

Sec. 16(1), 16(2) Matrix Site Series Groups

For the purposes of Part 3 sections 16(1) and 16(2), all site series groups apply regardless of level.

For the purposes of section 16(2), within a biogeoclimatic variant the 10% target area flexibility for any site series group hectares can be met in any other site series group of a higher level in that variant.

The intent of sections 16(2)(a)(ii) and 16(2)(b) is that target flexibility for lower productivity site series surrogates is applied only to higher productivity site series groups. For the purposes of the land use order objectives productivity must at a minimum be air photo interpretation verified.
