

# Version 4.22 - December 15<sup>th</sup>, 2021

The updates in this release bring ECAS in line with current policy for the Coast which will be effective December 15<sup>th</sup>, 2021.

## Coast Appraisal Updates

- Reconfiguration of Coast Specified Operations (SO)
  - ❖ ECAS34 - Specified Operations  
ECAS will accept and store the source data elements for the determination of the applicable adjustment based on the current adjustment rate:
    - applicable volume fractions (0.01 – 1.00) will be submitted for:
      - Barging - GRIS (BGG)
      - Barging - Non-GRIS (BGN)
      - Clayoquot Sound (CS)
      - Ecosystem Based Management (EBM)
      - Inland Water (IW)
    - Tree Crown Modification operations (TCM) will submit numbers of old growth and second growth trees
    - Specified operations of Miscellaneous type (MSC) will still be submitted with a rate (\$/m3)
- Fibre Recovery Zone (FRZ)
  - ❖ ECAS30 - Reference Information  
ECAS will store and accept the applicable volume fraction for FRZ (0.00 – 1.00)

## Interior Appraisal Updates

- ECAS73 - PHARM Risk Assessment  
A few minor updates and fixes

All these changes will be reflected in the Technical Specifications for ECAS.
