

South Island Resource District - Improving Residual Fibre Utilization

District Workshop – June 22, 2018

Objectives:

1. Facilitate communication regarding the needs and opportunities for harvesting post-harvest residual fibre.
2. Review initiatives/ legislative tools that promote the increased utilization of post-harvest residual fibre.
3. Solicit input regarding new and innovative means/opportunities to develop business to business relationships to improve fibre utilization.
4. Seek input on a proposed Fibre Recovery Zone - a geographic area within the South Island Resource District where economics and demand allows for residual quality fibre to be utilized.
