To: Regional Executive Directors

From: Allan Bennett, Director, Timber Pricing Branch

Re: Revision to the Scaling Manual – Amendment No. 3

I hereby approve the revision to the Scaling Manual and attach a link to the Scaling Manual for your use:

http://www2.gov.bc.ca/gov/content/industry/forestry/competitive-forest-industry/timber-pricing/timber-scaling/timber-scaling-manual

The change reflects Timber Pricing Branch policy and process for scanner scaling in Chapter 13.

The business process remains the same.

The revision is effective May 3, 2018. Further amendments or revisions to this manual require my approval.

Allan W. Bennett, RPF
Director
Timber Pricing Branch

13.3.10 Relative Variance of a Population (From a Sample) ......................... 13-22
13.3.11 Combining Strata .................................................................................. 13-23
13.3.12 Dividing Strata (Splitting of Strata) .................................................. 13-23
13.4 Automated Scale Sites (not operated by a Timber Weigher).................. 13-24
13.5 Scanner Scaling .......................................................................................... 13-24

14 Weight Scale Sampling

14.1 Setting Up the Sampling Plan ................................................................. 14-3
14.1.1 Defining the Weight Scale Population ............................................... 14-3
14.1.1.1 The Sampling Plan ........................................................................ 14-4
14.1.2 PSY ........................................................................................................ 14-5
14.1.3 Setting the Sampling Objectives ...................................................... 14-5
14.1.3.1 Sampling Objectives .................................................................... 14-5
14.1.3.2 Precision Requirements ................................................................. 14-5
14.1.4 Stratification to Meet the Sampling Objectives .................................. 14-6
14.1.4.1 Why We Stratify .......................................................................... 14-6
14.1.4.2 How are the Objectives of Stratification Met ............................... 14-6
14.1.4.3 Common Stratification Methods .................................................. 14-10
14.1.5 Determining and Allocating the Sample Size .................................... 14-12
14.1.5.1 Subsampling .................................................................................. 14-14
14.1.6 Selecting and Processing Samples .................................................... 14-14
14.2 Monitoring Sampling Plan Progress and Weight Scale Results ............ 14-16
14.2.1 During the Sampling Year ................................................................. 14-16
14.2.2 At Year-end ....................................................................................... 14-16
14.3 Managing the Sampling Plan ................................................................. 14-19
14.3.1 Management Responsibility .............................................................. 14-19
14.3.2 Revising the Sampling Plan ............................................................... 14-19
14.3.3 Sample Plan Revisions ..................................................................... 14-20
14.3.4 Options .............................................................................................. 14-21
14.3.4.1 Stratum 01 ................................................................................... 14-22
14.3.4.2 Stratum 02 ................................................................................... 14-22
14.3.4.3 Stratum 03 ................................................................................... 14-23
14.3.5 Sampling Plan Amendments ............................................................. 14-23
14.3.6 Standard Deviations .......................................................................... 14-23
14.4 Operational Procedures to Ensure Sampling Plan Integrity ................. 14-25
14.4.1 Inspecting Loads Before Weighing .................................................... 14-25
14.4.2 Processing the Load .......................................................................... 14-25
14.4.2.1 Previously Scaled Timber ............................................................ 14-25
14.4.2.2 Unscaled Timber ........................................................................ 14-26
14.4.3 Managing Sample Loads .................................................................. 14-26
14.4.4 Loads Not Suitable for the Sample Plan ........................................... 14-27
14.4.5 Importance of Accurate Stratification .............................................. 14-28
14.4.6 Testing of Weight Scales for Accuracy (Eccentricity Test) ............... 14-28
14.4.7 Records Management at a Weight Scale ........................................... 14-30
13.4 Automated Scale Sites (not operated by a Timber Weigher)

- All truck weighing and weighing equipment must comply with both the automated and the non-automated scale site authorization requirements.
- All samples selected must have an audio-visual method of informing industry/ministry staff that a load has been selected as a sample.
- Cameras must be placed strategically to capture the truck and entire load on the scale, drivers entering load information, required sample information being captured and the sample unloaded to ensure load integrity.
- If timber is not automatically stratified by timbermark when the load information is entered in the scale site software, the person responsible for stratification must be tested and appointed as an acting scaler and the person responsible to enter the data in the computer must be trained to properly operate the scale site.

13.5 Scanner Scaling

Measurements Canada has approved the use of log scanners as a method to scale timber for trade purposes. Scanner specifications can be found at:

[Measurement Canada Scanning Device](#)

For more information on the process to authorize the use of scanners in BC please contact the Director of Timber Pricing Branch.
