

Version 4.29 - June 17th, 2024

This release includes updates for interior policy, effective July 1st, 2024, as well as bug fixes and minor enhancements.

Interior Appraisal Updates

- Sampling Error % (on ECAS63) – Upper Limit has been raised from 100.0 to 999.9.
- Cultural Burning and Root Disease Control
 - Two new fields have been added to ECAS63:
 - Is Cultural Burning required? (Y/N)
 - Cultural Burning Cost (\$/m³)
 - Attachments (ECAS70) - Options have been added for Cultural Burning and Root Disease Control
 - XML & Save Validations have been added for Cultural Burning as it is a mandatory field, and when required a Cost needs to be entered.
 - Additionally Submit Validations have been added for the Attachments. When Cultural Burning or Root Disease Control are required the corresponding attachments are needed.
- Enhanced Silviculture Plan Codes – Two new codes have been added:
 - LND – Lakes TSA of Nadina District (FSP 651)
 - NRD – Stuart Nechako NRD portion of the Prince George TSA (FSP 999)

Coast Appraisal Updates

- Coast PHARM Risk Assessment screen (ECAS48) will be displayed without error for Appraisals with multiple Timber Marks
- Coast Appraisals with an Effective Date Prior to January 1st, 2024 should no longer throw any errors in relation to the Cutblock Merchantable Area fields on ECAS33 (this field is displayed on Appraisals dated Jan 1st, 2024 and later).

These changes will be reflected in the Technical Specifications for ECAS.
