Subject: Old Growth Forests Needs Protection

1. The last remaining Old Growth Forests of British Columbia needs immediate protection from continued cutting. The existing protected areas of OldGrowth Forests are disproportionate and inadequate to support the requirement for the overall natural ecological stability of British Columbia. The rate of regenerated OldGrowth Forest is negligible compared to the rate of cutting and elimination of Forests with Old Growth Attributes; that provide biological health and diversity for indigenous plants, trees, bird, aquatic, mammal, and other wild life, plus the quantity and quality of drinking water essential for the health and well being of all

British Columbia's inhabitants. The B. C. Ministry of Forests along with B.C. Timber Sales and whoever else is responsible for allowing the continual cutting of OldGrowth Forests has to STOP; before there will not be enough remaining to provide the environmental balance pivotal to the province of British Columbia's survival. Do Not Delay in preventing the needless destruction of what makes British Columbia Beautiful. Thank you, Phil Makow.
