

Agent Profile Management

Note: *It is strongly suggested that you review and update your agent profiles on a routine basis.*

Warning: *Authorization of an agent cannot be restricted based on mining property or regional area. Once you have set up an agent, the authorization covers all valid title you own.*

Before you start:

You will need to know the **Client Number** of the person you wish to add as your agent. If you do not know your agents client number, you will want to do a search in MTO and find that number before starting.
