Reported Incidents

4

Incidents Reported April 22nd to April 28th, 2024

- 1. Surface Autonomous Mobile Equipment Out of Control:** An empty autonomous haul truck travelled 10 feet into the oncoming lane.
- 2. Underground Ventilation Stoppage:** A power outage caused a stoppage of the main underground ventilation fan.
- 3. Underground Ventilation Stoppage:** A ground fault relay sensed a fault and caused a stoppage of the primary mine vent fans.
- 4. Underground Ventilation Stoppage:** A power outage caused a stoppage of the main underground ventilation fan.

Comments: Wildfire risk is high throughout the province! The Duff Moisture Code expresses the moisture content in the loosely compacted organic layers. This map shows that the BC interior region is in a moderate to severe rating.
