- Additional system enhancements in V2 can be found in What's New Version 2 document.
- Detailed operating procedures can be found in V2 Waste System Users Procedures Manual.
- Visit www.for.gov.bc.ca/hva/waste/index.htm For additional information.

Topics

1. Create Reporting Units.

2. Using Block Search 106 to Assign Blocks to RUs.

3. 102 New Features – Harvest Status.

4. Exempted Blocks.

5. Multi Marks.

6. 303 New Features.

Create Reporting Units

- Hover mouse over top menu bar, click Create/Search Reporting Units.
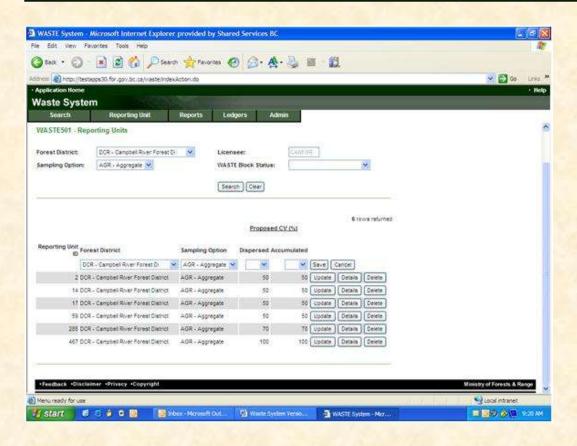

Create a New RU

- Top portion is for searching a reporting unit, bottom portion is for creating a reporting unit.

- In the bottom portion, using the drop down arrows, select a Forest District, Sampling Option, enter appropriate CVs, (if Ocular, leave as blank). Click Save.
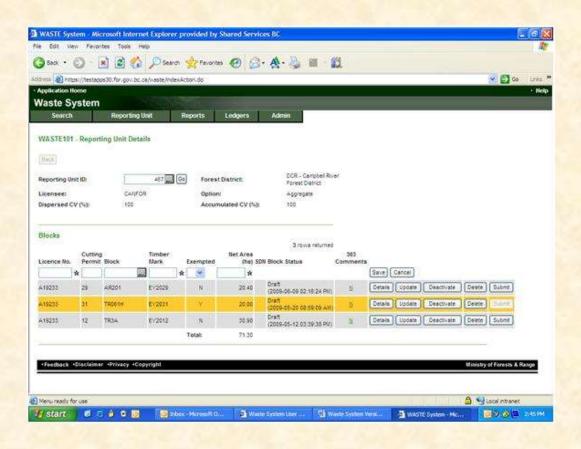

Different Sampling Options

- If a different sampling option is desired from the one you previously chosen, click drop down arrow, select another sampling option, Save.
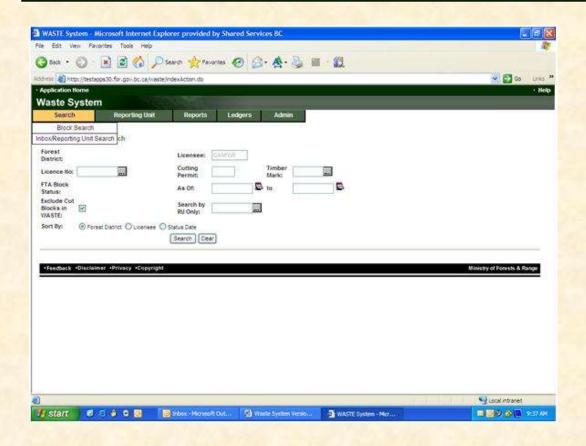

Waste 101 Reporting Unit Details

- You can enter block id on 101 direct, or
- Click dot dot dot to use SIL003, or
- Use Block Search 106 to add blocks to a new RU.

2. Using Block Search 106 to Assign Blocks to RUs

- Hover mouse over Search menu on top, click Block Search.
- Enter Search criteria.
- Select Logging Complete - LC for FTA block status.
- Click Search.

