

CORONAVIRUS 2020: **FLEET PLANNING GUIDE**

ARI is here to support your fleet team and drivers as we contend with the rapidly changing COVID-19 landscape together. Whether you're activating continuity measures, maintaining operations via remote workers and social distancing, or addressing variable conditions by region, please use the resources below to promote safety and lessen risk to drivers.

FLEET PRO BEST PRACTICES

Here's some ways to support your drivers (even if you've been instructed to work remotely):

- Monitor status of COVID-19 in areas of high driver volume and ensure all drivers have your current contact information
- Make sure vehicles are stocked with disinfecting supplies such as hand sanitizer, wipes, and surface cleaners
- Visit [ARI's COVID-19 resource center](#) to monitor updates
- Monitor vehicle health to avoid breakdowns or emergencies by staying consistent with preventative maintenance and monitoring telematics when applicable
- Schedule repair appointments with enough time to disinfect vehicle; ensure drivers and technicians practice social distancing

ON-THE-ROAD PREVENTION TIPS

Here are some ways drivers can help limit transmission when delivering essential services:

- Disinfect surfaces of shared vehicles and/or equipment before and after using
- Practice social distancing measures with customers or other drivers
- Confirm you have hand sanitizer in your vehicle that complies with health guidelines
- Follow recommended sanitizing and distancing measures when refueling vehicles
- Keep your vehicle neat and limit the items going in and out with you

IMPORTANT LINKS FOR NATIONAL UPDATES

Here are useful links to key COVID-19 resources for fleet teams and drivers:
