The Government of British Columbia’s regulatory count is the total number of regulatory requirements in all statutes, regulations, and associated policies and forms. Government maintains and manages a Regulatory Requirements Count Database to track changes in the number of regulatory requirements. Ministries must record any changes to the number of regulatory requirements in the Regulatory Requirements Count Database.

Please complete the table below based on the proposed regulatory change. For help conducting a count of regulatory requirements, please see the [How to Count Guide](#) or contact the Regulatory and Service Improvement Branch at RegulatoryReformBC@gov.bc.ca.