Add Blocks to new RUs

- Once you hit Search, a list of LC blocks that have not been previously waste surveyed and entered into the Waste System appears.
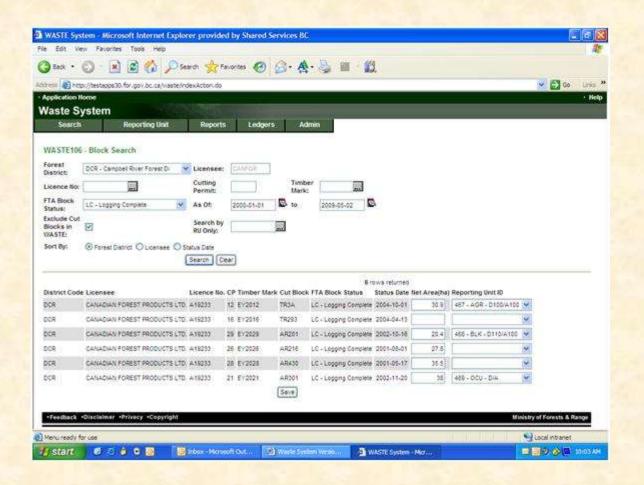

Add Blocks to RUs

- Choose the block(s) that you want to put in the created RUs by clicking on the RU id arrow and select the RU. Save.
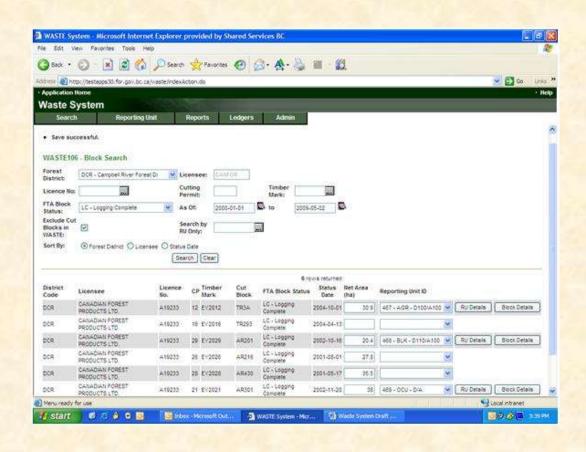

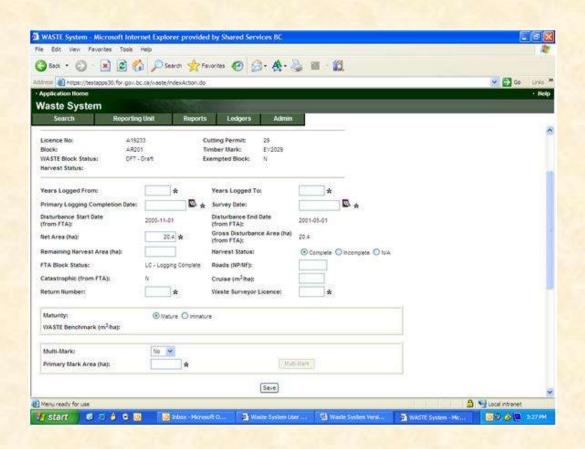

Add Blocks to RUs (continued)

RU Process Completed

- Once Blocks have been assigned to the RUs, you can click RU details to review the RU or Block Details to begin entering block data on 102.
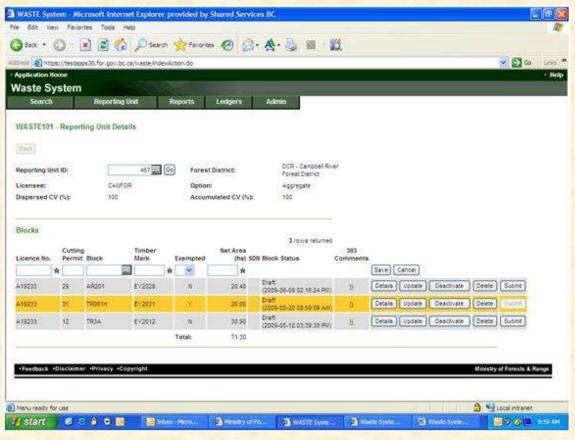

3. 102 New Feature – Harvest Status

- Track block harvesting completion status.
- Choose one of three radial buttons:
- Incomplete
- N/A
- If Incomplete is selected, must enter the hectares for the Remaining Harvest Area.

