Subject: Good job Glenn Stewart

Glen Stewart,

Michael Proctor here, You don't know me. I am the guy who did the 1998 Jumbo grizzly survey. I have just finished my PhD on grizzly bear connectivity and fragmentation in the entire Kootenay region (and a bit more).

I just wanted to tell you that I have just read your GB Management Plan for the Jumbo and I think you did a good job. You have done a thorough and honest literature review.

Everyone and their brother is asking me to review your documents and they look pretty good to me so far.

I always hoped that everyone would finally see that the Jumbo area was neither empty lousy habitat or the "very best" there is - because it is good but average for the area. There is a lot of good habitat in the Purcells.

Anyway, it was a pleasure to read your honest approach. I feel that you guys do see the issues for what they are. In the end the thorough honest approach serves you the best as it does everyone.

Look forward to meeting you one day.
Michael Proctor PhD
