### **Guidance to construction sites operating during COVID-19**

Punjabi translation available; updated on March 30, 2020

VICTORIA – As the challenges caused by the COVID-19 outbreak continue to shift, the B.C. government and Dr. Bonnie Henry, provincial health officer, are taking unprecedented measures to slow the transmission of COVID-19.

Recently, Henry issued an order under the Public Health Act prohibiting the gathering of people in excess of 50 people at a place of which a person is the owner, occupier or operator, or for which they are otherwise responsible. Employers in the construction industry are asking for clarity about what this means for them.

While this order does not apply to construction sites as a whole, the public health officer is directing employers to take all necessary precautions to minimize the risks of COVID-19 transmission and illness to themselves and their employees. This includes:

- There should be no more than 50 people in the same space in any circumstances.
- Where possible, employees should maintain a distance of two metres apart from each other.
- Post signage that limits the number of occupants in any elevator to four people at a time.
- Reduce in-person meetings and other gatherings and hold site meetings in open spaces or outside.
- Increase the number of handwashing stations and post signage that identifies their location.
- Maintain a list of employees that are currently working on sites and update this list daily.
- All common areas and surfaces should be cleaned at the end of each day. Examples include washrooms, shared offices, common tables, desks, light switches and door handles.
- Self-isolation can end 14 days after the last contact or return to Canada if you have not developed symptoms.
- With or without a history of travel, if you have respiratory symptoms that can be managed at home, **self-isolate at home for at least 10 days after onset of symptoms**. After 10 days, if your temperature is normal and you feel better, you can return to your routine activities.
  - Coughing may persist for several weeks, so a cough alone does not mean you need to continue to self-isolate for more than 10 days.

Section 4.85 of the Occupational Health and Safety Regulation does provide for a minimum standard around the provision of washrooms and hand washing facilities. Where plumbed facilities are impracticable, employers must provide access to portable washroom and hand-washing facilities. Those facilities must be maintained in good working order and must be

provided with the supplies necessary for their use.

Employers should reassess their work environment every day and keep updated with the information posted on the Province's website: [www.gov.bc.ca/COVID19](http://www.gov.bc.ca/COVID19)

The B.C. government is doing everything it can to help contain the spread of COVID-19, and the safety of British Columbians remains its top priority.