4. Exempted Block Procedure

- Enter Exempted Block direct on 101.
- Flip 'Exempted' indicator to 'Y'.
- Save.
- EB becomes highlighted in yellow.

Find Parent

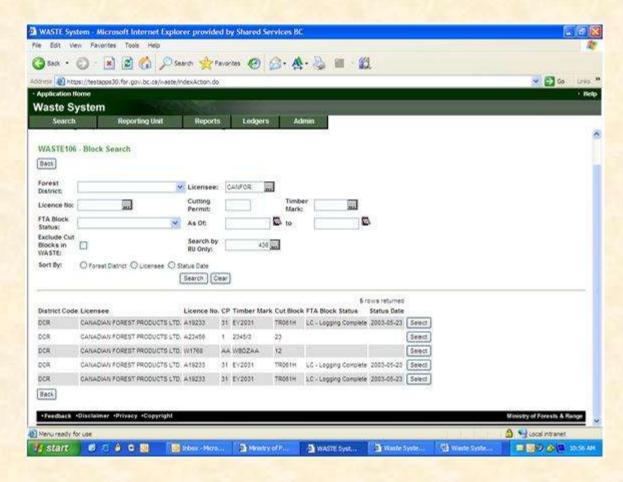

- To find the Parent Block, on 102 click 'Select Parent Block'.

Find Parent (continued)

- Input Search Criteria.
- Uncheck 'Exclude Cut Blocks in Waste' box.
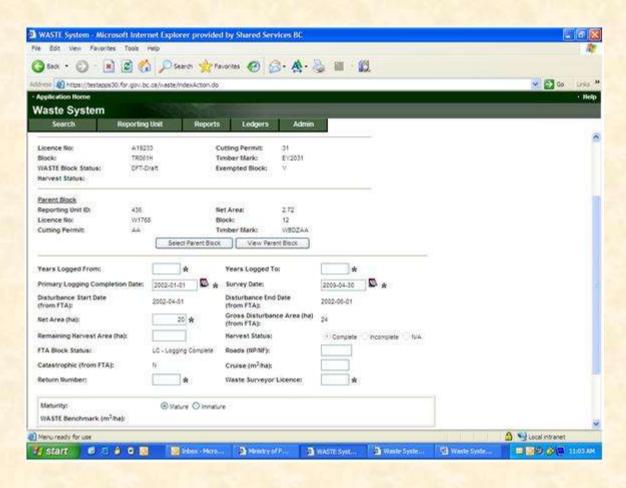

Parent Found

- Once the Parent Block is found, click Select.
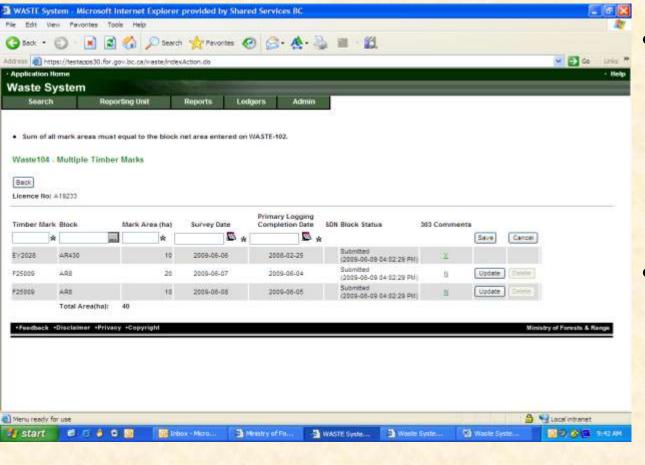

View Parent

- Users will be taken be taken back to 102.
- Parent Block's tombstone is populated.
- Click 'View Parent Block' to confirm selection.
- Enter 102 data, click Save.
