To determine if an area of interest falls within a Fibre Recovery Zone, please refer to the FADM_FIBRE_RECOVERY_ZONES_SP layer located in the BC Geographic Warehouse.

Coast Fibre Recovery Zone

The Fibre Recovery Zone defines areas where increased waste rates may apply to avoidable waste left on a cutting authority as detailed in the Provincial Logging Practice and Waste Measurement Procedure Manual.

This map is a representation of the Coast Fibre Recovery Zone boundaries.

Coast Natural Resource Area

Fibre Recovery Zone

- Immature Crown Timber
- Mature and Immature Crown Timber
- Mature Crown Timber

Ratio scale is correct at 44"x34" page size.
