Nolan Forest management
3058 Phillips Road
Sooke BC

31/01/2020

Dear Sirs,

Nolan forest Management has contracted for majors, salvaged, selective logged using helicopters & skidders, worked private lands and purchased forested land for last 40 years to make a living in working forests.

I would like to propose a few more recommendations to your list of 16:

Potential Recommendation # 17: Educate the general public that forests are Dynamic (grow and die on their own) and not Static like depicted by environmental groups.

Potential Recommendation # 18: Introduce a mandatory Common Sense test requiring a minimum pass for politicians to be eligible for office. You can't teach or learn common sense.

Potential Recommendation # 19 BCFS should be given all the necessary tools no matter the cost to be able to attain all inventory goals in these recommendation's. Without outside interference, impartial unpolitical inventory with our BCFS foresters leading the way.

There is an incredible potential for this province to prosper in the new carbon economy and we have the tools and expertise to build such a carbon economy from our wood waste.

All of us working in the forests of BC have a huge respect for the land and are "boots in the bush" everyday loving every second of it, you would not like it so much, just let us be.

Thank you,

Eric, Jack Nolan,

Owner Nolan Forest Management
