

# Urgent Movement of Private Timber

If timber (up to a maximum of 10m<sup>3</sup>) needs to be moved urgently from Private land, this process may be used by the District staff to allow transport of the timber before the private timber mark can be received by the landowner. Use of this process is designed to allow the tree to be transported in an urgent situation and as an interim measure.

- The landowner is required to contact the District MFLNRORD Scaling staff to use this process.
- Scaling of the timber must be done at the site of origin which would allow it to be transported as prescaled timber.
- The attached District application/ authorization may be used by district scaling staff to allow for the immediate transportation of the timber under the District Manager's authorization and using the **Scaled Timber Brand** of the District Manager owned scale site as entered into the Scale Control System.
- The Scaler would then 'hold' the return until the private timber mark is obtained and then use that timber mark on the scale return for submission within 5 days as per *Scaling Regulation S. 11(3)*.

# Urgent Movement of Private Timber District Authorization

Date \_\_\_\_\_

Owner of Private Property or Timber (mandatory)
Name
Legal Address
Phone

This request must be signed by all the legal owners of the property and it is their responsibility to ensure they legally own the timber this request is for and that all requirements of transporting and scaling are met.

\_\_\_\_\_  
Signature of **ALL** Property Owners or Timber Owner (s)

A private timber mark for the property/timber owner must be applied for from the local MFLNRORD District office before scaling and transportation of the timber can occur.

This will authorize land owner/timber owner \_\_\_\_\_ to transport downed and private timber, up to a maximum of 10 m<sup>3</sup>, to a scale site prior to the timber mark associated to the property being received. The use of the Scale Site Timber Brand \_\_\_\_\_ associated to Scale Site \_\_\_\_\_ is to be used for transport and all *Timber Marking and Transportation Regulation* requirements will apply.

This timber is subject to receiving a private timber mark (this document does not guarantee receiving a private timber mark) and must be scaled prior to transport. The scaler will submit the scale return to the Harvest Billing System within 5 days of the landowner receiving the private mark using the timber mark associated to the parcel of land. (*Scaling Regulation s. 11(3)*)

This authorization will expire 4 weeks after the date of authorization.

Yours truly,

District Manager
