RE: Woodlot Licence W1640 – Woodlot licence plan amendment and late free growing date extensions

Dear John and Irene Ross,

Your proposed woodlot licence plan (WLP) amendment and proposals under *Woodlot Practices and Planning Regulation* (WLPPR) s. 35.1 for cutblocks: EF1-5, EF2, and BB-1, within the Campbell River Natural Resource District, have been fully reviewed.

Determination – WLPPR s. 35.1 Proposal

I am satisfied that the proposed extensions to regeneration and free growing timelines have been prepared and submitted in accordance with WLPPR section 35.1 (1)(d).

Accordingly, as the Delegated Decision-Maker, I hereby approve the proposed late free growing date extensions for cutblocks EF1-5, EF2, and BB-1.

The following milestone dates are now applicable:

| Cutblock | Regeneration Date | Late Free Growing Date |
|----------|-------------------|------------------------|
| EF1-5 | 2015-04-03 | 2032-04-03 |
| EF2 | 2015-04-03 | 2032-04-03 |
| BB-1 | 2015-03-01 | 2032-03-01 |

Where it is known that the requirements for a free growing stand cannot be met it is my expectation that WLPPR s. 35.1 applications be made as soon as is practicable. The need for such

proposals should be communicated to District staff prior to the late free growing milestone due date.

Determination – WLP Stocking Standard Amendment

I am satisfied that the proposed WLP amendment to stocking standards has been prepared and submitted in accordance with *Forest and Range Practices Act* s. 16. The proposed stocking standards are consistent with WLPPR s. 18(3) and the WLPPR Schedule 1 factors.

Accordingly, as the Delegated Decision-Maker, I hereby approve the W1640 WLP amendment to stocking standards.

Sincerely,

Lesley Fettes, RPF
District Manager
Campbell River Natural Resource District
