

What's new Version 1.13.1

1. The Waste System data model has been upgraded to be compatible with FTA4. This is an internal system upgrade, system users will not be affected.
2. A fix has been made to enable users to submit and the ministry to bill private timber marks.
3. A fix has been made to segregate the same road permit marks reported in the Sampling Statistics Report.
4. On FS702s, a fix had been made to WMRF to show up correctly as zero instead of blank.
