. **SAVING THE WORKING FOREST FOR ALL GENERATIONS**. I have attached a blank Petition but also have attached a picture of over 2000 signatures we have gathered in 4 weeks. We have many many many more signatures coming. I wanted to send you this form to let you how many people rely on and support the continued harvesting of old growth. We are asking that government looks at protecting the working forest in its current state and not remove any more area from the harvestable land base.

We are currently planning to deliver this petition in full with all of our signatures to Government on Feb 18<sup>th</sup> 2020 (in Victoria) in the form of a pro forestry rally. Hope to see you there.

I am hoping we will be successful in receiving 5000 signatures from all corners of this province to protect the land base we harvest. I just wanted to submit to you guys what we have today as it will show strong support for the protection of the working forest for future generations of logging families.

Thank you for the opportunity to express what forestry and Old Growth means to me.

Sincerely Carl Sweet
