MEMBERSHIP DIRECTORY

TREE SEED WORKING GROUP

(CANADIAN TREE IMPROVEMENT ASSOCIATION)

1985
INTRODUCTION

The first Membership Directory of the Tree Seed Working Group (of the Canadian Tree Improvement Association) is based on the 106 questionnaires returned from those circulated with the TSWG News Bulletin No. 1, December 1983. Together with names, addresses and affiliations, members' work activities and fields of interest are included.

An attempt was made to standardize all entries but this was not possible since some information (telephone number, professional title) was not always provided. Despite intensive editing some entries display abbreviations (e.g. Dept.) while others include the full spelling. Revisions of the Directory will attempt to eliminate such discrepancies.

As a year has elapsed since the questionnaires were sent out some entries, or parts thereof, may be obsolete. No definite schedule for revisions has been decided upon but an announcement will appear in a future TSWG News Bulletin. Membership in the TSWG is open to anyone with expertise in tree seeds and is free! Anyone wishing to join should contact Ben Wang (Chairman) or George Edwards (Editor). Comments on the Directory, and suggestions for its improvement are welcomed.

The TSWG is indebted to Francine Ackerman (National Tree Seed Centre, Petawawa) who summarized the returned questionnaires and completed the first draft of the membership list, and to Doug Taylor (Pacific Forest Research Centre) for coding the information, rearranging it, fighting with the computer (and losing) over cross-reference indexes, and seeing the information through the word processor.

USING THE DIRECTORY

The Directory is in three parts. Part I comprises an alphabetical list of members arranged by province. Part II is a list of code numbers for (a) Species and (b) work Activities and Fields of Interest, while Part III comprises cross-reference indexes for Species, work Activities and Interests.

Part I Alphabetical List of Members

Members are arranged in alphabetical order by province. All provinces, except Manitoba, are represented and are arranged in geographical order from east to west. International members form a single group. Each member has been given (on the first line of the entry) an identification number; these numbers are used to list individuals when cross-referencing other indexes of the Directory.

Following each name and address, etc., are groups of code numbers relative to the Activities and Fields of Interest of the members, and the Species involved in the member's work. (These code numbers are identified in Part II). When a member is involved in more than one Activity or Interest, and with several species, the code numbers are presented horizontally as a line (or lines) and are separated by spaces.

Part II Species, Activities and Interests.

Species are listed in alphabetical order by common name within a genus. In some instances only the genus or higher taxonomic grouping (such as family) is listed. Code numbers from 1 to 67 are used.

Activities show the major technical aspects of each member's work with tree seeds and are listed under two headings, Seed Biology and Seed Technology. Under each heading, code numbers from 1 to 7 are used.

Fields of Interest indicate the member's general type of work, e.g. management, teaching, seed production, etc.; code numbers from 1 to 0(10) are used.

Part III Cross-Reference Indexes

There are four cross reference indexes that list, by means of the identification numbers, those individuals concerned with each aspect of Seed Biology and Seed Technology, each Field of Interest, and Species, respectively. For example, the first cross-reference list shows all members whose
work concerns Seed Biology beginning with the first aspect, Development of Seed-Producing Structures. Thus, if your work concerns a particular Activity, and you wish to determine other members who perform the same Activity, these can be decoded from the line(s) of members' identification numbers shown against that activity. By the same token, the fourth cross reference list displays each Species and those members (by identification number) whose work concerns that Species.

The final section is an alphabetical listing of all the names included in the Directory and the identification number assigned to each.

Part III is probably the most useful section of the Directory as it provides ready reference guides by means of which all members concerned with a particular Activity, Interest or Species can be easily identified. Thus groups of members with common work denominators may readily locate and contact one another.

LIST OF WORK ACTIVITIES
FIELD OF INTEREST
AND CODE NUMBERS
Work Activities have been arranged under two headings, viz., Seed Biology and Seed Technology. Each heading has been subdivided into 7 aspects. The aspects are coded from 1-7.

Fields of Interest indicate the general nature of the involvement with tree seeds. This has been subdivided into 10 aspects that are coded 1-0.

I — ACTIVITIES

**SEED BIOLOGY**

<table>
<thead>
<tr>
