

QUESTIONS RECEIVED ON RSO MF18BCWS

Q: Does Appendix C – Mobile Aviation Fuel Inspection Report need to be completed again if one was done late last year?

A: The Appendix C – Mobile Aviation Fuel Inspection Report has a validity period of 12 months from time of issue by the B-620 Inspection Facility. If an Appendix C was completed within the last 12 months, that form can be submitted with your RSO response. However, a unit will not be used if the Appendix C has expired (past its 12 month validity period) and may not be engaged if the Appendix C will expire during the expected hire term. Contractors are responsible for ensuring fuel units offered through the Standing Offer maintain valid inspections.
