

# Version 4.20 - April 01<sup>st</sup>, 2021

This release for ECAS includes minor enhancements for Coast appraisals and fixes for bugs that have appeared since the last release.

The updates in this release bring ECAS in line with new policy for the Coast which will be effective April 1<sup>st</sup>, 2021.

## **Coast Appraisal Updates**

- New Administration Levy and Silviculture Levy numeric fields available on Control screen (ECAS32). Fields/values display on Stumpage Rate Summary page.
- Update to the validation rules and stumpage calculation logic of Specified Operations code FRZ. The code availability in the drop-down list will be restricted to appraisals with cruise type Cruise Loss Factor (ECAS34).
- Update to allow the Reappraisal Reason drop down menu to be available (ECAS30) after an appraisal copy is executed for a Redetermine Appraisal action.
- Update so that the fields under 'Upset stumpage rate under the Cam' section on ECAS42 correctly displays on BC Timber Sales Section of ADS report.
- Update to the label 'Heli Selection (excludes HSSSS)' to 'Heli Selection' (ECAS33).
- Update the initial grade percent default value to be zero for any species selected (ECAS44).

All these changes will be reflected in the Technical Specifications for ECAS.
