

## *Involvement of Nicola-Similkameen Innovative Forestry Society (NSIFS) - Larry Henry*

- **(Notes recorded from presentation)**
- **This presentation provides a perspective on the role of the NSIFS within landscape unit planning from the Executive Director of the society.**
- **The vision of the society is to increase the amount of information available on forest resources and increase the amount of local involvement in planning and managing resources.**
- **A partnership agreement outlining roles and responsibilities with MSRM is being developed.**

## ***Involvement of Nicola-Similkameen Innovative Forestry Society (NSIFS) - Larry Henry***

- **The NSIFS mandate is to gather information and analyze how to increase the allowable annual cut (AAC) without causing impacts on other resources.**
- **The NSIFS' role in the Landscape Unit Planning process is to provide the information and analysis data to the government and the public for the opportunity to make decisions on landscape unit planning.**
- **MSRM continues to be responsible for public process and the establishment of objectives.**
