

## Mineral Titles Online – Increase for online security

Effective January 21, 2011

### What is a CAPTCHA?

(Completely Automated Public Turing test to tell Computers and Humans Apart)

A category of technologies used to ensure that a human is making an online transaction rather than a computer. Developed at Carnegie Mellon University, random words or letters are displayed in a camouflaged and distorted fashion so that they can be deciphered by people, but not by software. Users are asked to type in the text they see to verify they are human.

In our continuing efforts to ensure a level playing field for all free miners and to increase security on Mineral Titles Online (MTO), Mineral Titles Branch has added a count-down timer to the captcha screens for acquisition of claims.

You still have the option of selecting cells by map selection or by inputting the cell key id manually.

### Map Selection Method

After you have selected your cells to comprise your claim, and click **Click here to acquire title** you will be directed to the next screen where you enter your CAPTCHA. You now have 1 minute (60 seconds) to correctly enter the CAPTCHA code and click next.

If you cannot read the code, or the code expires, or the code is entered incorrectly click the

Next

You selected the following cells:

094G06B038D 094G06B048B  
094G06B038C 094G06B048A

**Verify Your Submission**  
(Case Sensitive. No spaces required.)

Enter the code shown:

f GS x

Next

Code will expire in 00:12 Min.  
If code expires, click next to generate a new code.

Once the count-down timer minute has lapsed, the timer will read 'expired'. You then simply need to click the Next button to generate a new code to be entered. Your cells will remain selected and the count-down time will once again start at 1:00 minute (60 seconds).

Code will expire in Expired Min.  
If code expires, click next to generate a new code.

Correctly enter the CAPTCHA code, click Next and you will be taken to the review and payment screens.

### Input Cell ID's

The count-down timer starts immediately upon selecting the **Input Cell Ids** option and clicking Next. Select the number of cells and enter the cell key ID's just as you normally would using this option, it time permits, enter the CAPTCHA code shown.

If you feel there is not enough time remaining on the CAPTCHA timer, or the time has expired, you then simply need to click the Next button to generate a new code to be entered. Your cells will remain selected and the count-down time will once again start at 1:00 minute (60 seconds).

### Select Number of Cells
